LED lamps	1.00–1.17
LED systems	2.00–2.63
Halogen lamps	3.00–3.39
Compact fluorescent lamps	4.00–4.49
Fluorescent lamps	5.00–5.57
Discharge lamps	6.00–6.55
Display and signal lamps	7.00–7.15
General lighting service lamps	8.00–8.13
Electronic control gear	9.00–9.123
Light management systems	10.00–10.63
Energy labeling	11.00–11.21
Index and general information	12.00–12.37

THE COMPANY

Creating the future of light with OSRAM

The lighting market is going through a period of technological change, with semiconductor-based technologies such as LEDs and OLEDs presenting customers with new possibilities in terms of efficiency, quality of light and flexibility. As a premium supplier, OSRAM is playing a leading role here.

For more than 100 years the trademark OSRAM stands for innovative and sustainable developments in the global lighting market. Today, OSRAM is one of the world's largest suppliers of products and solutions for a wide range of customer requirements – from lamps and modules to luminaires and high-efficiency Light management systems.

OSRAM focuses all its resources on the subject of light, actively supporting its customers in making the best choices to meet their individual requirements. With more than 40,000 employees in around 150 countries, OSRAM develops tailor-made solutions to cover the specific needs of its customers.

Passion for light, solutions for life

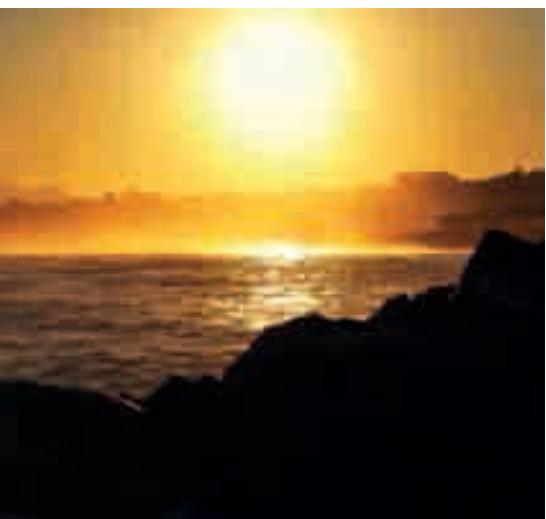

LED technology is already a crucial factor here. LED-based products now account for around 25 percent of OSRAM's total sales. OSRAM covers the entire LED value added chain, from components to light management solutions. And with around 8000 LED patents OSRAM has a considerable influence on the further development of LED technologies.

As a "pure light player", OSRAM is a strong global brand, and as a leading innovator in all application and technology sectors it is shaping the digital future of the lighting industry.

A world fit to live in – today and tomorrow

The consequences of global warming are already evident. The polar ice caps and glaciers are melting, sea levels are rising and deserts are expanding. The problem lies with increasing CO₂ emissions throughout the world. As a globally active company we are aware of our enormous responsibility towards people and their environment. This is why sustainability is the basic principle behind all OSRAM's actions. We are careful with natural resources, avoid waste wherever possible, and help reduce the greenhouse effect by developing energy-saving lamps and systems.

Our energy-efficient products are helping to restore the balance. OSRAM LED lamps, for example, last up to 25 times as long as conventional incandescent lamps. Our LED lamps therefore not only lead to a considerable reduction in CO₂ emissions they help avoid waste and cut down on maintenance costs and electricity costs. But OSRAM is focusing not only on LED technology. With our energy-saving lamps, for example, you can reduce your power consumption for lighting by as much as 80 %. At the same time, because of its long life a single compact fluorescent lamp replaces up to 20 ordinary light bulbs. Innovative IRC technology is providing impressive savings in halogen lamps. And OSRAM HALOGEN ECO lamps are simple direct replacements for conventional incandescent lamps.

As a globally active company we act responsibly towards society and the environment, meet global challenges with sustainable products and pioneering processes and therefore make a contribution to maintaining the environment for the benefit of future generations. That is the guiding principle of our "Global Care" program – our commitment to sustainability. Our efficient products are the most important expression of this commitment.

Economical systems

To make lighting even more efficient we are focusing more and more on developing perfectly matched systems comprising lamps, electronic control gear and light management systems. Electronic operation not only ensures long life but also interference-free energy-saving operation and high-quality light. In this way, the enormous potential of our innovative lamps can be fully exploited.

Extensive recycling – real sustainability

Even when they come to the end of their lives, the almost completely recyclable OSRAM lamps provide valuable raw materials. We make use of eco-friendly waste disposal systems and closed material cycles for many of our products; the recycled materials are then used as far as possible for manufacturing new products. Our packaging is generally made of recycled paper, and in the OEM sector we mainly use multi-use packaging. We are constantly developing and improving our production processes as part of an environment management system.

Clear labeling, clear statement

We label products that are particularly energy-efficient with the symbol of a green tree. These climate-protection products are part of our Environmental Portfolio. With products from the OSRAM Environmental Portfolio you too can make a significant contribution to climate protection and boost your reputation for eco-friendliness.

For more information go to
www.osram.com/environmentalportfolio

Sustainable projects

In addition to "Clean Development Mechanism" (CDM) projects for reducing CO₂ emissions in developing and emerging countries, OSRAM continues to monitor its unique project on Lake Victoria in Kenya for producing light away from a permanent power supply. At a specially constructed solar station the local inhabitants and fishermen can recharge batteries for energy-saving lamps, fixtures and other electrical appliances at low cost and without damaging the environment.

In India, OSRAM has joined forces with RWE Power on CDM energy-efficiency projects in which high-quality OSRAM energy-saving lamps have been distributed to around 1,500,000 households in three regions of the country. This will lead to potential energy savings of around 1,000,000 tons of CO₂ over 10 years.

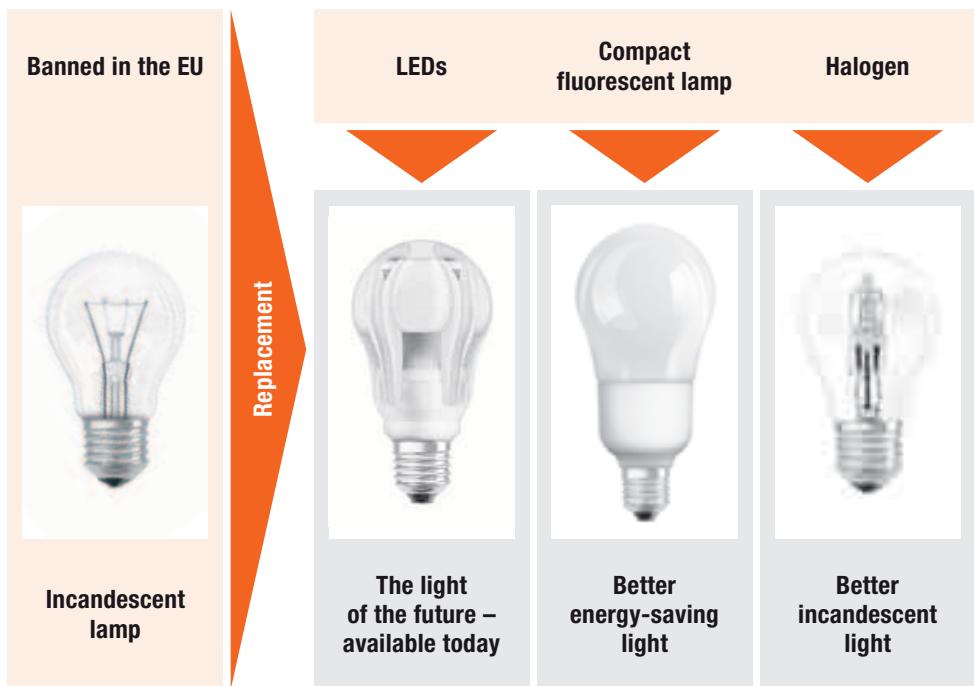

Alternatives to standard products

With Directive 2009/125/EC the EU set the framework for defining requirements for energy-related products. Up to now, there are two implementation measures for the lighting sector.

Regulation EC 244/2009 (amended by regulation EC 859/2009) defines requirements relating to the eco-design of non-directional household lamps. This EC 244/2009 regulation covers the technologies that are generally used in the residential sector, namely incandescent lamps, halogen lamps, compact fluorescent lamps and LED retrofits with integrated control gear. By

contrast, regulation EC 245/2009 (amended by regulation EC 347/2010) defines requirements for fluorescent lamps, compact fluorescent lamps with plug bases, high-intensity discharge lamps with E27, E40 and PGZ12 bases, and control gear and fixtures for fluorescent lamps and high-intensity discharge lamps used mainly in the professional sector.

Implementation measure for non-directional household lighting

	Sep. 2011	Sep. 2012	Sep. 2013	Sep. 2014	Sep. 2015	Sep. 2016
Incandescent lamp, clear	15 W 25 W 40 W 60 W 75 W 100 W		Ban on all clear incandescent lamps Alternatives: HALOGEN ECO, compact fluorescent lamps, LED retrofit lamps

SERVICE ON THE INTERNET

See the world in a new light –

www.osram.com

On the OSRAM website you can find more than just the fascinating world of light and lighting, the latest information and interesting links, you can also download various practical tools and service offerings for commercial customers and consumers.

OSRAM on the internet: This is where you can find out about outstanding lighting – information on the latest products, tips, tools, services and support for planning your lighting system.

www.osram.com

OSRAM vehicle lamp replacement guide:

Quickly find the right replacement lamps for your vehicle from a list of more than 400 products. Also available as an app for smartphones.

www.osram.com/applicationguide

OSRAM light house:

Calculate how much energy you can save in your own home. Energy-efficient light sources will reduce your electricity costs and CO₂ emissions.

www.osram.com/light-a-home

OSRAM lighting planning with DIALux and RELUX:

The latest lamp and fixture data plus plug-ins for DIALux and RELUX planning software can be downloaded here.

www.osram.com/dialux-plugin

OSRAM Case Studies:

The OSRAM Case Studies Tool presents a selection of special lighting projects involving OSRAM products.

www.osram.com/casestudies

OSRAM LED deSIGNer:

Our online program works out the necessary components for the LED modules used for backlighting, and lists the relevant order data.

Product characteristics

- Professional LED lamps for line voltage
- Dimmable (Advanced versions)
- Base: GU10
- Lifetime: up to 40,000 hours
- Mercury-free lamp
- High color consistency; SDCM: <5 (PARATHOM® PRO)

Product benefits

- Very low energy consumption
- Extremely long life
- Shockproof and vibration-proof thanks to LED technology
- No UV or near-IR radiation in the light beam
- Professional thermal management
- Efficient generation of white light
- Alternatives to line voltage halogen lamps
- Ideal for economical spotlighting

Applications

- Spotlighting for accents
- Display cabinets and shop windows
- Retail outlets and exhibition rooms
- Spotlighting heat-sensitive objects such as food, plants, etc.
- May be used outdoors only in outdoor fixtures (at least IP65)
- Directional light sources
- Hospitality
- Shops

1) All the technical parameters apply to the entire lamp l in view of the complex manufacturing process for light emitting diodes, the values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- Professional LED lamp
- Dimmable (Advanced versions)
- Base: GU5.3
- Base: GU4
- Lifetime: up to 40,000 hours
- Mercury-free lamp
- High color consistency

Product benefits

- Very low energy consumption
- Extremely long life
- Shockproof and vibration-proof
- No UV or near-IR radiation in the light beam
- Efficient generation of white light

Applications

- As a downlight for marking walkways, doors, stairs, etc.
- Exhibitions, department stores
- May be used outdoors only in outdoor fixtures (at least IP65)
- Directional light sources
- Museums
- Hospitality
- Shops

Technical equipment

- Equipped with high-power LEDs
- Operated with conventional or electronic transformers

⁽¹⁾ All the technical parameters apply to the entire lamp. In view of the complex manufacturing process for light emitting diodes, the values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- Professional LED lamp
- Dimmable
- Lifetime: up to 45,000 hours
- Mercury-free lamp
- High color consistency

Product benefits

- Very low energy consumption
- Extremely long life
- Shockproof and vibration-proof
- No UV or near-IR radiation in the light beam
- Efficient generation of white light

Applications

- Shops
- Exhibitions, department stores
- Museums
- Hospitality
- Directional light sources

Technical equipment

- Equipped with high-power LEDs
- Operated with conventional or electronic transformers

2) All the technical parameters apply to the entire lamp | Due to the complex production process for light-emitting diodes, the typical values shown for the technical LED parameters are purely statistical values that do not necessarily match the actual technical parameters of each individual product, which can vary from the typical value | In preparation

3) Under consideration

Product characteristics

- Professional LED lamps for line voltage
- Dimmable
- Base: E27
- Lifetime: up to 30,000 hours
- Mercury-free lamp

Product benefits

- Very low energy consumption
- Extremely long life
- Shockproof and vibration-proof thanks to LED technology
- No UV or near-IR radiation in the light beam
- Instant 100 % light, no warm-up time
- Simple replacement for standard incandescent lamps
- Lower thermal output (compared with the standard reference product)
- Correct operation even at low temperatures

Applications

- Domestic applications
- General illumination
- May be used outdoors only in outdoor fixtures (at least IP65)

Product characteristics

- Professional LED lamps for line voltage
- Not suitable for use with dimmers
- Base: E14
- Lifetime: up to 25,000 hours
- Mercury-free lamp
- Very high color rendering (Ra: 90)

Product benefits

- Very low energy consumption
- Extremely long life
- Shockproof and vibration-proof thanks to LED technology
- No UV or near-IR radiation in the light beam
- Instant 100 % light, no warm-up time
- Simple replacement for conventional incandescent lamps

Product characteristics

- Not dimmable
- Base: G4
- Lifetime: up to 15,000 hours
- Mercury-free lamp
- Color temperature: 3000 K

Product benefits

- Very low energy consumption
- Much longer relamping intervals compared with the standard reference product
- No UV or near-IR radiation in the light beam
- Instant 100 % light, no warm-up time
- Ideal for decorative and free-burning applications
- Lower thermal output (compared with the standard reference product)

Applications

- For atmospheric accent lighting throughout the home
- Shops, hotels and restaurants
- Foyers, offices

1) All the technical parameters apply to the entire lamp. In view of the complex manufacturing process for light emitting diodes, the specified typical values for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

2) Provisional values

Product characteristics

- LED alternative to classic T8 fluorescent lamps in CCG luminaires
- High-efficiency LEDs
- Short end caps for continuous light band
- Up to 50 % brighter than previous SubstiTUBE® Advanced (p. 1.14)
- Uniform illumination
- Wide beam angle of 120°
- VDE-certified safety (in preparation)
- Integrated ECG with high power factor
- Mercury-free and RoHS compliant
- Type of protection: IP20

Product benefits

- Quick, simple and safe replacement without rewiring
- Up to 5 times longer lifetime* than standard fluorescent lamps and therefore lower maintenance costs
- Energy savings of up to 55%
- Instant-on light, therefore ideally suitable in combination with sensor technology
- Maximum resistance to switching loads
- Ideally suitable even at low temperatures

Applications

- Basic office illumination
- Factory lighting
- Utility rooms and stockrooms
- Logistics areas, transport facilities and corridors
- Indirect lighting and cove lighting in shops and restaurants

Product characteristics

- LED alternative to classic T8 fluorescent lamps in CCG luminaires
- Bright, robust and durable
- Uniform illumination
- Wide beam angle of 120°
- VDE-certified safety (VDE Reg. No.: 40033714)
- Integrated ECG with high power factor
- Mercury-free and RoHS compliant
- Type of protection: IP20

Product benefits

- Quick, simple and safe replacement without rewiring
- Up to 5 times longer lifetime* than standard fluorescent lamps and therefore lower maintenance costs
- Energy savings of up to 60%
- Instant-on light, therefore ideally suitable in combination with sensor technology
- Maximum resistance to switching loads
- Ideally suitable even at low temperatures

Applications

- General illumination within ambient temperatures from -25 °C to 50 °C
- Illumination of production areas
- Traffic zones and corridors
- Indirect lighting and cove lighting in shops and restaurants

2) Provisional values

Product characteristics

- LED alternative to classic T8 fluorescent lamps in CCG luminaires
- Ideal for simple lighting tasks
- Uniform illumination
- Wide beam angle of 120°
- VDE-certified safety (in preparation)
- Integrated ECG with high power factor
- Mercury-free and RoHS compliant
- Type of protection: IP20

Product benefits

- Quick, simple and safe replacement without rewiring
- Low maintenance costs thanks to long lifetime
- Energy savings of up to 55%
- Instant-on light, therefore ideally suitable in combination with sensor technology
- Extremely low weight of 205 g*
- Maximum resistance to switching loads
- Ideally suitable even at low temperatures

Applications

- General illumination for open luminaires within ambient temperatures from -25 °C to 40 °C
- Cooling and storage rooms
- Corridors, stairways, parking garages
- Beverage vending machines

¹⁾ All the technical parameters apply to the entire lamp. In view of the complex manufacturing process for light emitting diodes, the specified typical values for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- LED lamp for usage in luminaires with external ECG
- For professional LED luminaires, no need for expensive redesigns
- Uniform illumination
- 2-stage dimming in combination with the OTe family
- Wide beam angle of 120°
- VDE-certified safety (in preparation)
- Mercury-free and RoHS compliant
- Type of protection IP20

Product benefits

- Greater flexibility and lower development costs as there is no need to redesign the luminaire
- OPTOTRONIC® control gear complies with relevant standards, which simplifies luminaire certification: OTe 13/220-240/350 SD, OTe 25/220-240/2x350 SD (p. 9.62) plus OTe 35/220-240/700 SD and OTe 70/220-240/2x700 SD (p. 9.65)
- Ideal for applications with long operating times and difficult access for maintenance
- Maximum resistance to switching loads
- Ideally suitable even at low temperatures
- Instant-on light, therefore ideally suitable in combination with sensor technology

Applications

- Sophisticated illumination within ambient temperatures from -25°C to 60°C
- Basic office illumination
- Illumination of production areas
- Storage rooms
- Logistics areas, transport facilities and corridors
- Indirect lighting and cove lighting in shops and restaurants

1) Modules perfectly matched to 350 mA OSRAM OPTOTRONIC® electronic control gear. For current photometric data and important safety, installation and application information go to www.osram.com/led-modules. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

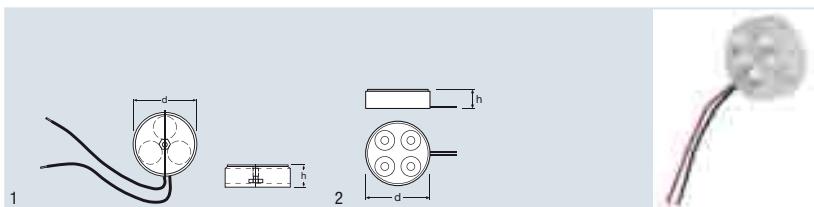

- Hexagonal metal core board equipped with one high-power LED
- Efficiency up to 76 lm/W
- Dimmable

Product benefits

- Optimum heat removal
- Enormous freedom of design thanks to compact dimensions
- At an operating current of 700 mA the luminous flux increases to 150 lm (DX01-W4F-854) or 130 lm (DX01-W4F-830)
- Low maintenance costs thanks to a lifetime of up to 70,000 hours

Applications

- For portable fixtures and spotlights
- Safety lighting and signal lights
- Architecture, shop or indoor fixtures

1) Modules perfectly matched to 350 mA and 700 mA OSRAM OPTOTRONIC® electronic control gear. | For current photometric data and important safety, installation and application information go to www.osram.com/led-modules. | All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- Luminous intensity comparable to that of halogen lamps MR11 and MR16 (20 W, 35 W, 50 W)
- Integrated optics with a 36° beam angle
- For series connection
- Two-core connecting cable with a length of 200 mm
- Simple fixing with M3 screw
- Dimmable
- FineWhite

Product benefits

- Module efficiency of up to 100 lm/W, up to 5 times greater than that of halogen lamps
- System[®] Guarantee in connection with OSRAM OPTOTRONIC[®] control gear
- Low maintenance costs thanks to a lifetime of up to 50,000 hours

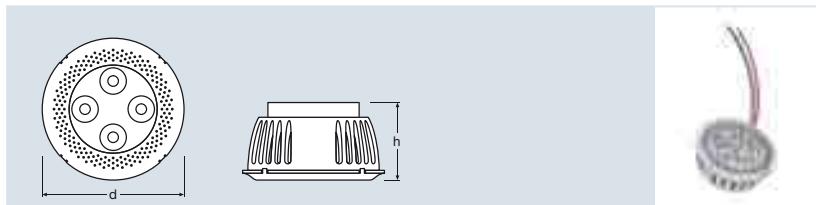

Applications

- Shop and furniture fixtures
- Hotels
- Restaurants

Accessories

- Heat sink CDPHHS

1) Modules perfectly matched to 24 V OSRAM OPTOTRONIC® electronic control gear. For current photometric data and important safety, installation and application information go to www.osram.com/light-modules. ¹⁾ All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- Luminous intensity comparable to that of halogen lamps MR16 (20 W, 35 W, 50 W)
- Integrated optics with a 36° beam angle
- High-quality aluminum casing
- For parallel connection
- Three-core connecting cable with a length of 500 mm
- Dimmable
- FineWhite

Product benefits

- Suitable for MR16 luminaires
- Module efficiency up to 86 lm/W
- System⁺ Guarantee in connection with OSRAM OPTOTRONIC® control gear
- Low maintenance costs thanks to a lifetime of up to 50,000 hours
- CP51-W4F-4 can be operated without an additional heat sink
- CP51-W4F-8 can be operated without an additional heat sink (Reduction of lifetime of up to 25,000 h)

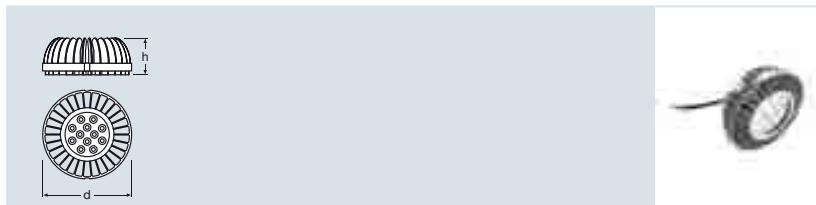

Applications

- Shop and furniture fixtures
- Hotels
- Restaurants

Accessories

- Heat sink CDPHHS

¹⁾ Modules perfectly matched to constant-current OSRAM OPTOTRONIC® electronic control gear | For current photometric data and important safety, installation and application information go to www.osram.com/led-modules. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

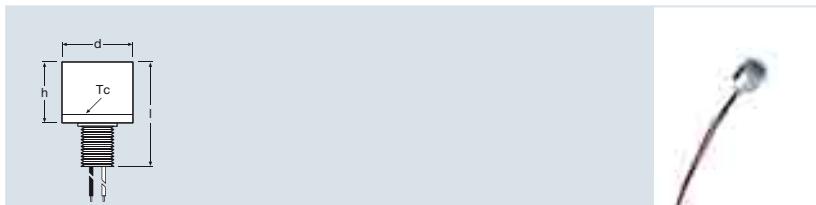

- Luminous intensity comparable to that of halogen lamps AR111 (50 W, 75 W, 100 W)
- Integrated optics and heat sink
- For series connection
- Two-core connecting cable
- Dimmable
- FineWhite

Product benefits

- Suitable for AR111 luminaires
- Module efficiency up to 71 lm/W
- No additional heat sink required
- System* Guarantee in connection with OSRAM OPTOTRONIC® control gear
- Low maintenance costs thanks to a lifetime of up to 30,000 hours

Applications

- Hotels
- Offices
- Shop
- Museums, art galleries

Product reference	Product number	COLOR		A		W

¹⁾ Modules perfectly matched to 350 mA OSRAM OPTOTRONIC® electronic control gear. For current photometric data and important safety, installation and application information go to www.osram.com/led-modules. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the typical values given above for technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- Metal casing with M10x1.5 thread for simple mounting
- No additional heat sink required
- Type of protection IP65 according to DIN EN 60529
- For series connection
- Two-core connecting cable with a length of 500 mm
- For series connection
- Dimmable
- FineWhite

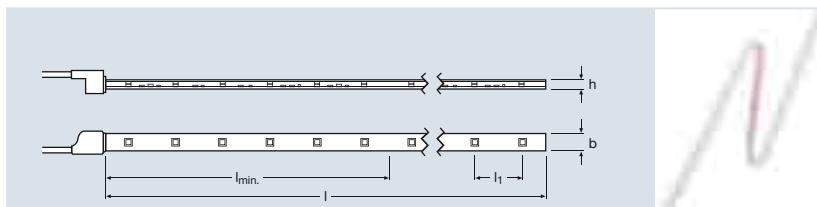

Product benefits

- Narrow beam angle for use as a spotlight
- Perfect centering thanks to flange on the floor of the casing (diameter 12 mm)
- Low maintenance costs thanks to a lifetime of up to 70,000 hours

Applications

- For accent, orientation or route lighting indoors and outdoors
- Lighting in furniture and shelving

In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- IP67 protected flexible and cuttable LED strip
- Luminous flux of up to 1200 lm/m
- With pre-assembled feeder for simple connection
- Dimmable
- FineWhite

Product benefits

- High-performance silicon for extremely long life and flexibility
- Stylish design
- Highly UV-resistant
- Salt mist proof

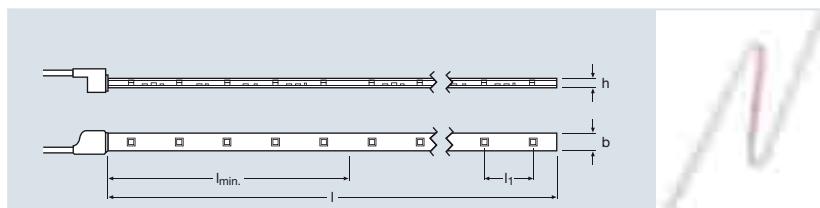

Applications

- Facade accent lighting
- Ceiling integration, wall integration
- Cove lighting
- Machine lighting
- Path lighting, signage

Accessories

- IP67 protected CONNECTsystem LF-PROTECT for simple installation without soldering
- LINEARlight Track LT

1) Modules perfectly matched to 24 V OSRAM OPTOTRONIC® electronic control gear. For current photometric data and important safety, installation and application information go to www.osram.com/led-modules. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- Flexible cuttable LED strip
- Luminous flux of up to 1800 lm/m
- Large selection of light colors
- Dimmable
- Powerful LED light source
- FineWhite

Product benefits

- Module efficiency up to 80 lm/W
- Low profile

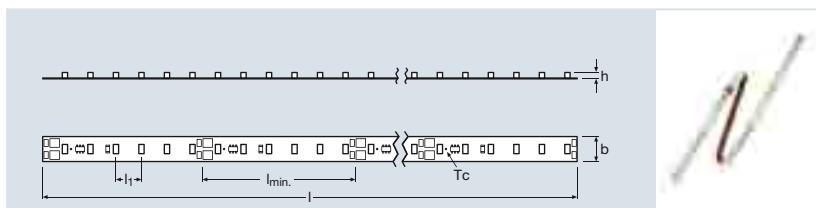

Applications

- Cove lighting
- Signage (advertising and lettering)

Accessories

- CONNECTsystem LF for simple installation without soldering
- LINEARlight Track LT

LINEARlight Flex® ShortPitch

¹⁾ Modules perfectly matched to 24 V OSRAM OPTOTRONIC® electronic control gear. For current photometric data and important safety, installation and application information go to www.osram.com/led-modules. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- Flexible LED strip
- Very small LED spacing
- Luminous flux of up to 840 lm/m
- FineWhite

Product benefits

- Suitable for low-profile enclosed fittings
- Module efficiency up to 88 lm/W

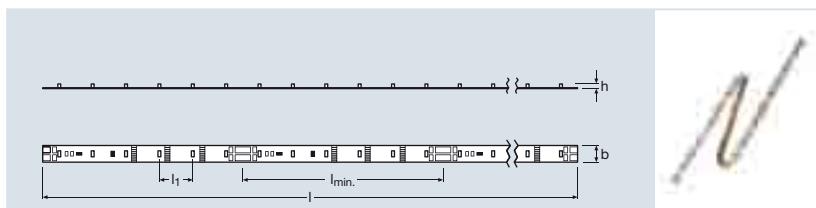

Applications

- Edge injection
- Small coving
- Path lighting, contour accent lighting
- Signage (advertising and lettering)

Accessories

- CONNECTsystem LF for simple installation without soldering
- LINEARlight Track LT

DRAGONchain® Tunable White

Product reference		COLOR	V	W	Δ°	
DC24B-TW ¹⁾³⁾		Tunable White	24	24	24	135
Product reference	K	lm	I [mm]	I ₁ [mm]	b [mm]	h [mm]
DC24B-TW ¹⁾³⁾	2700..6500	1770 ²⁾	3000	500	39	6.2

¹⁾ Modules perfectly matched to 24 V OSRAM OPTOTRONIC® electronic control gear. For current photometric data and important safety, installation and application information go to www.osram.com/light-modules. ²⁾ All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.
³⁾ Depending on color temperature. Specified maximum value.

Product characteristics

- Flexible chain consisting of six LED modules each with 4 LEDs (2x 2700 K, 2x 6500 K)
- With protective coating (IPX5) for outdoor and high-humidity applications
- Electrically insulated back
- Simple fixing with M3 screws

Product benefits

- Dynamic white light from 2700 K to 6500 K
- Flexible programmable lighting moods in connection with light management systems
- Extremely wide-angle optics for uniform backlighting of large surfaces
- Low maintenance costs thanks to a lifetime of up to 40,000 hours

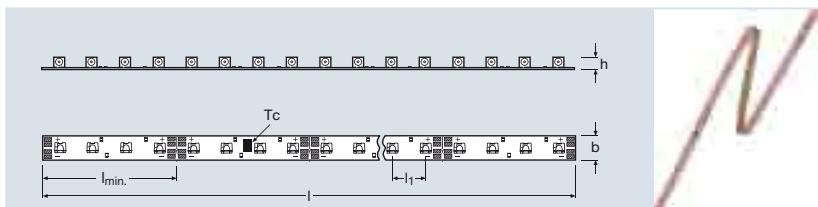

Applications

- Daylight simulation
- Spa
- Shop: targeted product presentation thanks to variable color temperature
- Offices
- Museums, art galleries: UV and IR-free light preserves exhibits

Accessories

- Heat sink DC24HS

1) Modules perfectly matched to 10 V OSRAM OPTOTRONIC® electronic control gear. I For current photometric data and important safety, installation and application information go to www.osram.com/led-modules. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- Splittable LED board (smallest unit: 4 LEDs with a length of 56 mm)
- Mounting holes for secure fixing
- Dimmable

Product benefits

- Very low thermal output despite low profile
- Serial connection of up to 3 modules
- Low maintenance costs thanks to a lifetime of up to 50,000 hours

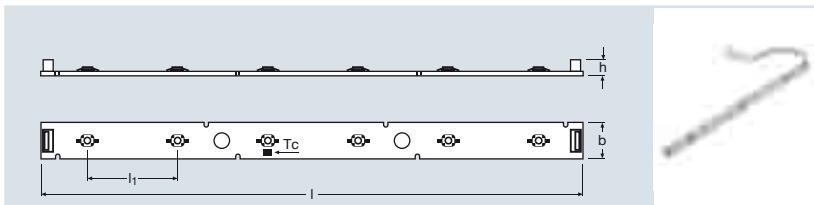

Applications

- Edge coupling
- Path lighting, contour accent lighting
- Orientation and safety lighting

Accessories

- CONNECTsystem LM
- LINEARlight Track LT-H
- OP4x1 optics

In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- High-quality batten fixture with 6 high-power LEDs
- Aluminum housing for adequate heat removal
- Mounting with M3 screws or brackets
- Dimmable

Product benefits

- With mid-feed up to six modules can be operated on one control gear unit
- Ready for connection with premounted feeder as a connection to the control gear
- Low maintenance costs thanks to a lifetime of up to 70,000 hours

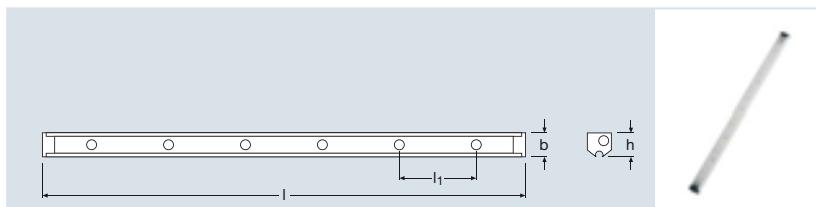

Applications

- Cove lighting
- Shelf lighting, cupboard lighting

Accessories

- CONNECTsystem LD
- Mounting brackets LD-MB

For current photometric data and important safety, installation and application information go to www.osram.com/led-modules. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- Slim attractive batten fixture with six LEDs
- Aluminum housing for adequate heat removal
- Diffused cover
- Adjustable
- Dimmable

Product benefits

- Serial operation of up to 5 modules on one control gear unit (can be connected in series with supplied adapter and connecting cable)
- Robust: coated board to protect against condensate
- Low maintenance costs thanks to a lifetime of up to 50,000 hours

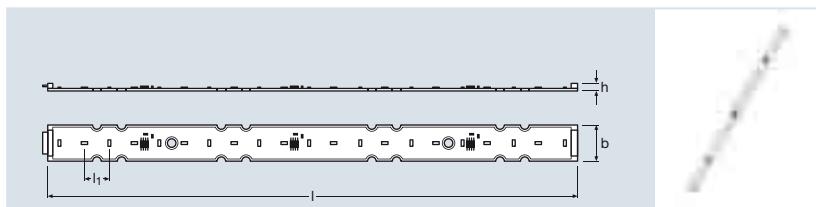

Applications

- Shelf/furniture lighting
- Display lighting
- Small coving

Accessories

- Mounting and connection systems included

For current photometric data and important safety, installation and application information go to www.osram.com/led-modules. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- Metal core board equipped with 21 LEDs
- Luminous flux comparable with that of T5 HE fluorescent lamps
- Luminous flux of up to 2250 lm/m
- Integrated SMD plug connector (male/female) on both sides of the PCB
- Color rendering Ra typ. 85
- Mounting holes for simple fixing
- Dimmable

Product benefits

- Modules can be joined together to make seamless strip lighting, without any further accessories
- Up to six modules connected in series on one control gear unit
- Module efficiency up to 88 lm/W
- Compatible with LINEARlight LR14A, LR14E
- Low maintenance costs thanks to a lifetime of up to 50,000 hours

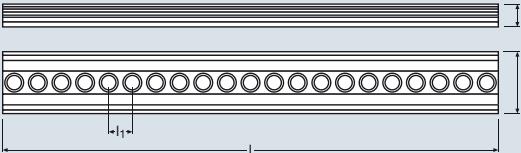

Applications

- Coving
- Shelf lighting, cupboard lighting

Accessories

- Can be expanded with optional accessories to create an individual complete module
- CONNECTsystem LR
- LINEARlight Track LT
- OPLR optics
- OTR optics tray

- Dimmable

Product benefits

- Modules can be joined together in series to make seamless strip lighting, without any further accessories
- Module efficiency up to 96 lm/W
- Compatible with LINEARlight LR21P, LR14A
- Low maintenance costs thanks to a lifetime of up to 50,000 hours

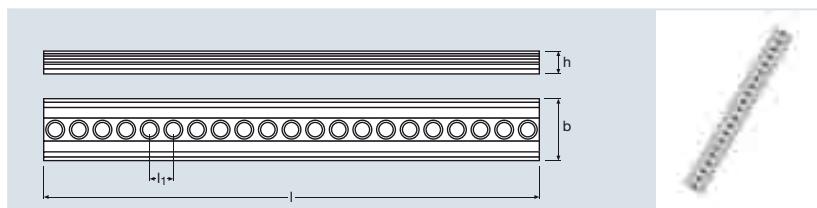

Applications

- Shelf lighting, cupboard lighting
- Background lighting

Accessories

- Can be expanded with optional accessories to create an individual complete module
- CONNECTsystem LR
- LINEARlight Track LT
- OPLR optics
- OTR optics tray

LINEARlight ECO (complete module)

1) Modules perfectly matched to 24 V OSRAM OPTOTRONIC® electronic control gear. | For current photometric data and important safety, installation and application information go to www.osram.com/led-modules. | All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- High-quality designer batten fixture equipped with 14 LEDs
- Aluminum housing for adequate heat removal
- Luminous flux of up to 610 lm/m
- Integrated optics
- Simple mounting with M3 screws or brackets
- Color rendering R_a typ. 85
- Dimmable

Product benefits

- Modules can be joined together in series to make seamless strip lighting, without any further accessories
- Overall module efficiency up to 87 lm/W
- Compatible with LINEARlight LR21P, LR14A
- Low maintenance costs thanks to a lifetime of up to 50,000 hours

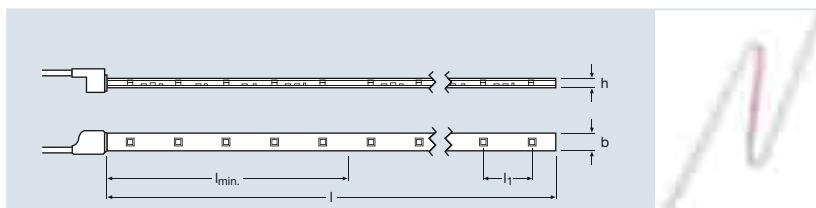

Applications

- Shelf lighting, cupboard lighting
- Background lighting

Accessories

- CONNECTsystem LR
- Mounting brackets LD-MB

1) Modules perfectly matched to 24 V OSRAM OPTOTRONIC® electronic control gear. For current photometric data and important safety, installation and application information go to www.osram.com/led-modules. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- IP6 protected flexible and cuttable LED strip with inline multichip RGB LEDs
- With pre-assembled feeder for simple connection

Product benefits

- High-performance silicon for extremely long life and flexibility
- Stylish design
- Highly UV-resistant
- Salt mist proof
- Uniform color changing

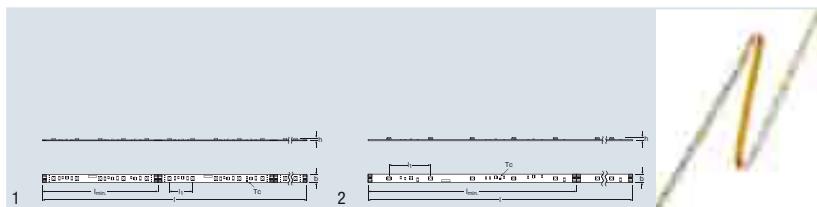

Applications

- Facade accent lighting
- Effect lighting in architecture
- Edge coupling
- Path lighting

Accessories

- IP67 protected CONNECTsystem LF-PROTECT for simple installation without soldering
- LINEARlight Track LT

For current photometric data and important safety, installation and application information go to www.osram.com/led-modules. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- Flexible and splittable LED strip with inline multichip RGB LEDs

Product benefits

- Uniform color changing with 3 chips in one package
- Toolless connection with the optional CONNECTsystem

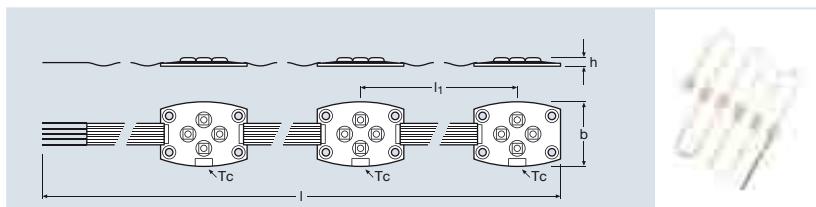

Applications

- Effect lighting in architecture
- For injecting light into transparent and dispersing materials
- Dynamic effects in public zones

Accessories

- CONNECTsystem LF for simple installation without soldering
- LINEARlight Track LT

DRAGONchain® Colormix RGBW

DC24B-RGBW ^{1) 3)}	625/525/467	1200 ²⁾	3000	500	39	6.2	6	

1) Modules perfectly matched to 24 V OSRAM OPTOTRONIC® electronic control gear. I For current photometric data and important safety, installation and application information go to www.osram.com/light-modules. 2) All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

2) Depending on color temperature. Specified maximum value.

3) The power supply used must be short-circuit-proof.

Product characteristics

- Flexible chain consisting of six LED modules each with four LEDs (red, green, blue, cold white)
- With protective coating (IPX5) for outdoor and high-humidity applications
- Electrically insulated back
- Simple fixing with M3 screws

Product benefits

- Dynamic color backlighting
- Broad color mixing palette, including pastel shades (in connection with light management systems)
- Extremely wide-angle optics for uniform backlighting of large surfaces
- Low maintenance costs thanks to a lifetime of up to 50,000 hours

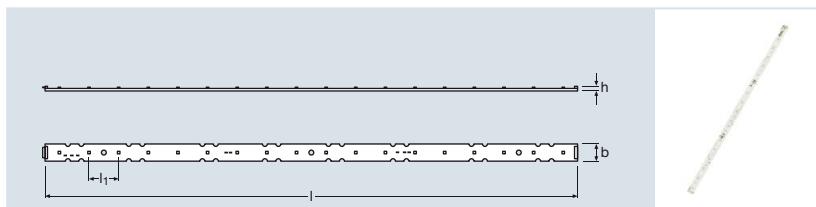

Applications

- Dynamic mood lighting
- Spa
- Shops, restaurants
- Trade fair lighting
- Alternative to colored fluorescent lamps

Accessories

- Heat sink DC24HS

¹⁾ Modules perfectly matched to 12V OSRAM OPTOTRONIC® electronic control gear. For current photometric data and important safety, installation and application information go to www.osram.com/signage. In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- Chain of 8 linear LED modules with 3 LEDs each, connected with flexible cable
- The maximum length of a chain is 3.60 m
- The modules are compatible with the BoxLED® mounting profile
- IP66 protection for the LED modules
- Four different OPTOTRONIC® 12 V units available

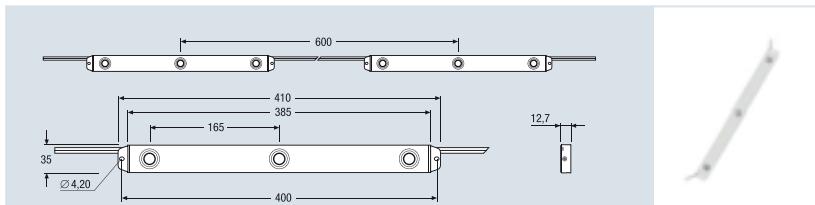

Product benefits

- Optimized elliptical lenses ensure uniform illumination through diffused reflection
- Several options for quick and simple mounting: bolting, adhesion, snap-in
- Special robust encapsulation for permanent outdoor use in enclosed light boxes
- Outstanding module efficiency
- Fully integrated heat sink
- Extremely long lifetime

Applications

- Signage (advertising and lettering)
- Backlighting of single-sided and double-sided light boxes (illumination from the side)
- Wallwashing and backlighting in general and architectural lighting

- Four different OPTOTRONIC® 12 V units available

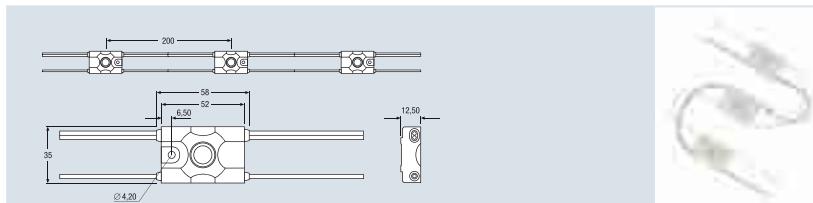

Product benefits

- Flat Ray technology ensures uniform illumination for large LED spacing
- Much better application efficiency compared with systems without lenses
- Several options for quick and simple mounting: bolting, adhesion, snap-in
- Special robust encapsulation for permanent outdoor use in enclosed light boxes
- Outstanding module efficiency
- Fully integrated heat sink
- Extremely long lifetime

Applications

- Signage (advertising and lettering)
- Backlighting of single-sided and double-sided light boxes (illumination from the back)

¹⁾ Modules perfectly matched to 12V OSRAM OPTOTRONIC® electronic control gear. For current photometric data and important safety, installation and application information go to www.osram.com/signage. In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- Chain of 48 LED modules with 1 LED each, connected with flexible cable
- The maximum length of a chain is 9.60 m
- The modules are compatible with the BoxLED® mounting profile
- IP66 protection for the LED modules
- Four different OPTOTRONIC® 12 V units available

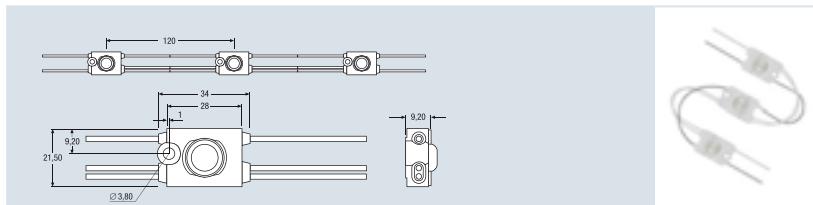

Product benefits

- Flat Ray technology ensures uniform illumination for large LED spacing
- Much better application efficiency compared with systems without lenses
- Several options for quick and simple mounting: bolting, adhesion, snap-in
- Special robust encapsulation for permanent outdoor use in enclosed light boxes or profile lettering
- Outstanding module efficiency
- Fully integrated heat sink
- Extremely long lifetime

Applications

- Signage (advertising and lettering)
- Backlighting of single-sided and double-sided light boxes (illumination from the back)
- Backlighting of large and/or deep profile lettering
- Indirect lighting and backlighting in general and architectural lighting

- Backlighting of small and/or low-profile lettering
- Indirect lighting and backlighting in general and architectural lighting

Mounting profile for BoxLED® and BackLED

Product reference

BX-MP¹⁾ 4008321981110

Product number

24

1) For current data and important safety, installation and application information see www.osram.com/signage.

Product characteristics

- Universal mounting profile for single-sided and double-sided light boxes
- Suitable for BoxLED® Side, BoxLED® Back and BackLED L
- Overall length 2365 mm – can be easily shortened to any length

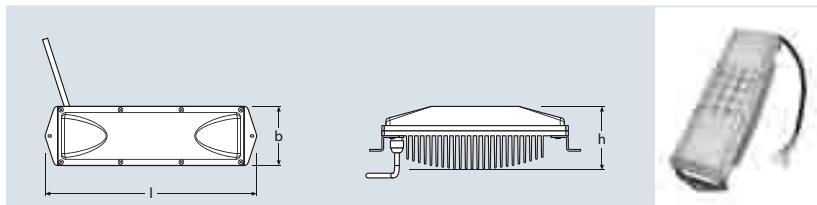

Product benefits

- Quick and simple mounting of the profile using self-tapping screws or blind rivets
- Click & Play Quick and simple snap-in fixing of the LED modules – no tools required
- Anodized aluminum profile: robust and corrosion-proof
- Integrated 55 mm mounting grid for simple positioning of the LED modules
- Integrated fixing option for cables

Applications

- Signage (advertising and lettering)
- Backlighting of single-sided and double-sided light boxes

1) For current photometric data and important safety, installation and application information see www.osram.com/streetlight. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- High optical efficiency of 92 %
- Integrated lens/reflector system with beam angles of 75° x 130°, 60° x 60° or 30° x 30°
- Choice of three color temperatures
- Type of protection IP66 to IEC 60529

Product benefits

- Rapid design-in because optics and heat sinks are included or completely encapsulated
- Constant-current control maximizes system efficiency
- Permissible input current 350-700 mA enables a balance to be made between system efficiency and costs
- Module design enables space-saving arrangement of multiple modules
- Simple replacement of the LED module by means of two M3 screws

Applications

- Technical and decorative street lighting
- Flood lighting
- High and low-bay lighting

In view of the complex manufacturing process for light emitting diodes, the typical values given above for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.
2) L version without base (spare part)

Product characteristics

- Integrated lens/reflector system with an 80° x 140° beam angle
- Choice of three color temperatures

Product benefits

- Rapid design-in as streetlighting optics are included
- Extremely simple replacement of the LED module – no tools required
- Uniform appropriately limited street lighting with no scattered light, in compliance with EN 13201
- Extremely compact dimensions – also fits in existing fixtures

Applications

- LED module for technical and decorative street lighting

The PrevaLED® light engine concept

What is the difference between a light engine and an LED module?

Compared to a normal LED module the light engine concept aims to keep certain parameters constant across several product generations. The most important parameters are as follows:

- Mechanical: The geometry and fixing points of the module remain constant
- Optical: The lumen packages and beam characteristics remain constant

The PrevaLED® light engine concept from OSRAM also includes the development of perfectly matched components. For each LED module there are dedicated control gear and connecting cables available.

PrevaLED® LED modules

PrevaLED® LED modules are available in different versions for different lumen outputs and color rendering.

OPTOTRONIC® control gear

OPTOTRONIC® units provide the basis for the optimum use of PrevaLED® LED modules.

Connecting cable

Used for correct polarity connection of the individual PrevaLED® LED modules with the control gear.

What are the benefits?

Light engines are powerful and highly efficient and offer enormous freedom for fixture designers. Thanks to defined interfaces they are the ideal platform for future-proof developments. On the one hand they reduce the complexity of the LED luminaires thanks to their constant parameters, and on the other hand their perfectly matched components ensure faultfree operation.

The geometry and luminous flux of the individual light engines remain constant, and advances in LED technology lead to improvements in the efficiency of the system or to cost reductions. A luminaire that has been designed on the basis of a particular light engine therefore automatically benefits from development progress without the need for any costly modifications to the basic design.

Background information: Standardization of LED light engines

The Zhaga consortium is an international cooperation of luminaire manufacturers, lamp manufacturers, producers of LED modules and suppliers in the lighting industry. The Zhaga consortium was set up to standardize LED light sources (LED light engines).

Interchangeability of LED light engines is achieved by defining the important parameters for the interfaces, while retaining freedom for further innovations in LED and driver technology. The Zhaga interface specifications cover the physical dimensions as well as the photometric, electrical and thermal properties of the different LED light engines.

The Zhaga consortium was established in February 2010 and now includes more than 160 companies. OSRAM AG is a full member. The members meet regularly in different regions of the world. Large parts of the new PrevaLED® Core portfolio cover the Zhaga Specification Book 3 for "Spot LED Light Engine with Separate Electronic Control Gear".

¹⁾ Modules perfectly matched to OSRAM OPTOTRONIC® electronic control gear (see relevant table). I For current photometric data and important safety, installation and application information go to www.osram.com/revealed. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the specified typical values for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

PrevalLED® Core light engines are offered as a system comprising perfectly matched standardized LED modules, ECGs and connecting cables.

Product characteristics

- Z2 types comply with the standards of the Zhaga consortium for spotlight modules with a diameter of 50 mm
- Z2 types have an extremely uniform luminance distribution (Zhaga Uniformity U >0.9)
- Light-emitting surface as per Zhaga Book 3: LES 9 for LEP-800, LES 19 for LEP-1500 and LEP-2000 and LES 23 for LEP-3000
- Available with lumen packages of 800 lm to 3000 lm in light colors from 2700 K to 4000 K
- Module efficiency of up to 101 lm/W, system efficiency incl. ECG and temperature losses up to 88 lm/W
- CRI > 90 for Z2 types
- Same dimensions for the light engine irrespective of the lumen package
- Use with OPTOTRONIC® OTp ECG
- Connection with prepared cable
- No UV radiation
- No heat (IR) emitted in the direction of the light
- Life of up to 50,000 hours (L70/B50) and 5-year system guarantee

Product benefits

- Fixed interfaces and dimensions provide the basis for future-proof designs with reduced fixture development costs
- Platform with fixed lumen packages enable the modules to be replaced at a later date
- Great freedom of design thanks to maximum optical performance and flexibility
- High quality of light with high CRI (>90 for Z2 types) at full system efficiency
- Optimized uniformity of light thanks to PreMix accessory (for HD types only)
- Reduction in UV-related and IR-related deterioration
- Enhanced safety thanks to hot restrike (the LED module is automatically switched back on by the ECG after a power outage)
- Reduced maintenance costs thanks to long life and system guarantee

Applications

- Ideal for spotlight applications in retail outlets
- Downlights in corridors and offices

¹⁾ Modules perfectly matched to OSRAM OPTOTRONIC® electronic control gear (see relevant table). I For current photometric data and important safety, installation and application information go to www.osram.com/prevalued. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the specified typical values for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

PrevalLED® Core light engines are offered as a system comprising perfectly matched standardized LED modules, ECGs and connecting cables.

Product characteristics

- Z2 types comply with the standards of the Zhaga consortium for spotlight modules with a diameter of 50 mm
- Z2 types have an extremely uniform luminance distribution (Zhaga Uniformity U > 0.9)
- Light-emitting surface as per Zhaga Book 3: LES 9 for LEP-800, LES 19 for LEP-1500 and LEP-2000 and LES 23 for LEP-3000, LEP-4000 and LEP-5000
- Available with lumen packages of 800 lm to 5000 lm in light colors from 2700 K to 4000 K
- Module efficiency of 72-108 lm/W, system efficiency incl. ECG and temperature losses up to 94 lm/W
- Use with OPTOTRONIC® OTp ECG
- Connection with prepared cable
- No UV radiation
- No heat (IR) emitted in the direction of the light
- Life of up to 50,000 hours (L70/B50) and 5-year system guarantee

Product benefits

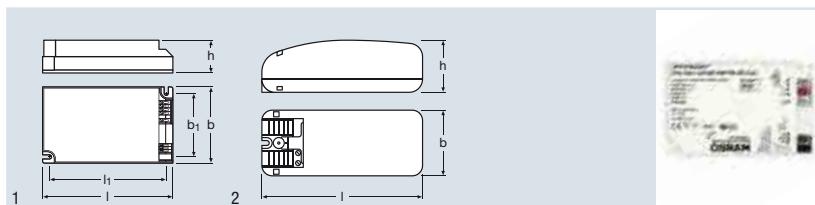

- Even more efficient fixtures can be developed for additional energy savings
- Simple interchangeability thanks to the same dimensions and constant lumen packages
- Wide variety of fixture designs thanks to a broad portfolio
- Smaller light emission surface and positioning close to the reflector enables better optical handling
- Level light emission surface and excellent uniformity thanks to CoB (Chip on Board) technology
- No diffuser (e.g. LEP PreMix) necessary
- Reduction in UV-related and IR-related deterioration
- Enhanced safety thanks to hot restrike (the LED module is automatically switched back on by the ECG after a power outage)
- Reduced maintenance costs thanks to long life and system guarantee

Applications

- Ideal for spotlight applications in retail outlets
- Downlights in corridors and offices

✗ Not possible

Cables

- In two lengths according to the fixture design
- Protected against reverse voltage
- Connects the individual PrevaLED® Core light engine to the power supply

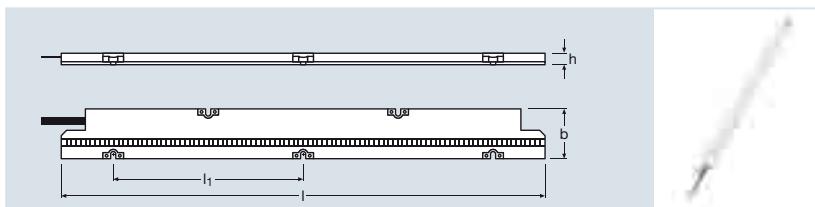

Cable clamp (optional)

- No need for external strain relief
- ECG with strain relief suitable for separate installation
- ECG is clicked in

LEP PreMix

- Tailored for HD types
- Diffuse interior and structured outer surface
- Durable glass construction
- No impact on module lifetime
- Optimized light homogeneity for reflector-based applications
- Reduces color fringes and multiple shadows
- Snap mounting in module locking ring
- Additional protection for the module against touching

¹⁾ Modules perfectly matched to OSRAM OPTOTRONIC® electronic control gear (see relevant table). ²⁾ For current photometric data and important safety, installation and application information go to www.osram.com/prevalled-linear. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the specified typical values for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

²⁾ Tolerance due to LED bin

Product characteristics

- SELV system
- Automatic detection of the number of LED modules
- OTp 40 L compatible with 2x2000 lm or 4x1000 lm modules
- Module cover with integrated reflector
- T_c = 65°C
- Lifetime (L80 B50): 50,000 h
- Accessories included (end cap, flexible bridge)

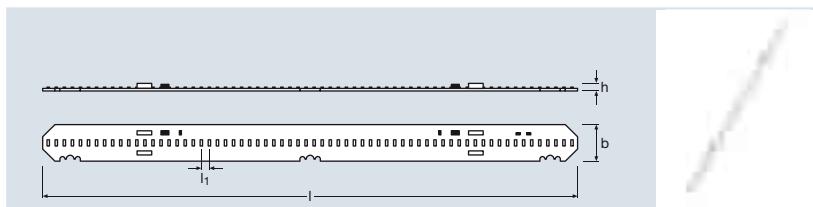

Product benefits

- Efficiency: up to 100 lm/W (system), up to 118 lm/W (module)
- Uniform distribution of light thanks to 3.7 mm LED pitches
- Consistent white light < 3 SDCM
- Seamless: no shadows between the modules
- Different mounting options for good thermal dissipation
- SELV concept for luminaires with high safety requests

Applications

- Industry (warehouses, stockrooms, retail outlets, etc.)
- Offices (corridors etc.)

1) Modules perfectly matched to OSRAM OPTOTRONIC® electronic control gear (see relevant table). For current photometric data and important safety, installation and application information go to www.osram.com/prevald-linear. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the specified typical values for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

2) Tolerance due to LED bin

Product characteristics

- Minimized geometry of the control gear thanks to non-SELV concept
- Automatic detection of the number of LED modules
- Otp 45 DALI LS compatible with 2x2000 lm, 5x1000 lm or 8x630 lm modules
- Module cover with integrated reflector
- T_c = 65°C
- Lifetime (L80 B50): 50,000 h
- AWG 20 IDC connectors for automatic wiring

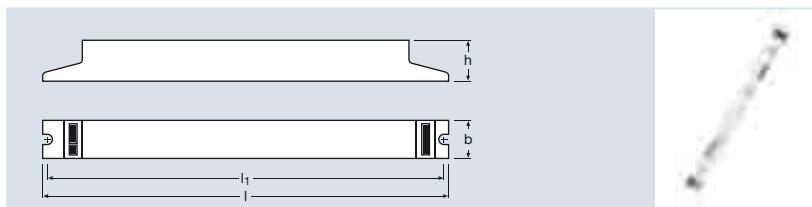

Benefits

- Efficiency: up to 100 lm/W (system), up to 118 lm/W (module)
- Uniform distribution of light thanks to 4.2 mm LED pitches
- Consistent white light < 3 SDCM
- Seamless: no shadows between the modules
- Compact control gear thanks to non-SELV system

Applications

- Offices (workplace lighting, corridors etc.)
- Industry (warehouses, stockrooms, retail outlets, etc.)

1) 1100 (even more compact dimensions), 8000 and 10,000 lm, 3000 K and color rendering >80 in preparation or on request

2) Module performance up to OSRAM OPTOTRONIC® electronic control gear (see relevant table). For current photometric data and important safety, installation and application information go to www.osram.com/prevaled. All the technical parameters apply to the entire module. In view of the complex manufacturing process for light emitting diodes, the specified typical values for the technical LED parameters are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values.

Product characteristics

- OSRAM is committed to comply with the Zhaga standard for the LED module above
- High lumen packages
- Highly efficient: up to 127 lm/W
- Extremely compact module with Lambertian distribution of light

Product benefits

- Lower update costs and shorter development times thanks to standardization
- Compact module design for a wide range of applications in a wide variety of luminaire concepts
- Small light emission surface and positioning close to the reflector enables better optical handling
- Enhanced safety thanks to hot restrike (the LED module is automatically switched back on by the ECG after a power outage)
- Dimmable, full instant light, hot restrike and long life open up new applications and reduce lifecycle costs
- No overheating when operated on an appropriate OSRAM ECG thanks to a temperature sensor in the module

Applications

- Outdoor lighting (streets, spotlights, etc.)
- Industrial lighting
- Uplighters

Four letters that signify the evolution of light

CDW-031, the first OLED series product on the market

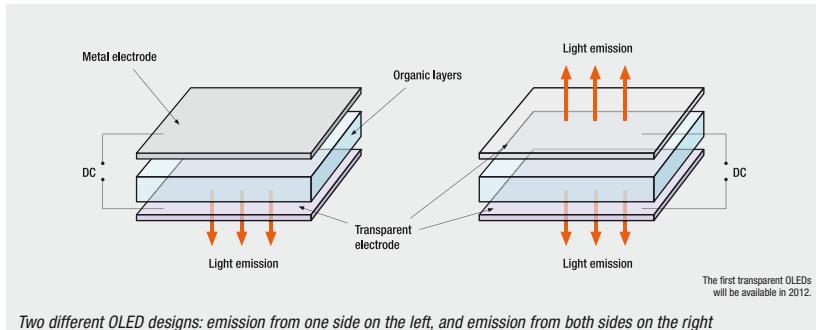

The organic light-emitting diode (OLED) is an innovation that will reshape the future of lighting. This is the opinion of experts and users alike. Thanks to this new technology, additional heat sinks, reflectors, lenses and prisms for interior lighting design will be elements of the past.

OLED components are only around 2 mm thick so they will give designers enormous freedom to create new design objects, high-end luminaires and high-quality furniture. Whether in diffuse or reflective versions, OLED light modules will provide the basis for unique aesthetic applications.

Structure of an OLED

An organic light-emitting diode consists of several organic semiconductor layers between two electrodes, at least one of which is transparent. The diagram shows two different types of OLEDs: a component emitting on one side only (left) and a transparent component emitting light both upwards and downwards (right). The manufacture of an OLED involves placing organic layers one after the other on a conducting substrate, followed by a conducting electrode. A widely used structure is based on a glass substrate coated with indium tin oxide (ITO) as the transparent anode and a thin non-translucent metal layer as the cathode. The organic stack including the electrodes is generally less than 1 µm thick.

Two different OLED designs: emission from one side on the left, and emission from both sides on the right

Outstanding properties of OLED technology

Because of its special properties, OLED technology offers many product benefits that have never before been possible in this combination. They include the following:

- They are glare-free uniform area light sources that have either a mirror-like or milky appearance when they are switched off.
- They are very thin and therefore extremely lightweight.
- They offer good color rendering and high-quality instant-on light.
- Their warm white light color creates a very pleasant atmosphere.
- They have the potential to match and even surpass the efficiency and lifetime of fluorescent lamps, and are completely mercury-free and RoHS compliant.
- They do not emit any UV or IR radiation and are therefore ideal for illuminating particularly sensitive objects.
- Future products based on OLED technology could be malleable or flexible.

Applications of OLED technology

Thanks to their aesthetic appearance and high-quality light, OLEDs are now being used above all in applications where design and atmosphere are the major factors. OLED light modules have already been used successfully in designer luminaires and in shop lighting. The technology is also perfect for all kinds of decorative and mood lighting, and for applications that call for embedded light in furniture and in the office, hospitality and museum lighting sectors.

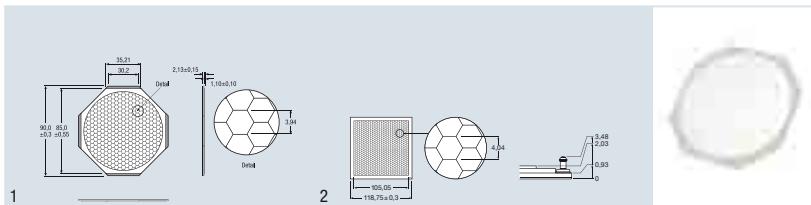

With ORBEOS, OSRAM has launched the world's first serial production OLED light source. As a leader in lighting innovation, and continuing to build on this technological success, the company's unique pilot production line and substantial investments in research and development will assure the advancement of OLED technology. OLED modules from OSRAM are a compelling way to provide light and will become a lasting element in lighting design for future generations.

OSRAM OLED Airabesc design luminaire, awarded with the reddot Product Design Award 2011 as well as the GOOD Design Award 2011 and the Interior Innovation Award 2012.

Product characteristics

- Diffuse, glare-free area light source
 - High luminous efficacy
 - Low DC voltage
 - Mercury-free and RoHS compliant

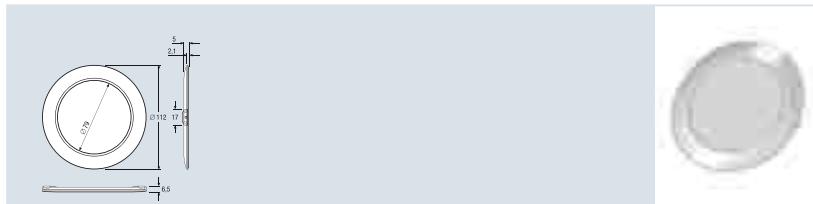

Product benefits

- High-quality warm white light for high-end applications
 - Thin, lightweight and aesthetic design
 - Ideal for filigree lighting applications as additional thermal management is not required

Applications

- Object illumination and integration in furniture
 - Mood lighting
 - Shop lighting
 - Architainment

Product characteristics

- Glare-free warm white area light source with a reflective surface
- Stylish low-profile design in a round form with high-quality synthetic ring with metallic look
- Mercury-free and RoHS compliant

Product benefits

- Plug-&-play installation and easy replacement possible
- Rotatable installation enables complex designs
- High-quality ambient lighting thanks to high-quality light and good color rendering
- No UV or IR radiation, therefore ideal for illuminating sensitive items

Applications

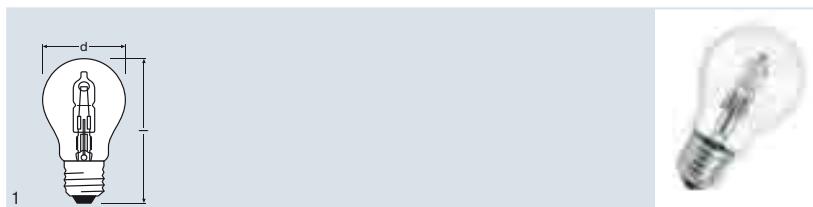

- Home applications in designer luminaires, furniture and home accessories
- Eye catcher, design element and mood light for shops
- Can be used in the office sector as desk lights, for reception counters and as desktop accessories

NEW

The permitted incandescent lamp with natural pleasant halogen light – It looks like a classic light bulb, and with its screw base is just as easy to use. HALOGEN ECO PRO CLASSIC A lamps are direct replacements for traditional light bulb wattages; for example a 46W HALOGEN ECO PRO CLASSIC A replaces a 60W incandescent lamp.

Product characteristics

- 100 % dimmable
- Perfect color rendering (R_a : 100)
- Average life: 2,000 h

Product benefits

- Simple direct replacement for conventional incandescent lamps
- The same pleasant quality of light as that of an incandescent lamp
- Instant 100 % light, no warm-up time
- Contains no mercury, can be thrown away with normal household waste
- UV filter

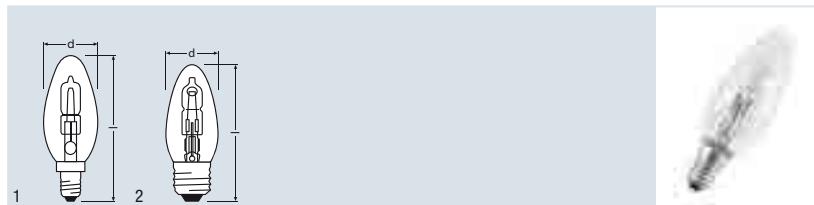

Applications

- General illumination
- Mood lighting
- Entrance lighting
- Restaurants, hotels and similar prestige applications

1) Do not use outdoors or in humid conditions.

Energy-saving halogen light without a transformer – HALOPAR® 16 ECO lamps from OSRAM are innovative halogen reflector lamps for line voltage. These lamps are ideal for modern small and stylish halogen fixtures and are the counterparts of DECOSTAR® low-voltage reflector lamps.

Product characteristics

- Average life: 2,000 h
- Dimmable
- Color rendering index R_a: 100
- Base: GU10

Product benefits

- The same light as conventional HALOGEN reflector lamps but with up to 20 % lower power consumption
- Brilliant ECO accent lighting
- With whole glass reflector for brilliant lighting effects
- Approved for use in open fixtures to IEC 60598-1
- Robust filament design thanks to innovative, unique bulb pinch technology
- No transformer required
- UV filter
- Drastically reduced thermal load in the fixture thanks to an aluminum-coated reflector
- Complies with IEC 60432-2 thanks to integrated fuse function
- Contains no mercury, can be thrown away with normal household waste

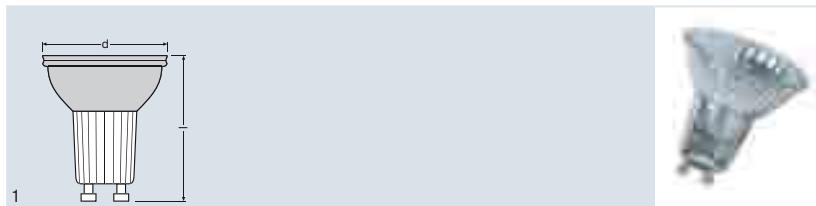

Applications

- General illumination
- Kitchen lighting
- Dining table lighting
- Mirror lighting
- Object lighting
- Shops
- Restaurants, hotels and similar prestige applications

1) Do not use outdoors or in humid conditions.

Halogen light without a transformer – HALOPAR® 16 from OSRAM gives fixture manufacturers a lamp that drastically reduces construction costs for dichroic reflector fixtures.

Product characteristics

- Average life: 2,000 h
- 100 % dimmable
- Color rendering index R_a : 100
- Base: GU10, GZ10

Product benefits

- Brilliant accent light
- With whole glass reflector for brilliant lighting effects
- Approved for use in open fixtures to IEC 60598-1
- No transformer required
- UV filter
- Innovative bulb pinch technology for the burner
- Complies with IEC 60432-2 thanks to integrated fuse function
- Contains no mercury, can be thrown away with normal household waste

Applications

- General illumination
- Shops
- Restaurants, hotels and similar prestige applications

The slim lamp for small fixtures – The HALOLUX CERAM® ECO lamp with an E27 base or a B15d base has been designed specifically for small fixtures. This brilliant alternative to standard incandescent lamps is suitable for small narrow fixtures thanks to its compact cylindrical shape.

Product characteristics

- 100 % dimmable
- Average life: 2,000 h

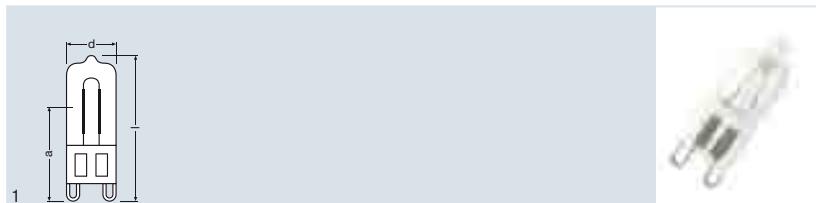

Product benefits

- More compact than standard incandescent lamps
- The same pleasant quality of light as that of an incandescent lamp
- No transformer required
- UV filter
- Contains no mercury, can be thrown away with normal household waste

Applications

- General illumination
- Mood lighting
- Dining table lighting
- Light for reading
- Restaurants, hotels and similar prestige applications

1) Available in Energy Label C from June 2012

NEW

Our tiny ECO-warrior for line voltage – HALOPIN® from OSRAM has heralded a new modern generation of fixtures in terms of miniaturization and therefore set a standard that lamp and fixture manufacturers throughout the world are still using.

Product characteristics

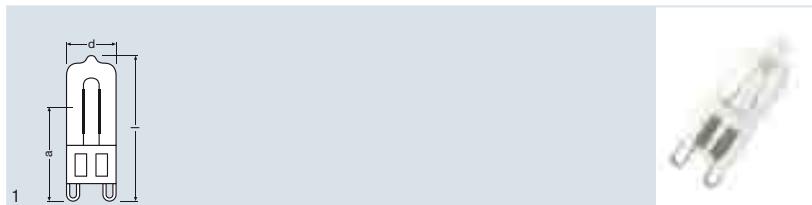

- Average life: 2,000 h
- Dimmable
- Color rendering index Ra: 100
- Design: two lengths 43 mm (short), 51 mm (long)
- Base: G9

Product benefits

- Brilliant ECO accent lighting
- Incredibly small dimensions for revolutionary new fixture designs
- Robust filament design thanks to innovative, unique bulb pinch technology
- Approved for use in open fixtures to IEC 60598-1
- Simple handling thanks to G9 plug-in base/holder system
- No transformer required
- UV filter
- Complies with IEC 60432-2 thanks to integrated fuse function
- Lower thermal output (compared with the standard reference product) opens up new design options
- The lamp shuts down reliably
- Contains no mercury, can be thrown away with normal household waste

Applications

- General illumination
- Workplace lighting
- Light for reading
- Dining table lighting
- Mirror lighting
- Accent lighting
- Mood lighting

1) Banned from 1.9.2012 as per EU phase-out plan

Our small lamps for line voltage – OSRAM HALOPIN® lamps are ideal for tiny compact halogen fixtures. Because they are so small and because there is no transformer to incorporate in the fixture, they give designers greater freedom.

Product characteristics

- Average life: 2,000 h
- Dimmable
- Color rendering index Ra: 100
- Design: two lengths 43 mm (short), 51 mm (long)
- Base: G9
- Color temperature: 2,700 K

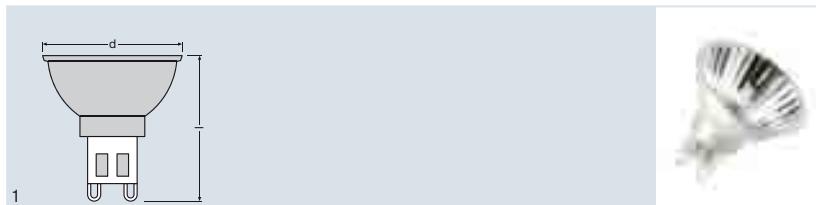

Product benefits

- Brilliant accent light
- Incredibly small dimensions for revolutionary new fixture designs

¹⁾ Fuse protection with the indicated values is recommended on the fixture side (as per IEC 60357, EN 60357) | Enclosed fixtures must be used for both indoor and outdoor applications.

HALOLINE® ECO from OSRAM is the classic lamp for small outdoor systems for floodlighting buildings and sports arenas and for security lighting. It is also experiencing a renaissance in the home.

Product characteristics

- Average life: 2,000 h
- Dimmable
- Color rendering index R_a: 100
- Base: R7s

Product benefits

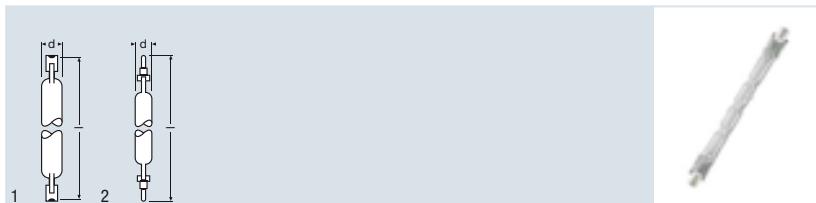

- Brilliant ECO accent lighting
- Direct replacement for standard halogen lamps
- Significantly lower CO₂ emissions
- Lower thermal output (compared with the standard reference product)
- Ideal for emphasizing and accentuating the structure of a room
- No transformer required
- Contains no mercury, can be thrown away with normal household waste

Applications

- General illumination
- Entrance lighting
- Path lighting
- Garden lighting
- Drive-over applications
- Shops
- Restaurants, hotels and similar prestige applications
- Offices, public buildings

A lighting design star – Paving the way for new fixture designs: HALOSTAR STARLITE® from OSRAM. With free-burning halogen lamps and their bright pools of light it is possible to provide accent lighting for entire rooms.

Product characteristics

- Average life: 4,000 h
- 100 % dimmable
- Base: G4, GY6.35
- Color rendering index R_a: 100

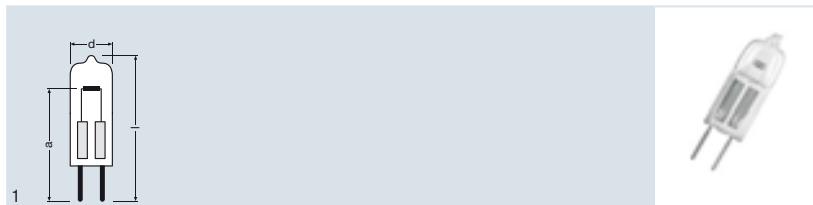

Product benefits

- Brilliant accent light
- Incredibly small dimensions for revolutionary new fixture designs
- Approved for use in open fixtures to IEC 60598-1
- Axial filament for optimum directional light
- Special pins for corrosion protection
- UV filter
- Contains no mercury, can be thrown away with normal household waste

Applications

- General illumination
- Entrance lighting
- Accent lighting
- Light for reading
- Garden lighting
- Shops
- Restaurants, hotels and similar prestige applications
- Offices, public buildings

Product characteristics

- Average life: 2,000 h
- 100 % dimmable
- Color rendering index R_a: 100
- Base: G4, GY6.35

Product benefits

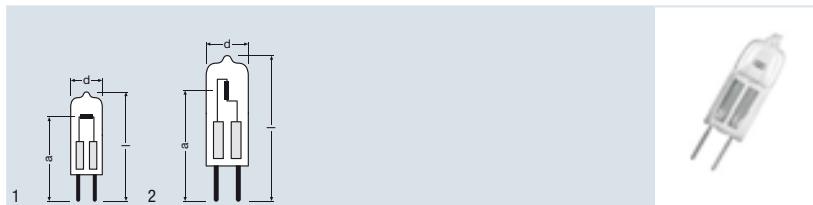

- Brilliant accent light
- Incredibly small dimensions for revolutionary new fixture designs
- Approved for use in open fixtures to IEC 60598-1
- UV filter
- Contains no mercury, can be thrown away with normal household waste

Applications

- General illumination
- Kitchen lighting
- Mirror lighting
- Light for reading
- Entrance lighting
- Shops
- Restaurants, hotels and similar prestige applications
- Offices, public buildings

HALOSTAR® 24 V

Product reference	Product number	W	V	lm	t [h]		d (mm)	I (mm)		No.

1) A quick-acting cutout must be used according to EN 60432-2 | The lamp should be operated only in enclosed fixtures

Product benefits

- The base pins are tempered to protect against corrosion
- Axial filament ensures optimum directional light
- High illuminance level
- Contains no mercury, can be thrown away with normal household waste

¹⁾ If plug connections are used additional support is needed on the edge of the reflector.

The power pack among the HALOGEN ECO reflector lamps – Beauty is there to be seen and admired. The HALOSPOT® 111 ECO halogen lamp produces more light than conventional HALOGEN lamps. Its precision-engineered shape and high-reflectance synthetic reflector illuminate objects and entire rooms and with powerful light.

Product characteristics

- Average life: 4,000 h
- 100 % dimmable
- Color rendering index R_a: 100
- Base: G53

Product benefits

- Up to 30 % energy savings through IRC technology compared with conventional HALOGEN lamps
- Brilliant ECO accent lighting
- Significantly lower CO₂ emissions due to energy savings
- Cap for reduced glare and ease of handling
- New high-tech reflector for optimum illumination and reduced scatter
- Approved for use in open fixtures to IEC 60598-1
- UV filter
- Drastically reduced thermal load in the fixture thanks to an aluminum-coated reflector
- Contains no mercury, can be thrown away with normal household waste

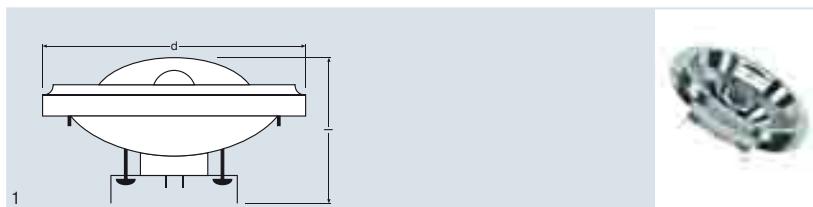

Applications

- General illumination
- Entrance lighting
- Shops
- Restaurants, hotels and similar prestige applications
- Offices, public buildings

1) If plug connections are used additional support is needed on the edge of the reflector.

For strong accent lighting – Are you looking to highlight objects even in very bright surroundings? With HALOSPOT® 111 from OSRAM that's not a problem. This halogen lamp with its large aluminum reflector provides optimum illumination and very little scattered light.

Product characteristics

- Average life: 3,000 h
- 100 % dimmable
- Base: G53
- Color rendering index R_a: 100

Product benefits

- Brilliant accent light
- Cap for reduced glare and ease of handling
- Burner with axial filament for optimum distribution of light
- Approved for use in open fixtures to IEC 60598-1
- UV filter
- Drastically reduced thermal load in the fixture thanks to an aluminum-coated reflector
- Contains no mercury, can be thrown away with normal household waste

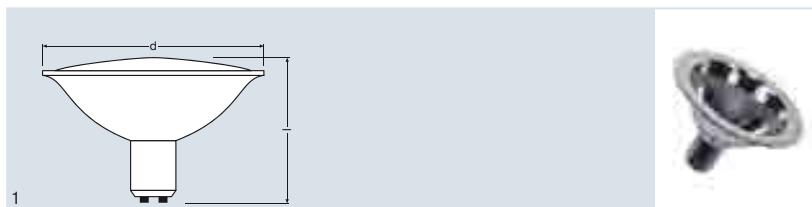

Applications

- General illumination
- Shops
- Restaurants, hotels and similar prestige applications
- Offices, public buildings
- Entrance lighting

High-quality light with impressive energy savings – The DECOSTAR® 51 ECO halogen lamp combines economy and brightness with superb quality.

Product characteristics

- Average life: 5,000 h
- Dimmable
- Color rendering index Ra: 100
- Base: GU5.3

Product benefits

- Up to 30 % energy savings through IRC technology compared with conventional HALOGEN lamps
- Brilliant ECO accent lighting
- Significantly lower CO₂ emissions due to energy savings
- Constant luminous intensity and constant color location throughout their life
- Approved for use in open fixtures to IEC 60598-1
- UV filter
- Contains no mercury, can be thrown away with normal household waste

Applications

- General illumination
- Kitchen lighting
- Dining table lighting
- Mirror lighting
- Workplace lighting
- Shops
- Restaurants, hotels and similar prestige applications

DECOSTAR® 51 ALU

Product reference	Product number	W	V	cd	Δ	GU	Ø d [mm]	I [mm]	K	lamps	No.
41861 WFL	4050300428819	20	12	510	36	GU5.3	50.7	46	2800	20	1
41866 WFL	4050300428833	35	12	1100	36	GU5.3	50.7	46	2900	20	1
41871 WFL	4050300428857	50	12	1800	36	GU5.3	50.7	46	3000	20	1

The problem solver for heat build-up – The “classic” dichroic reflector lamp is patently unsuitable in a recessed ceiling fixture because ½ of the heat it radiates is directed backwards. High temperatures can jeopardize the reliability of the entire lighting system. The solution is the DECOSTAR® 51 ALU from OSRAM.

Product characteristics

- Average life: 2,000 h
- Dimmable
- Base: GU5.3
- Color rendering index R_a: 100

Product benefits

- Brilliant accent light
- No light can escape at the back of the reflector
- 100% constant quality of light throughout the life of the lamp
- Approved for use in open fixtures to IEC 60598-1
- UV filter
- The aluminum-coated reflector without a shield reduces the thermal load in the fixture
- Reduced thermal load: ~60% compared with aluminum-coated reflectors with a shield
- Reduced thermal load: ~80% compared with dichroic reflectors with a shield
- Contains no mercury, can be thrown away with normal household waste

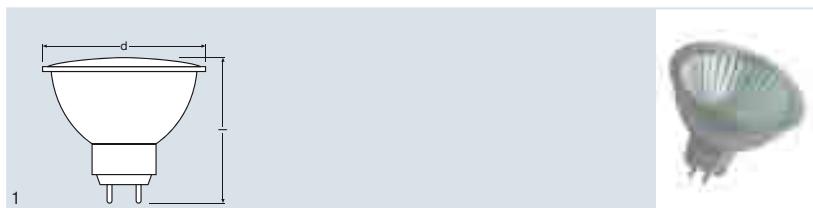

Applications

- General illumination
- Shops
- Restaurants, hotels and similar prestige applications
- Offices, public buildings

46871 WFL	4050300816661	50	12	1200	36	4000	GU5.3	50.7	46	20	1

When cool light is needed – In shops selling jewellery, glassware or ceramic goods or in art galleries – in fact wherever cold light colors are needed – DECOSTAR® 51 COOL BLUE® from OSRAM is the right choice. This innovative dichroic reflector lamp is also perfect for rooms with a minimalist look or objects with metallic flair.

Product characteristics

- Average life: 4,000 h
- 100 % dimmable
- Color rendering index Ra: 95
- Color temperature: 4,500 K
- Base: GU5.3

Product benefits

- Brilliant accent light
- Dichroic reflector reduces the heat in the light beam by up to 66 %
- Approved for use in open fixtures to IEC 60598-1
- UV filter
- Contains no mercury, can be thrown away with normal household waste

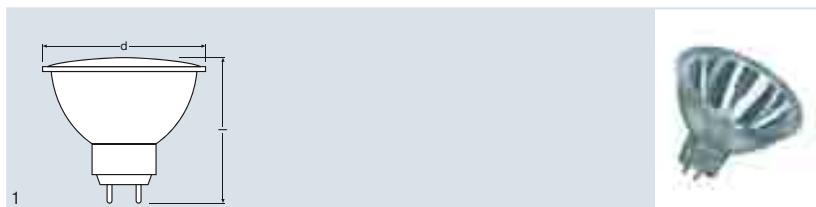

Applications

- General illumination
- Shops
- Hotels, restaurants, facility management
- Offices, public buildings

Light is not always the same – When it comes to illuminating heat-sensitive objects the DECOSTAR® 51S dichroic reflector lamp is the right choice because most of the heat produced by the lamp is emitted through the rear of the reflector. This reduces the heat in the light beam by up to 66%. Present sensitive objects in the right light is therefore no problem at all.

Product characteristics

- Average life: 2,000 h
- Dimmable
- Color rendering index R_a : 100
- Base: GU5.3

Product benefits

- Brilliant accent light
- Dichroic reflector reduces the heat in the light beam by up to 66 %
- Approved for use in open fixtures to IEC 60598-1
- UV filter
- Contains no mercury, can be thrown away with normal household waste

Applications

- General illumination
- Entrance lighting
- Workplace lighting
- Kitchen lighting
- Mirror lighting
- Object lighting

The lamp that stays cool – Every professional knows that light is not always the same when it comes to illuminating heat-sensitive objects. In this case the shieldless DECOSTAR® 51 dichroic reflector lamp is the right choice because most of the heat produced by the lamp is emitted through the rear of the reflector.

Product characteristics

- Average life: 2,000 h
- Dimmable
- Color rendering index R_a : 100
- Base: GU5.3

Product benefits

- Brilliant accent light
- Dichroic reflector reduces the heat in the light beam by up to 66 %
- Low-pressure burner for use in open fixtures to IEC 60432-3
- UV filter
- Contains no mercury, can be thrown away with normal household waste

Applications

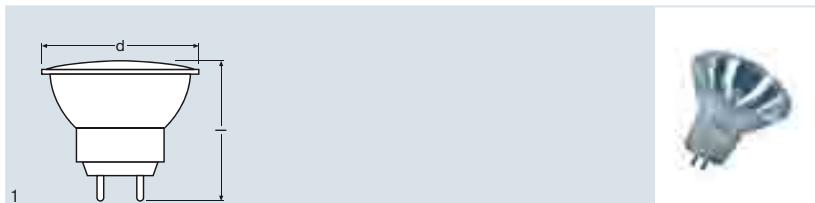

- General illumination
- Workplace lighting
- Kitchen lighting
- Mirror lighting
- Object lighting
- Shops
- Restaurants, hotels and similar prestige applications

64862 T ECO	4050300331638	60	230	820	2800	E14	26	80	55	15	1

The complete package – The special HALOLUX® T ECO lamp with its clear and simple cylindrical shape is the compact halogen alternative to conventional incandescent lamps for special applications.

Product characteristics

- Average life: 2,000 h
- 100 % dimmable

Product benefits

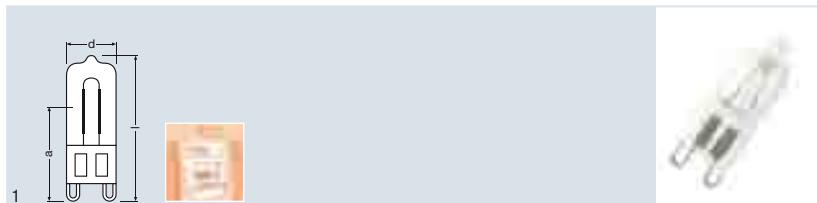

- Compact dimensions
- UV filter
- Contains no mercury, can be thrown away with normal household waste

Applications

- Domestic refrigerators

HALOPIN® oven lighting

1) Lamps are suitable for pyrolysis (lamps must be switched off. Max. ambient temperature 450 °C) | Use only in enclosed fixtures.

2) Average life at room temperature, higher temperatures may shorten the average life

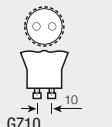

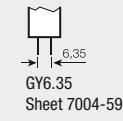

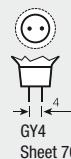

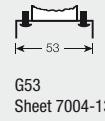

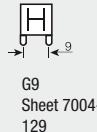

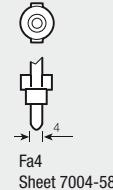

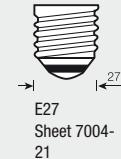

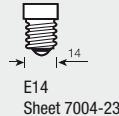

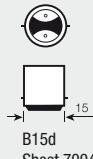

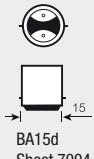

Product benefits

- Two to three times the luminous efficacy of conventional oven lighting
- Optimum halogen content for high temperatures
- Tempered pins for reliable contact at high temperatures
- Suitable for pyrolysis (permissible ambient temperature 450 °C)
- Contains no mercury, can be thrown away with normal household waste

Applications

- Ovens

Bases IEC/EN 60061-1

Note:

Operate halogen lamps for outdoor applications and damp locations only in fixtures approved for the purpose.

All the line voltage halogen lamps shown are rated for the European line voltage of 230 V.

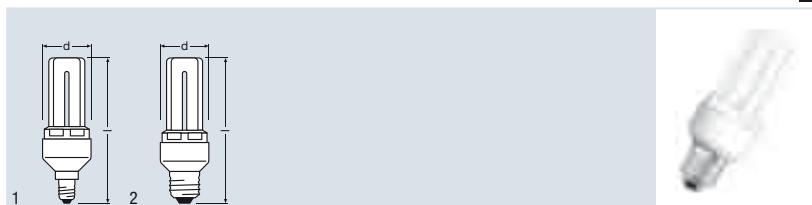

Other types are available on request

For an extended range for non-EU countries go to www.osram.com

1) Also available in LUMILUX® Warm White (827) and Cool White (840) on request | Already complies with Stage 5 of the eco-design requirements of directive (EC) 244/2009
 2) Also available in LUMILUX® Warm White (827) and Cool White (840) on request | Also available with a B22d base on request | Already complies with Stage 5 of the eco-design requirements of directive (EC) 244/2009

OSRAM DULUX® INTELLIGENT FACILITY – Heavy duty lamp for demanding customers

Product characteristics

- Extremely high number of switching cycles: > 1,000,000
- Extremely long average life: 20,000 h (20 years at 2.7 h per day)
- Quick Light: 60% luminous flux in ≤20 s
- Warm Comfort Light – energy-saving light similar to that of an incandescent lamp
- Can be used in Direct Current systems: 176...310 V DC
- Very broad ambient temperature range: -30 to +50°C
- Already complies to ecodesign requirements of EC 244/2009 regulation stage 5

Product benefits

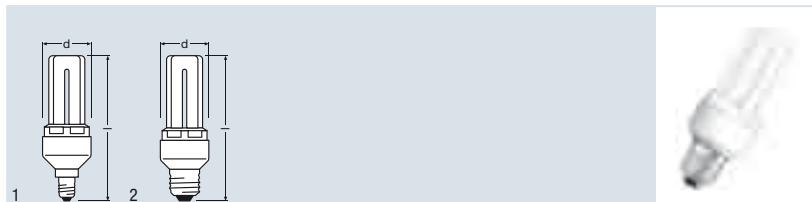

- Extremely durable due to extremely high switching resistance
- Much longer relamping intervals
- Variable use at Direct Current and Alternating Current
- Extremely fast lumen ramp-up thanks to Quick Light Technology

Applications

- Where the lamps need to last a long time or have to withstand frequent on/off switching
- Installations with automatic switch-off (e.g. in stairwells)
- Emergency lighting
- Hard-to-reach holders
- Wherever light is required quickly
- Hotels, restaurants, facility management
- Outdoor use in enclosed and ventilated luminaires only

Safety information

In the event of a breakage: www.osram.com/brokenlamps
 Not suitable for use with external dimmers or electronic switches.

OSRAM DULUX® INTELLIGENTONGLIFE – Durable Lighting

Product characteristics

- Extremely long average lifetime: 20,000 h (20 years at 2.7 h per day)
- Very high number of switching cycles: 500,000
- Quick Light: 60 % light output in ≤20 s
- Warm Comfort Light – energy-saving light similar to that of an incandescent lamp
- Very broad ambient temperature range: -30 to +50°C (7 W: -20 to +50°C)

Product benefits

- Very durable, due to high switching resistance
- Much longer relamping intervals
- Flicker-free starting and flicker-free operation
- Extremely fast lumen ramp-up thanks to Quick Light Technology

Applications

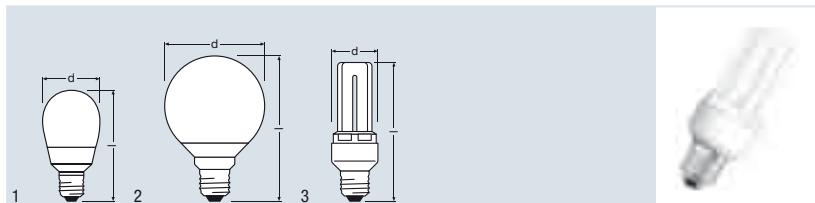

- Hotels, restaurants, facility management
- Hard-to-reach holders
- General illumination
- Wherever light is required quickly
- Outdoor use in enclosed and ventilated luminaires only

1) LEDOTRON classic shape planned to be available from fall 2012.

2) Already complies with Stage 5 of the eco-design requirements of directive (EC) 244/2009

3) Photometric data subject to change without notice

OSRAM DULUX® INTELLIGENT LEDOTRON – The next generation of dimming

Product characteristics

- LEDOTRON chip
- Quick Light: 60% light output in ≤ 20 s (LEDOTRON Stick version)
- Warm Comfort Light – energy-saving light similar to that of an incandescent lamp
- Good quality of light; color rendering index $R_a: \geq 80$; constant chromaticity

Product benefits

- Comfortable, digital dimming with LEDOTRON technology
- Creation of the preferred light ambience
- Switching possible at every dimming level
- Energy savings and dimming at the same time

Applications

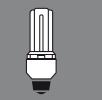

- Rooms in which different light levels are to be created
- Outdoor use in enclosed and ventilated luminaires only
- Wherever light is required quickly
- Hard-to-reach holders
- General illumination

Technical equipment

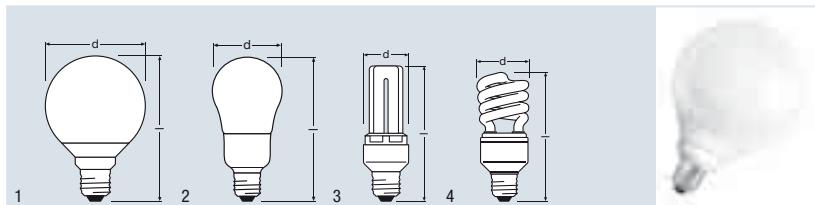

- Suitable for dimming with LEDOTRON control devices only

OSRAM DULUX® INTELLIGENT DIM – Turn it on, and dim it down

Product characteristics

- Infinitely variable dimming (from 100 to 7%) with leading edge phase dimmers
- Dimmable compact fluorescent lamps in Stick, Twist, Globe and Classic shapes
- Quick Light: 60% light output in ≤20 s (DIM Globe, DIM Stick and DIM Twist)
- Warm Comfort Light – energy-saving light similar to that of an incandescent lamp
- Good quality of light; color rendering index $R_a \geq 80$; constant chromaticity

Product benefits

- Creation of the preferred light ambience
- Greatest light color variation among energy-saving products
- Energy savings and dimming at the same time
- Various lamp shapes available to fit all luminaires

Applications

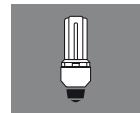

- Rooms in which different light levels are to be created
- Dimmable installations
- General illumination
- For indoor lighting only

OSRAM DULUX® INTELLIGENT HIGH EFFICIENCY – Efficiency which will impress

Product characteristics

- Luminous efficacy: $\geq 70 \text{ lm/W}$
- Available in 3 light colors: 825, 827 and 840
- Quick Light: 60% light output in $\leq 30 \text{ s}$ (Twist version)
- Warm Comfort Light – warm energy-saving light similar to that of an incandescent lamp
- Good quality of light; color rendering index $R_a: \geq 80$; constant chromaticity

Product benefits

- Excellent price/performance ratio
- Improved efficiency: More light for the same wattage
- Fast return on investment
- Various lamp shapes available to fit all luminaires

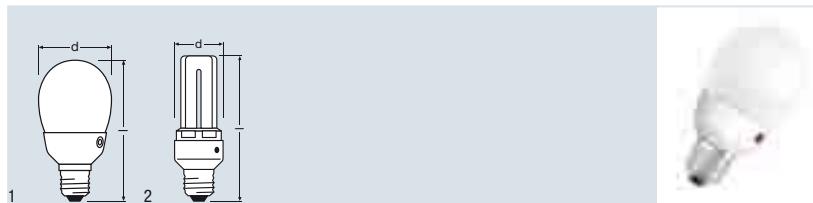

Applications

- General illumination
- Hospitality
- Hotels, restaurants
- Wherever compact, efficient lamps are needed
- Hard-to-reach holders

OSRAM DULUX® INTELLIGENT SENSOR – Welcome the night with light

Product characteristics

- Warm Comfort Light - energy-saving light similar to that of an incandescent lamp
- Available in tubular and classic designs
- Available in 2 light colors: 825 and 827
- Good quality of light; color rendering index R_a: ≥80; constant chromaticity

Product benefits

- Energy-saving lighting solution because of automatic switch-off at day-light
- Automatically switches on at dusk and off again at dawn
- Intelligent microprocessor technology
- Unaffected by interference light
- Low maintenance effort
- Light sensors detect daylight on the basis of the spectral distribution

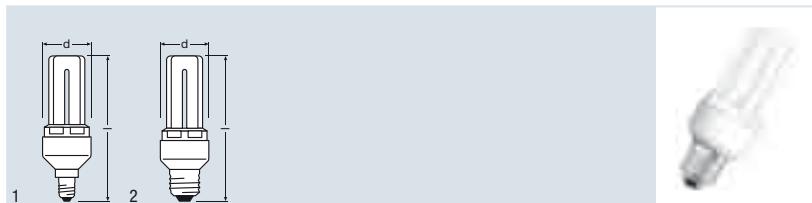

Applications

- Wherever constant lighting is necessary at night
- Outdoor applications only
- Outdoor use in enclosed and ventilated luminaires only

2) Also available in LUMILUX® Cool White (840) on request

OSRAM DULUX® PRO STICK – Great performance for reasonable expense

Product characteristics

- Quick Light: 60% light output in ≤30 s
- Warm Comfort Light – energy-saving light similar to that of an incandescent lamp
- Good quality of light; color rendering index $R_a \geq 80$; constant chromaticity

Product benefits

- Excellent price/performance ratio
- Extremely fast lumen ramp-up thanks to Quick Light Technology
- Fast return on investment
- Great variety of light colors

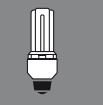

Applications

- High-quality domestic and professional environments
- Wherever light is required quickly
- General illumination
- Outdoor use in enclosed and ventilated luminaires only

OSRAM DULUX® PRO MICRO TWIST – A beautiful twist

Product characteristics

- Quick Light: 60% light output in ≤ 30 s
- Warm Comfort Light – energy-saving light similar to that of an incandescent lamp
- Good quality of light; color rendering index $R_a: \geq 80$; constant chromaticity

Product benefits

- Extremely small dimensions
- Very compact CFLi shape with high efficiency
- Extremely fast lumen ramp-up thanks to Quick Light Technology
- Low maintenance effort
- High efficiency: more light for the same wattage
- Higher luminous efficacy
- Fast return on investment

Applications

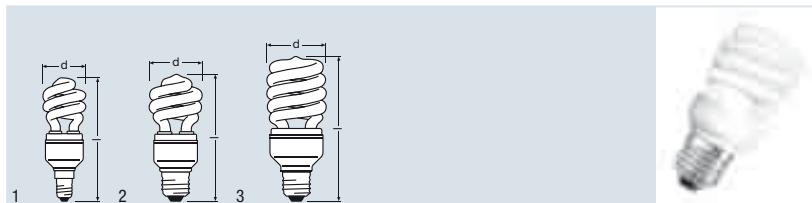

- Wherever compact, efficient lamps are needed
- High-quality domestic and professional applications
- General illumination
- Wherever light is required quickly
- Outdoor use in enclosed and ventilated luminaires only

OSRAM DULUX® PRO CIRCOLUX – The well-rounded solution

Product characteristics

- Very long average lifetime: 15,000 h (15 years at 2.7 h per day)
- Quick Light: 60% light output in ≤20 s
- Good quality of light; color rendering index R_a: ≥80; constant chromaticity

Product benefits

- Excellent luminous flux
- Ideal distribution of light for general illumination
- Low weight and low profile
- Attractive lamp appearance
- Extremely fast lumen ramp-up thanks to Quick Light Technology
- Fast return on investment

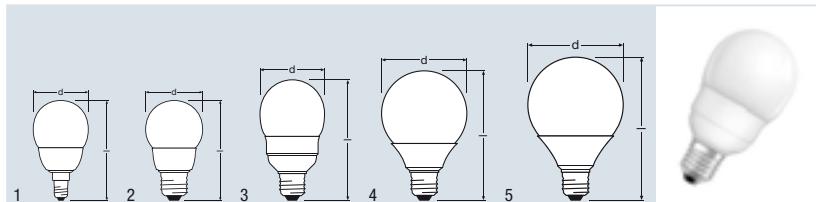

Applications

- High-quality domestic and professional environments
- Large shaded and pendant luminaires
- Low-profile wall and ceiling luminaires
- Hard-to-reach holders
- General illumination
- Wherever light is required quickly
- Outdoor use in enclosed and ventilated luminaires only

Thanks to its impressive properties and compact design, the OSRAM DULUX® T PLUS can be used in a wide range of traditional fixtures and downlights with small mounting depths (CCG operation).

Product benefits

- Extremely economical
- Good quality of light
- Excellent luminous flux
- Long service life*

Product characteristics

- Average life: 10,000 hours
- Good color rendering index 1B (R_a 80-89)
- Good maintenance
- Short and compact pin-base lamps with triple-turn tubes
- Single-ended two-pin plug-in GX24d base
- Suitable for operation on conventional control gear
- OSRAM DULUX® T 18 W PLUS lamps are suitable only for operating with 0.22 A control gear

Applications

- Public buildings
- Shops
- Supermarkets and department stores
- Hotels and restaurants
- Industry

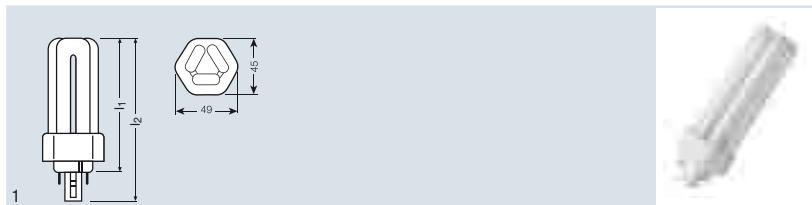

Safety information

In the event of a breakage: www.osram.com/brokenlamps

References

- * Service life is defined as the time when 70% of the system luminous flux is still available.

OSRAM DULUX® T/E PLUS – an energy-saving compact fluorescent lamp that is at home both indoors and outdoors. It has been optimized for indoor lighting and is therefore ideal for small unconventional fixtures and downlights with small mounting depths and for new lighting systems.

Product benefits

- Extremely economical
- Good quality of light
- Excellent luminous flux
- Long service life*
- OSRAM System[®] Guarantee in combination with OSRAM QUICKTRONIC[®] ECG

Product characteristics

- Improved average life: up to 20,000 h (with QUICKTRONIC[®])
- Good color rendering index 1B (R_a 80-89)
- Improved maintenance
- Dimmable from 100 % to 3 %
- Short and compact pin-base lamps with triple-turn tubes
- Single-ended 4-pin plug-in GX24q base with shortened base casing
- Suitable for operation on electronic control gear

Applications

- Public buildings
- Offices
- Shops
- Supermarkets and department stores
- Hotels and restaurants
- Industry

1) On request

OSRAM DULUX® T/E CONSTANT lamps offer constant high luminous flux over a wide range of temperatures.

Product benefits

- Extremely economical
- Excellent luminous flux at high and low ambient temperatures
- Good quality of light
- Long service life*

Product characteristics

- Improved average life: up to 20,000 h (with QUICKTRONIC®)
- Good color rendering index 1B (R_a 80-89)
- Luminous flux greater than 90% at ambient temperatures between +10°C and +70°C
- Improved maintenance
- Dimmable from 100 % to 3 %
- Short and compact pin-base lamps with triple-turn tubes
- Single-ended 4-pin plug-in GX24q base with shortened base casing
- Suitable for operation on electronic control gear

Applications

- Street and city lighting
- Industry
- Hot fixtures
- Locations with special thermal requirements

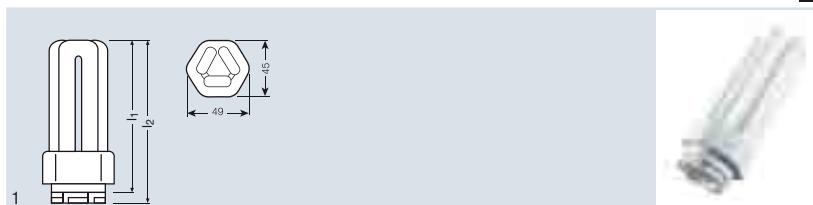

Safety information

In the event of a breakage: www.osram.com/brokenlamps

References

- For more information on QUICKTRONIC® electronic control gear go to www.osram.com/QUICKTRONIC and Chapter 9.
- * Service life is defined as the time when 70% of the system luminous flux is still available.

Compact, versatile and powerful – OSRAM DULUX® T/E HE lamps offer highly efficient and comfortable light for a very wide range of applications.

Product benefits

- Very economical and efficient
- Very good luminous flux
- Outstanding quality of light
- Long service life*

Product characteristics

- Improved average life: up to 20,000 h (with QUICKTRONIC®)
- Good color rendering index 1B (R_a 80-89)
- Impressive light output at an ambient temperature of 35°C
- Improved maintenance
- Dimmable from 100 % to 3 %, except D-T/E 11 W HE
- Short and compact pin-base lamps with triple-turn tubes
- GR14q-1 base system
- Suitable for operation on electronic control gear

Applications

- Public buildings
- Offices
- Shops
- Supermarkets and department stores
- Hotels and restaurants
- Industry

1) Only for operation with 0.22 A control gear

OSRAM DULUX® D lamps are impressive for their compactness, performance and versatility in small traditional fixtures and downlights with small mounting depths (CCG operation).

Product benefits

- Extremely economical
- Good quality of light
- Excellent luminous flux
- Long service life*

Product characteristics

- Average life: 10,000 hours
- Good color rendering index 1B (R_a 80-89)
- Good maintenance
- Short and compact pin-base lamps with double-turn tubes
- Single-ended two-pin plug-in G24d base
- Suitable for operation on conventional control gear

Applications

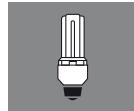

- Public buildings
- Offices
- Shops
- Supermarkets and department stores
- Hotels and restaurants
- Industry

OSRAM DULUX® D/E energy-saving compact fluorescent lamps produce high-quality light, making them ideal for creating a pleasant atmosphere indoors. Also suitable for emergency lighting systems.

Product benefits

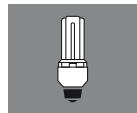

- Extremely economical
- Good quality of light
- Excellent luminous flux
- Long service life*
- OSRAM System+ Guarantee in combination with OSRAM QUICKTRONIC® ECG

Product characteristics

- Improved average life: up to 20,000 h (with QUICKTRONIC®)
- Good color rendering index 1B (R_a 80-89)
- Improved maintenance
- Dimmable from 100 % to 3 %
- Short and compact pin-base lamps with double-turn tubes
- Single-ended four-pin plug-in G24q base
- Suitable for operation on electronic control gear
- Can be operated on battery, solar and AC power in conjunction with suitable ECGs

Applications

- Public buildings
- Offices
- Shops
- Supermarkets and department stores
- Hotels and restaurants
- Industry

OSRAM DULUX® S/E compact fluorescent lamps are characterized by their slim design, making them extremely versatile for almost universal use.

Product benefits

- Extremely economical
- Outstanding quality of light
- Low power consumption (7 W, 9 W, 11 W)
- Long service life*

Product characteristics

- Improved average life: up to 20,000 h (with QUICKTRONIC®)
- Extremely low profile
- Improved maintenance
- Dimmable from 100 % to 3 %
- Short and compact pin-base lamps with single-turn tubes
- Single-ended four-pin plug-in 2G7 base
- Suitable for operation on electronic control gear
- Can be operated on battery, solar and AC power in conjunction with suitable ECGs

Applications

- Public buildings
- Offices
- Shops
- Supermarkets and department stores
- Hotels and restaurants

1) ECG and CCG operation 2) ECG operation					

OSRAM DULUX® L compact fluorescent lamps together with appropriate OSRAM QUICKTRONIC® control gear provide the basis for individual energy-saving lighting solutions.

Product benefits

- Extremely economical
- Excellent luminous efficacy
- Excellent luminous flux
- Long service life*
- OSRAM System⁺ Guarantee in combination with OSRAM QUICKTRONIC[®] ECG

Product characteristics

- Less than half as long as a tubular fluorescent lamp
- Improved average life: up to 20,000 h (with QUICKTRONIC[®])
- Good color rendering index 1B (R_a 80-89)
- Improved maintenance
- Dimmable (from 100 to 1% with QUICKTRONIC[®] QTi DALI/DIM)
- Short and compact pin-base lamps with double-turn tubes
- Single-ended 4-pin plug-in 2G11 base
- Suitable for operation on electronic and conventional control gear, see footnotes 1), 2)
- Operation with standard starters
- Also available in blue

Applications

- Floor-standing lights
- Public buildings
- Offices
- Shops
- Supermarkets and department stores
- Hotels and restaurants
- Industry

DULUX L 80 W/840 CONSTANT	LUMILUX Cool White	2G11	565	10

OSRAM LUMILUX® CONSTANT lamps offer constant high luminous flux over a wide range of temperatures.

Product benefits

- Extremely economical
- Excellent luminous flux at high and low ambient temperatures
- Good quality of light
- Long service life*

Product characteristics

- Improved average life: up to 20,000 h (with QUICKTRONIC®)
- Good color rendering index 1B (R_a 80-89)
- Luminous flux greater than 90% at ambient temperatures between +5 °C and +70 °C
- Improved maintenance
- Dimmable (from 100 to 1% with QUICKTRONIC® QTi DALI/DIM)
- Short and compact pin-base lamps with double-turn tubes
- Single-ended four-pin plug-in 2G11 base
- Suitable for operation on electronic control gear
- Narrow fixtures with high temperatures

Applications

- Floor-standing lights
- Street and city lighting
- Industry
- Applications with special thermal requirements

1) ECG and CCG operation

2) ECG operation

OSRAM LUMILUX® DE LUXE lamps meet high demands in terms of color rendering.

Product benefits

- Very economical and efficient
- Excellent luminous efficacy
- Good quality of light
- Long service life*

Product characteristics

- Very good color rendering index 1A ($R_a \geq 90$)
- Improved average life: up to 20,000 h (with QUICKTRONIC®)
- Improved maintenance
- Dimmable (from 100 to 1% with QUICKTRONIC® QTi DALI/DIM)
- Short and compact pin-base lamps with double-turn tubes
- Single-ended 4-pin plug-in 2G11 base
- Suitable for operation on electronic and conventional control gear, see footnotes 1), 2)

1) At an ambient temperature of 5 °C

OSRAM DULUX® L SP lamps in conjunction with the appropriate OSRAM QUICKTRONIC® ECGs are ideal for low ambient temperatures thanks to their robust construction.

Product benefits

- Extremely economical
- Excellent luminous flux at low ambient temperatures
- Good quality of light
- Long service life*

Product characteristics

- Good color rendering index 1B (R_a 80-89)
- Improved average life: up to 20,000 h (with QUICKTRONIC®)
- Optimum luminous flux at low ambient temperatures (+5 °C)
- Dimmable (from 100 to 1% with QUICKTRONIC® QT1 DALI/DIM)
- Short and compact pin-base lamps with double-turn tubes
- Single-ended 4-pin plug-in 2G11 base
- Suitable for operation on electronic and conventional control gear

Applications

- Street and city lighting
- Industry
- Applications with low ambient temperatures

OSRAM DULUX® L HE, the first compact fluorescent lamp with 100 lm/W, is highly efficient in combination with the appropriate OSRAM QUICKTRONIC® ECG and makes a significant contribution to the design of energy-saving lighting systems and solutions.

Product benefits

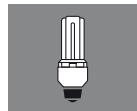

- Very economical and efficient (100 lm/W)
- Excellent luminous efficacy
- Good quality of light
- Long service life*
- OSRAM System⁺ Guarantee in combination with OSRAM QUICKTRONIC®

Product characteristics

- Improved average life: up to 20,000 h (with QUICKTRONIC®)
- Good color rendering index 1B (R_a 80-89)
- Impressive luminous efficacy at an ambient temperature of 35°C
- Improved maintenance
- Dimmable (from 100 to 1 % with QUICKTRONIC® QT1 DALI/DIM)
- Short and compact pin-base lamps with double-turn tubes
- Single-ended 4-pin plug-in 2GX11 base
- Suitable for operation on electronic control gear

Applications

- Floor-standing lights
- Public buildings
- Offices
- Shops
- Supermarkets and department stores
- Hotels and restaurants
- Industry

1) ECG and CCG operation

2) ECG operation

OSRAM DULUX® L XT lamps offer long life and outstanding reliability.

Product benefits

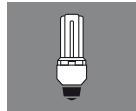

- Extremely economical
- Much lower total cost of ownership*
- Excellent luminous flux
- Good quality of light
- OSRAM System[®] Guarantee in combination with OSRAM QUICKTRONIC[®]

Product characteristics

- Long average life: up to 36,000 h (with QUICKTRONIC[®])
- Good color rendering index 1B (R_a 80-89)
- Improved maintenance
- Dimmable (from 100 to 1 % with QUICKTRONIC[®] QTi DALI/DIM)
- Short and compact pin-base lamps with double-turn tubes
- Single-ended 4-pin plug-in 2G11 base
- Suitable for operation on electronic and conventional control gear, see footnotes 1), 2)

Applications

- Street and city lighting
- Floor-standing lights
- Public buildings
- Offices
- Shops
- Supermarkets and department stores
- Hotels and restaurants
- Industry

OSRAM DULUX® F compact fluorescent lamps together with appropriate OSRAM QUICKTRONIC® control gear provide optimum area lighting and energy-saving solutions.

Product benefits

- Extremely economical
- Good quality of light
- Excellent luminous efficacy
- Long service life*
- Good maintenance

Product characteristics

- Extremely low profile
- Average life: 10,000 hours
- Good color rendering index 1B (R_a 80-89)
- Short and compact pin-base lamps with double-turn tubes
- Single-ended four-pin plug-in 2G10 base
- Suitable for operation on electronic and conventional control gear

Applications

- Public buildings
- Offices
- Shops
- Supermarkets and department stores
- Hotels and restaurants
- Industry

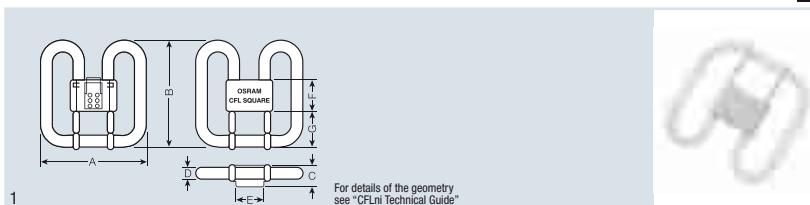

Safety information

In the event of a breakage: www.osram.com/brokenlamps

References

- For more information on QUICKTRONIC® electronic control gear go to www.osram.com/QUICKTRONIC and Chapter 9.
- * Service life is defined as the time when 70% of the system luminous flux is still available.

OSRAM CFL SQUARE® lamps are slim compact fluorescent lamps. The square shape provides uniform distribution of light, with no shadows at either end and no dark patches. The lamps are ideal for low-profile wall and ceiling fixtures.

Product benefits

- Extremely economical
- Good quality of light
- Excellent luminous efficacy
- Long service life*
- Good maintenance

Product characteristics

- Extremely low profile
- Average life: 10,000 hours
- Good color rendering index 1B (R_a 80-89)
- Short and compact pin-base lamps
- Single-ended two-pin plug-in GR8 base
- Suitable for operation on conventional control gear

Applications

- Public buildings
- Offices
- Shops
- Supermarkets and department stores
- Hotels and restaurants
- Industry

OSRAM CFL SQUARE® lamps are slim compact fluorescent lamps. The square shape provides uniform distribution of light, with no shadows at either end and no dark patches. With the appropriate OSRAM QUICKTRONIC® ECGs they are ideal for low-profile wall and ceiling fixtures.

Product benefits

- Extremely economical
- Good quality of light
- Excellent luminous efficacy
- Long service life*
- Good maintenance

Product characteristics

- Extremely low profile
- Average life: 10,000 hours
- Good color rendering index 1B (R_a 80-89)
- Short and compact pin-base lamps
- Single-ended four-pin plug-in GR10q base
- Suitable for operation on electronic and conventional control gear

Applications

- Public buildings
- Offices
- Shops
- Supermarkets and department stores
- Hotels and restaurants
- Industry

ENDURA 150 W/840 2-pole ¹⁾	LUMILUX Cool White	415	75	139	1

1) With 2-pin connector

2) With QT ENDURA 70-100/120-240 S

3) With QT ENDURA 100-150/120-240 S

The discharge in this lamp has no starting point and no end. The closed "ring" enables a discharge to take place without electrodes. In the OSRAM ENDURA® lamps the energy is "injected" from the outside by magnetic fields, which leads to a long life.

Product benefits

- Extremely economical
- Excellent luminous flux at high and low ambient temperatures
- Small loss of luminous flux
- Instant flickerfree starting
- Long service life*
- Energy savings

Product characteristics

- Extremely long average life: up to 60,000 h (with QUICKTRONIC® Endura)
- High system luminous efficacy: 80 lm/W
- Good color rendering index R_a ≥ 80
- Optimum luminous flux over a wide temperature range
- Suitable for operation on QUICKTRONIC® Endura
- Can be used in DC systems
- Low ignition temperature, as low as -40 °C
- Low operating frequency of 250 kHz

Applications

- Street and city lighting
- Industry
- Sports halls and outdoor facilities
- Marine lighting

Safety information

OSRAM DULUX® F 18 W, 24 W, 36 W

5

Series operation on 230 V only
with starter St 151

OSRAM DULUX® L 18 W

OSRAM DULUX® L 18 W SP

OSRAM DULUX® F 18 W

F = Four-pin holder

St = Starter

UN = Line voltage

V = Control gear

For circuit diagrams for HF operation see Section 9.

Note for OSRAM DULUX® lamps with integrated control gear

All OSRAM DULUX® lamps with integrated control gear are designed for the European AC voltage of 220-240 V and are therefore not suitable for DC operation. Exceptions are indicated.

1) Suitable for ECG operation only! The lamps are designed for internal fixture temperatures of 30 to 40 °C; the optimum luminous flux is achieved at 35 °C.

2) Can also be supplied in boxes of 20 with sleeves. Industrial boxes of 40 available for all lamps except LUMILUX SKYWHITE and certain light colors.

HE (High Efficiency) systems offer excellent lumen maintenance, outstanding efficiency and impressive economy. With a tube diameter of only 16 mm, these lamps offer an extremely high luminous efficacy of up to 104 lm/W (at 35 °C ambient temperature).

Product benefits

- Good economy and efficiency
- Up to 20 % more economical than LUMILUX® T8
- Up to 50 % smaller volume than comparable T8 lamps
- Natural colors
- OSRAM System* Guarantee in combination with OSRAM ECGs

Product characteristics

- Up to 104 lm/W
- Very good lumen maintenance (>90 %) throughout the life of the lamp
- Long average life: up to 24,000 h (with QUICKTRONIC®)
- Good color rendering index 1B (R_a 80-89)
- Dimmable

Applications

- Public buildings
- Offices
- Shops
- Supermarkets and department stores
- Industry

1) Suitable for ECG operation only. The lamps are designed for internal fixture temperatures of 30 to 40 °C; the optimum luminous flux is achieved at 35 °C.

2) Can also be supplied in boxes of 20 with sleeves. Industrial boxes of 40 available for all lamps except LUMILUX SKYWHITE and certain light colors.

HO (High Output) lamp systems are particularly noted for their very high luminous flux, opening up new areas of application for the fluorescent lamp such as lighting for high-ceiling rooms.

Product benefits

- Excellent luminous flux
- Up to 20 % more economical than LUMILUX® T8
- Up to 50 % smaller volume than comparable T8 lamps
- Natural colors
- OSRAM System+ Guarantee in combination with OSRAM ECGs

Product characteristics

- High luminous flux
- Very good lumen maintenance (> 90 %) throughout the life of the lamp
- Long average life: up to 24,000 h (with QUICKTRONIC®)
- Good color rendering index 1B (R_a 80-89)
- Dimmable

Applications

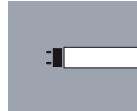

- Industry
- Public buildings
- Offices
- Tunnels, subways
- Car parks

1) Only for ECG operation | The lamps are designed for internal fixture temperatures of 30 to 40 °C; the optimum luminous flux is achieved at 35 °C.

2) Can also be supplied in boxes of 20 with sleeves.

Achieve energy savings of up to 10 % in existing systems by a simple lamp replacement ³⁾

Product benefits

- Up to 10 % energy savings compared to standard T5 HO LUMILUX® lamps
- Good economy and efficiency
- Payback time less than 1 year
- OSRAM System⁺ Guarantee in combination with OSRAM ECGs

Product characteristics

- Up to 96 lm/W
- Very good lumen maintenance (>90 %) throughout the life of the lamp
- High luminous flux
- Long average life: up to 24,000 h (with QUICKTRONIC[®])
- Good color rendering index 1B (Ra 80-89)
- Dimmable

Applications

- Industry
- Public buildings
- Offices
- Tunnels, subways

 NEW

OSRAM LUMILUX® XT lamps offer long life and outstanding reliability.

Product benefits

- Much lower total cost of ownership, comprising investment, maintenance and relamping costs
- Lower maintenance costs thanks to longer replacement intervals
- Longer service life, so fewer lamps for waste disposal
- Compatible with and easily exchangeable with conventional T5 lamps

Product characteristics

- Extremely reliable: long life, low premature failure rate, 90% luminous flux throughout their life
- Extremely long average life: up to 45,000 h (with QUICKTRONIC®)
- High luminous flux
- Good color rendering index 1B (Ra 80-89)
- Dimmable

Applications

- Industry
- Tunnels, subways

1) Suitable for ECG operation only.

2) Thanks to the technical superiority of the CONSTANT lamps, which enables them to operate efficiently within a very wide temperature range, the startup time of the CONSTANT lamps is longer until a stable operating condition is reached (between 3 and 5 minutes).

OSRAM T5 HO LUMILUX® CONSTANT lamps offer constant high luminous flux over a wide temperature range.

Product benefits

- Excellent luminous flux at high and low ambient temperatures
- Stable and suitable for outdoor lighting or fixtures with little thermal insulation
- Compatible with and easily exchangeable with conventional T5 lamps
- OSRAM System[®] Guarantee in combination with OSRAM ECGs

Product characteristics

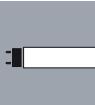

- Luminous flux greater than 90 % at ambient temperatures between +5 °C and 70 °C (for 49 W: +20 °C to 80 °C)
- Very good lumen maintenance (>90 %) throughout the life of the lamp
- High luminous efficacy
- Long average life: up to 24,000 h (with QUICKTRONIC[®])
- Good color rendering index 1B (R_a 80-89)
- Dimmable

Applications

- Industry
- Street lighting
- Applications with extreme temperature requirements

1) Suitable for ECG operation only. The lamps are designed for fixture temperatures of 30 to 40 °C; the optimum luminous flux is achieved at 35 °C.

OSRAM LUMILUX® DE LUXE lamps meet high demands in terms of color rendering. Color rendering combined with advanced lamp design.

Product benefits

- Excellent color rendering
- Natural colors
- Perfect color matching
- OSRAM System[®] Guarantee in combination with OSRAM ECGs

Product characteristics

- Very good color rendering index 1A ($R_a > 90$)
- Very good lumen maintenance (> 90%) throughout the life of the lamp
- Long average life: up to 24,000 h (with QUICKTRONIC[®])
- Dimmable

Applications

¹⁾ Suitable for ECG operation only.

²⁾ Minimum

Light without shadow

Light with no dark areas, shadows or overlaps has not been possible until now.

LUMILUX® T5 HO and HE SEAMLESS lamps have overcome the limitations of conventional fluorescent lamps and provide continuous light without annoying shadows. This is possible thanks to the minimal spacing between the end points of two lamps.

Product benefits

- Up to 20% more economical than T8 Standard
- Ideal geometry for extremely narrow and modern fixtures
- SEAMLESS HE: the same luminance from all the lamps allows the use of different lamp lengths in the same installation
- OSRAM System[®] Guarantee in combination with OSRAM QUICKTRONIC ECG

Product characteristics

- Outstanding OSRAM quality: accurate chromaticity coordinate, stable light and electrical data and uniform coating
- Reduced loss of light over its life (only 10%)
- Good color rendering index 1B (Ra 80-90)
- Dimmable (for details see the Technical Guide)

Applications

- Public buildings
- Offices
- Shops
- Supermarkets and department stores
- Hotels
- Restaurants

1) Suitable for ECG operation only. I The lamps are designed for internal fixture temperatures of 30 to 40 °C; the optimum luminous flux is achieved at 35 °C.

OSRAM NATURA® lamps have a specially tailored spectral distribution for professional presentation of food.

Product benefits

- The specially tailored spectral distribution ensures that food looks fresh and appetizing, without unduly “beautifying” it
- Suitable for use in open and enclosed fixtures
- OSRAM System* Guarantee in combination with OSRAM ECGs

Product characteristics

- Color rendering R9 = 80 and Ra = 85
- Long average life: up to 24,000 h (with QUICKTRONIC®)

Applications

- Very good shop light for bakeries, meat processors, butchers and so on
- Shops
- Supermarkets and department stores

LUMILUX® SPLIT control T5, tubular, G5 base

Product reference	Product number	W	lm	lm 35°C	Ra	Tube d [mm]	l [mm]	l [mm]	No.	
HE 28 W/840 SPS ¹⁾	4008321233387	28	2540	2830	Cool White	80...89	16	1149	10	1
HO 54 W/840 SPS ¹⁾	4008321233363	54	4350	4890	Cool White	80...89	16	1149	10	1

1) Suitable for ECG operation only. | The lamps are designed for internal fixture temperatures of 30 to 40 °C; the optimum luminous flux is achieved at 35 °C.

OSRAM LUMILUX® SPLIT control lamps stand for safety and offer protection against splinters.

Product benefits

- Splinter protection
- Required to prevent contamination in sensitive production areas (e.g. in the food industry)
- The lamps support the implementation of the HACCP concepts from production through to presentation
- Suitable for enclosed fixtures
- OSRAM System[®] Guarantee in combination with OSRAM ECGs

Product characteristics

- Splinter protection
- The life of the sleeve is the same as the average lamp life
- Long average life: up to 24,000 h (with QUICKTRONIC[®])
- Dimmable

Applications

- Recommended for certified companies in accordance with the International Food Standard
- Industry
- Shops
- Supermarkets and department stores

Safety information

- Lamps with plastic sleeves: maximum ambient temperature: 80 °C
- Lamps with plastic sleeves: minimum ambient temperature: - 10 °C
- Lamps with plastic sleeves: maximum storage time 5 years at 0 to 30 °C
- Lamps with plastic sleeves: lamps must be replaced after average life has been reached (B50)
- In the event of a breakage: www.osram.com/brokenlamps

LUMILUX® CHIP control® T5, tubular, G5 base

Product reference	Product number	W	lm	lm 35°C	Color	Ø TUBE d [mm]	I [mm]	I [mm]	No.
HE 28 W/62 CHIP CONTR ¹⁾	4008321233424	28	1830	2040	Yellow	16	1149	10	1
HO 54 W/62 CHIP CONTR ¹⁾	4008321233400	54	3140	3530	Yellow	16	1149	10	1

¹⁾ Suitable for ECG operation only. | The lamps are designed for internal fixture temperatures of 30 to 40 °C; the optimum luminous flux is achieved at 35 °C.

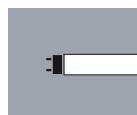

The LUMILUX® CHIP control® T5 lamp is the ideal solution for microchip fabrication plants.

Product benefits

- Excellent UV filter
- Suitable for use in open and enclosed fixtures
- OSRAM System[®] Guarantee in combination with OSRAM ECGs

Product characteristics

- Excellent filter function under 500 nm
- The life of the sleeve is the same as the average lamp life
- Long average life: up to 24,000 h (with QUICKTRONIC[®])
- Dimmable

Applications

- Ideal for microchip fabrication plants and other areas where UV and blue components have to be reduced to the absolute minimum
- Industry
- Print shops

Safety information

- Lamps with plastic sleeves: maximum ambient temperature: 80 °C
- Lamps with plastic sleeves: minimum ambient temperature: - 10 °C
- Lamps with plastic sleeves: maximum storage time 5 years at 0 to 30 °C
- Lamps with plastic sleeves: lamps must be replaced after average life has been reached (B50)
- In the event of a breakage: www.osram.com/brokenlamps
- An increase of the emitted radiation power < 500 nm has to be considered depending on the operation conditions. For detailed information please refer to the technical data sheets.

1) Suitable for ECG operation only.

The circular LUMILUX® T5 FC® is specially tailored to round or square low-profile fixtures with direction-neutral light. The round lighting solution from OSRAM together with the appropriate OSRAM QUICKTRONIC® control gear is an unusual option with high efficiency.

Product benefits

- Extremely economical
- Good quality of light
- Excellent luminous flux
- Excellent uniform illumination with no shadows

Product characteristics

- Good color rendering index 1B (R_a 80-89)
- Good average life (with OSRAM ECG)
- Dimmable (from 100 to 1% with QTi DALI/DIM)
- Single-ended round fluorescent lamp
- Tube diameter 16 mm
- Exclusively for operation on electronic control gear

Applications

- Public buildings
- Offices
- Restaurants
- Industry
- Shops
- Supermarkets and department stores
- Hotels

1) These lamps are not intended for general illumination. They are suitable for applications such as lighting for means of public transport.

2) Also available in industrial packs (... W) for bulk orders. Contains 30 lamps.

T8 LUMILUX® systems offer excellent lumen maintenance, high efficiency and impressive economy.

Product benefits

- Up to 18% higher luminous efficacy than conventional T8 BASIC lamps
- Good economy thanks to high efficiency
- OSRAM System⁺ Guarantee in combination with OSRAM QUICKTRONIC®

Product characteristics

- Very good lumen maintenance (>90%) throughout the life of the lamp
- Good color rendering index 1B (R_a 80-90)
- Dimmable
- Top-quality three-band phosphor: LUMILUX®
- Available in many different light colors (2700 K to 8000 K) for every application and preference

Applications

- Public buildings
- Office lighting
- Industry
- Shops
- Supermarkets and department stores
- Street lighting

1) At an ambient temperature of 30 °C

Achieve energy savings of up to 10% in existing indoor systems (T8 Standard, CCG/LLG) by simply replacing the lamps.

Product benefits

- Simple direct replacement in existing CCG/LLG systems
- Instant energy savings in existing CCG/LLG systems
- Up to 10% lower energy consumption on conventional control gear
- Reduction in CO₂ emissions (51 W) 14 kg per year, 70 kg over the life of the lamp – energy mix: 0.5 kg/kWh
- Payback less than 1 year
- Energy savings in combination with QTFIT8 in new systems

Product characteristics

- Very good lumen maintenance (>90%) throughout the life of the lamp
- Not released for dim operation
- Good color rendering index 1B (R_a 80-90)

Applications

- Public buildings
- Office lighting
- Industry
- Shops
- Supermarkets and department stores

OSRAM LUMILUX® XT lamps offer long life and outstanding reliability.

Product benefits

- Much lower total cost of ownership (TCO) compared with T8 LUMILUX® lamps
- Service life 2.3 times higher than that of a standard LUMILUX® lamp
- Longer standard life, so fewer lamps for waste disposal
- OSRAM System® Guarantee in combination with OSRAM QUICKTRONIC®

Product characteristics

- Extremely reliable: long life, low premature failure rate, 90% luminous flux throughout their life
- Service life of up to 42,000 hours on preheat ECGs or up to 35,000 hours on CCGs
- Good color rendering index 1B (R_a 80-90)
- Dimmable (for details see the Technical Guide)
- Top-quality three-band LUMILUX® phosphor

Applications

- For installations in which relamping can take place without disturbing normal operations
- Street lighting
- Public buildings
- Industry
- Shops
- Supermarkets and department stores

Safety information

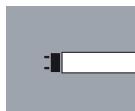

- In the event of a breakage: www.osram.com/brokenlamps
- Please note however that the fixture must be cleaned regularly to avoid loss of luminous flux

OSRAM LUMILUX® XXT lamps offer extra long life and outstanding reliability.

Product benefits

- Much lower total cost of ownership (TCO) compared with T8 LUMILUX® lamps
- Service life 4.1 times higher than that of a standard LUMILUX® lamp
- Longer standard life, so fewer lamps for waste disposal
- OSRAM System* Guarantee in combination with OSRAM QUICKTRONIC®

Product characteristics

- Extremely reliable: very long life, low premature failure rate, 90% luminous flux throughout their life
- Service life of up to 75,000 hours on ECGs or up to 58,000 hours on CCGs
- Good color rendering index 1B (R_a 80-90)
- Dimmable with suitable ECG (for details see the Technical Guide)
- Top-quality three-band LUMILUX® phosphor

Applications

- For installations in which relamping cannot take place without disturbing normal operations
- Street lighting
- Public buildings
- Industry
- Shops
- Supermarkets and department stores

Safety information

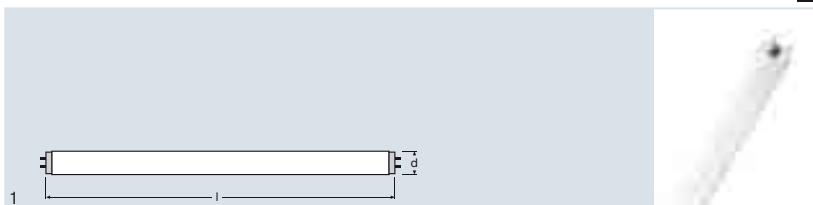

- In the event of a breakage: www.osram.com/brokenlamps
- Please note however that the fixture must be cleaned regularly to avoid loss of luminous flux

OSRAM LUMILUX® DE LUXE lamps meet high demands in terms of color rendering.

Product benefits

- Excellent color rendering
- Natural colors
- Available in many different light colors (3000 K to 6500 K) for every application and preference

Product characteristics

- Very good color rendering index 1A ($R_a > 90$)
- Long service life: up to 16,000 h (preheat ECG)
- Dimmable
- High luminous flux

Applications

- Ideal for all applications in which color rendering is an important factor
- Public buildings
- Shops
- Supermarkets and department stores
- Industry

OSRAM LUMILUX® COLOR proof T8 meet the highest demands in terms of color rendering in daylight quality.

Product characteristics

- When used in appropriate fixtures the lamp meets the application requirements of ISO 3664:2009
- Metamerism indices: MVIS ≤ 1.0 and MUV ≤ 1.5
- Outstanding OSRAM quality: accurate chromaticity coordinate, stable light and electrical data and uniform coating

Applications

- Ideal for the print industry, graphic workshops, photographic laboratories and industrial inspection and color matching facilities
- Industry
- Shops
- Supermarkets and department stores

BIOLUX® fluorescent lamps from OSRAM emit a daylight white light with very good color rendering

Product benefits

- BIOLUX® fluorescent lamps from OSRAM emit a daylight white light that gives your animals a sense of natural sunlight

Product characteristics

- Very good color rendering index 1A ($R_a > 90$)

Applications

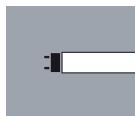

- Excellent for raising small animals

FLUORA® - Light for growth of plants

The light from FLUORA® fluorescent lamps has an emphasis at the blue and red ends of the spectrum so it is ideal for promoting photo-biological processes in plants. The result is healthy growth of plants.

Product benefits

- Promotes photobiological processes in plants
- Promotes plant growth

Applications

- OSRAM FLUORA® lamps are used wherever there is not enough natural daylight for plants
- Public buildings
- Offices
- Shops
- Supermarkets and department stores
- Restaurants

OSRAM NATURA® lamps have a specially tailored spectral distribution for professional presentation of food.

Product benefits

- The specially tailored spectral distribution ensures that food looks fresh and appetizing, without unduly “beautifying” it

Product characteristics

- Average life: up to 20,000 h (preheat ECG)

Applications

- Very good shop light for bakeries, meat processors, butchers and further applications
- Shops
- Supermarkets and department stores
- Especially suitable for the food sector (DIN 10504)

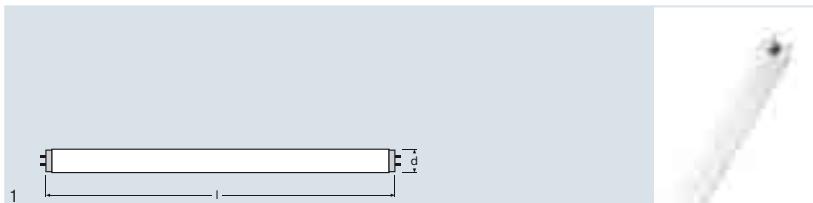

Safety information

- In the event of a breakage: www.osram.com/brokenlamps

L 58 W/76 SPS	4008321 232847	58	2760	NATURA	26	1500

OSRAM NATURA® SPLIT control lamps have a specially tailored spectral distribution for professional presentation of food and also protect food in accordance with the International Food Standard.

Product benefits

- The specially tailored spectral distribution ensures that food looks fresh and appetizing, without unduly "beautifying" it
- The SPS lamps support the implementation of the HACCP concepts from production through to presentation
- OSRAM NATURA® SPLIT control: food is ideally protected even if open fixtures are used

Product characteristics

- OSRAM NATURA® SPLIT control lamps meet the requirements of the International Food Standard

Applications

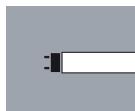

- Very good shop light for bakeries, meat processors, butchers and so on
- Shops
- Supermarkets and department stores
- Especially suitable for the food sector (DIN 10504)

Safety information

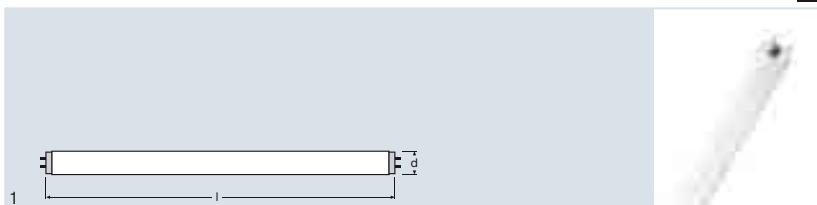

- Lamps with plastic sleeves: maximum ambient temperature: 80°C
- Lamps with plastic sleeves: minimum ambient temperature: -10°C
- Lamps with plastic sleeves: maximum storage time 5 years at 0 to 30°C
- Lamps with plastic sleeves: lamps must be replaced after average life has been reached (B50)
- In the event of a breakage: www.osram.com/brokenlamps

OSRAM LUMILUX® SPLIT control lamps stand for extra safety and offer protection against splinters.

Product benefits

- Required to prevent contamination in sensitive production areas (e.g. in the food industry)
- Splinter protection
- The lamps support the implementation of the HACCP concepts from production through to presentation
- Suitable also for enclosed fixtures

Product characteristics

- Splinter protection
- Good color rendering index 1B (R_a 80-90)
- Very good lumen maintenance (>90%) throughout the life of the lamp
- The life of the sleeve is the same as the average lamp life
- Dimmable

Applications

- Recommended for certified companies in accordance with the International Food Standard
- Industry
- Shops
- Supermarkets and department stores
- Street lighting

Safety information

- Lamps with plastic sleeves: maximum ambient temperature: 80°C
- Lamps with plastic sleeves: minimum ambient temperature: - 10°C
- Lamps with plastic sleeves: maximum storage time 5 years at 0 to 30°C
- Lamps with plastic sleeves: lamps must be replaced after average life has been reached (B50)

LUMILUX® CHIP control® T8, tubular, G13 base

Product reference	Product number	W	lm	TUBE d [mm]	I [mm]	lens	No.
L 18 W/62	4008321232700	18	970	Yellow	26	590	12
L 36 W/62	4008321232724	36	2300	Yellow	26	1200	12
L 58 W/62	4008321232748	58	3830	Yellow	26	1500	12

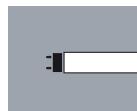

The LUMILUX® CHIP control® T8 lamp is the ideal solution for microchip fabrication plants.

Product benefits

- Excellent UV filter
- Suitable for use in open and enclosed fixtures
- OSRAM System⁺ Guarantee in combination with OSRAM QUICKTRONIC®

Product characteristics

- Excellent filter at 500 nm
- Long sleeve life (corresponds to the average life of the lamp: B50 = 20,000 h with preheat ECG)

Applications

- Ideal for microchip fabrication plants and other places where UV and blue components have to be reduced to the absolute minimum
- Industry

Safety information

- Lamps with plastic sleeves: minimum ambient temperature: -10°C
- Lamps with plastic sleeves: maximum storage time 5 years at 0 to 30°C
- Lamps with plastic sleeves: lamps must be replaced after average life has been reached (B50)
- In the event of a breakage: www.osram.com/brokenlamps
- An increase of the emitted radiation power < 500 nm has to be considered depending on the operation conditions. For detailed information please refer to the technical data sheets.

Thanks to its special shape and efficiency, OSRAM T8 U with the appropriate OSRAM QUICKTRONIC® ECG is ideal for space-saving cost-effective lighting concepts. It is perfect for street lighting.

Product benefits

- Extremely economical
- Good quality of light
- Excellent luminous flux
- OSRAM System⁺ Guarantee in combination with OSRAM QUICKTRONIC®

Product characteristics

- Good color rendering index 1B (R_a 80-90)
- Good average life
- Double-ended U-shaped fluorescent lamp
- Suitable for operation on electronic and conventional control gear

Applications

- Street lighting, city lighting
- Industry

The circular LUMILUX® T9 C fluorescent lamp with the appropriate OSRAM QUICKTRONIC® ECG is ideal for round or square fixtures and provide a harmonious direction-neutral light.

Product benefits

- Extremely economical
- Good quality of light
- Excellent luminous flux
- Excellent uniform illumination with no shadows

Product characteristics

- Good color rendering index 1B (R_a 80-90)
- Good average life
- Single-ended round fluorescent lamp
- Dimmable
- Suitable for operation on electronic and conventional control gear

Applications

- Public buildings
- Restaurants
- Industry
- Shops
- Supermarkets and department stores
- Hotels

1) Maximum at 33 °C ±2 °C

The unique OSRAM LUMILUX® T2 FM fluorescent lamp with the appropriate OSRAM QUICKTRONIC® ECG has an impressively slim design. It can be easily integrated in small conventional lighting systems.

Product benefits

- Extremely economical
- Good quality of light
- Excellent luminous flux

Product characteristics

- Good average life (with OSRAM ECG)
- Extra slim and compact fluorescent lamp
- Suitable for operation on electronic control gear
- Tube diameter 7 mm

Applications

- Offices
- Museums
- Shops
- Supermarkets and department stores
- Industry (e.g. furniture industry)
- Restaurants

OSRAM T12 SA version with external ignition strip offers quick and simple ignition at low temperatures.

Product benefits

- Stable and suitable for outdoor lighting or fixtures with little thermal insulation

Product characteristics

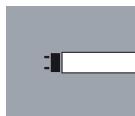

- External ignition strip for improved ignition at low ambient temperatures

Applications

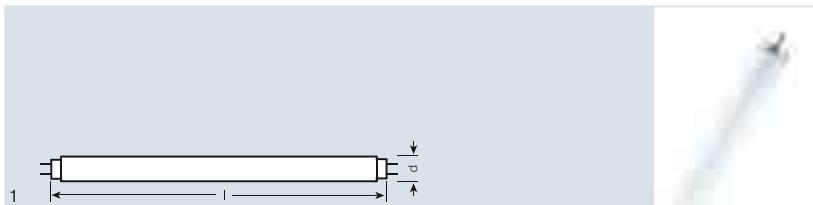

- Street lighting
- Industry

1) For long-life explosion-proof fixtures in type of protection "increased safety"

OSRAM T12 XL version in explosion-proof fixtures offer high levels of protection against fire and explosions

Product benefits

- Extreme safety. T12 lamps from OSRAM are perfect for explosion-proof fixtures – especially for applications where there is a heightened risk of fire or explosions, for example on oil rigs.

Product characteristics

- Fa6 base for explosion-proof fixtures

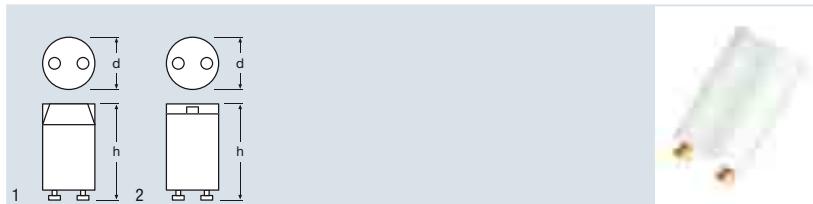

Applications

- Industry

OSRAM high-quality starters ST 111 LONGLIFE, ST 151 LONGLIFE, ST 171 SAFETY, ST 172 SAFETY, ST 173 SAFETY

OSRAM starters ignite every time, reliably and quickly. And they are gentle on lamps. Each starter is subjected to strict manufacturing and quality control tests. All starters have a self-extinguishing insulated casing made of Makrolon® and meet the conditions laid down for protection class II.

They are equipped with a special compensating capacitor (foil winding capacitor), are VDE approved and carry the and marks.

To ensure reliable ignition we recommend that you also replace the starter when you replace the lamp – except in the case of DEOS® SAFETY.

- Switching life: from ≥ 10,000 switching operations to ≥ 60,000 switching operations in inductive mode
- 20% longer life with fluorescent lamps

Features and benefits of DEOS® ST 171 SAFETY, DEOS® ST 172 SAFETY and DEOS® ST 173 SAFETY

- DEOS® ST 171 SAFETY, DEOS® ST 172 SAFETY and DEOS® ST 173 SAFETY are safety starters
- DEOS® ST 172 SAFETY is a safety starter for series circuits (tandem circuits)
- DEOS® ST 171 SAFETY, DEOS® ST 172 SAFETY and DEOS® ST 173 SAFETY are designed to operate with conventional control gear (CCG) and low-loss gear (LLG)
- They reliably disconnect burnt-out or faulty lamps under inductive or capacitive operating conditions
- They are instantly ready for operation when the red button is pressed in (there must be an audible click)
- The automatic cutout circuit protects the choke and the starter itself
- Four times the life of conventional starters
- To ensure reliable ignition and operation the DEOS® ST should be replaced after every four lamp replacements.
- Temperature range for reliable cutout: -20°C...+80°C

1) Except L 65 W... L 80 mm L 80 W...

2) Also for single operation on 110/127 V_{AC}

3) Temperature range -20 °C to +100 °C

4) Not suitable for OSRAM DULUX® L and F 24 W in series operation

5) Not suitable for L 70 W

6) 16 W not suitable for series operation

Light colors

The LUMILUX® lamps

In combination with OSRAM ECGs, LUMILUX® fluorescent lamps offer very high efficiency and long reliable life. They are also perfect for combining with daylight dimmer systems and motion sensors. This leads to even greater energy savings.

LUMILUX®

Color 880 LUMILUX SKYWHITE®
Color 865 LUMILUX® Cool Daylight
Color 840 LUMILUX® Cool White
Color 835 LUMILUX® White
Color 830 LUMILUX® Warm White
Color 827 LUMILUX INTERNA®

LUMILUX® colors combine good color rendering and high luminous efficacy in a single lamp.

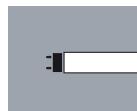

Major benefits:

- Reduced power consumption
- Luminous efficacy up to 116 lm/W (T5 HE ES)
- Very good color rendering to EN 12464 (R_a 80...89)

For LUMILUX® light colors it is best to use electronic control gear as this is the best way to make economic use of the minimal drop in luminous flux. This also applies to LUMILUX® DE LUXE.

LUMILUX® T5 HO, HE (including ES, XT, CONSTANT, SPS, CHIP control® and NATURA®) and FC® lamps can only be operated on ECGs.

Color 880 SKYWHITE® contains an increased blue component which is particularly energizing. Ideal for offices and public buildings.

LUMILUX® DE LUXE

Color 965 LUMILUX® DE LUXE Cool Daylight
Color 954 LUMILUX® DE LUXE Daylight
Color 940 LUMILUX® DE LUXE Cool White
Color 930 LUMILUX® DE LUXE Warm White

The LUMILUX® DE LUXE light colors meet the highest demands with regard to natural color rendering (R_a 90...99) and offer good luminous efficacy at the same time.

The daylight color 954 is ideal for print shops, dental surgeries, dental laboratories, slide presentations and clothing stores.

Special light colors

The red component of 76 OSRAM NATURA® is closely matched to other color components. This results in natural color rendering and makes items such as meat, sausages, delicatessen products, vegetables and flowers appear fresh and natural, without being unduly "beautified".

77 FLUORA® has been specially designed for plants and aquariums. Its light has an emphasis at the blue and red ends of the spectrum. It is therefore particularly good at promoting photo-biological processes. The result is healthier plants.

965 BIOLUX®

Because of its spectral distribution, the light from OSRAM BIOLUX® lamps is also excellent for raising small animals (birds, fish, reptiles, etc.).

Colors 60 Red, 66 Green and 67 Blue are ideal for creating decorative effects and special moods.

62 Yellow contains only a very small proportion of UV-A radiation. This light color is therefore suitable for clean-room production facilities, chip fabrication and lighting with minimal UV.

For spectral power distributions see pages 5.56 and 5.57.

COLOR proof

For museums and art galleries, dental laboratories, graphic workshops, photographic laboratories, and industrial testing and color matching facilities, light color 950 offers optimum color characteristics. It has a color rendering index of R_a =98 at a color temperature of 5300 K.

Technical data

How fluorescent lamps work

Fluorescent lamps are low-pressure gas discharge lamps. The glass tube is filled with an inert gas at low pressure and a small quantity of mercury. The glass wall is coated with a phosphor. At the ends of the glass tube are pasted electrodes. When an electrical charge is passed between them the mercury vapor emits UV radiation. When the UV radiation hits the phosphor the phosphor emits visible light. The color can be varied for different applications by selecting different phosphor mixes.

Luminous flux and power consumption to IEC 60081 and EN 50285

The minimum luminous flux of a single lamp is 92 % of the rated luminous flux at 25 °C; the average is 95 % of the rated luminous flux.

B10: B10 is defined as the time when 10 % of the lamps have failed (in standardized operation).

B50: Average life (B50) is defined as the time when 50 % of the lamps have failed (in standardized operation).

Lamp life. The average life and service life of LUMILUX® fluorescent lamps are listed in the table below. Operating the lamps above or below their rated power will reduce their service life.

Burning position. Universal for 26 and 38 mm diameters. When T5 HE and T5 HO lamps are installed in the vertical burning positions the stamp must be at the bottom; when T5 FC® lamps are installed in the vertical position the 2GX13 base must be at the bottom. In multi-lamp fixtures, T5 HE or T5 HO lamps must be positioned with the stamps next to one another. The recommended minimum spacing between two T5 lamps is 32 mm for optimum operation (maintenance of the luminous flux/temperature curve).

Lamp life in accordance with DIN IEC 60081

(IEC switching cycle 165 min on, 15 min off)	T8 LUMILUX special length	T8 LUMILUX standard length*	T8 LLX DE LUXE	T5 HE	T5 HO	T5 FC LUMILUX	T5 LLX DE LUXE
Service life on preheat ECG	16,000	18,000	16,000	18,000	18,000	8,000	18,000
Average life on preheat ECG	20,000	20,000	20,000	24,000	24,000	12,000	24,000

* (18 W, 36 W, 58 W and ES 16 W, 32 W and 51 W)

Service life is defined as the time when 80 % of the system luminous flux (relative to the 100 h value) is available.

All values for HE and HO at 35°C

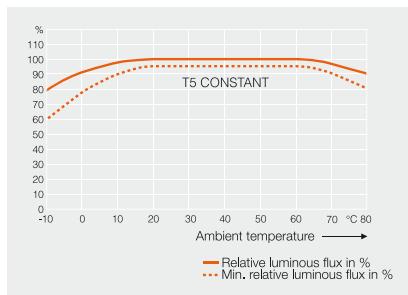

As with all fluorescent lamps, the fixture efficiency of T5 (16 mm) lamps is calculated at an ambient temperature of 25°C. In other words, the luminous flux of the lamp measured at 25°C and the luminous flux of the fixture measured at 25°C are used as the basis for calculating the fixture efficiency. Note that if measurements are taken with goniophotometers with moving lamps the high-speed air currents may cause the cool spot to shift from the stamp end of the lamp. Before the illuminance levels from T5 HE, T5 HO and especially FC® lamps are measured in lighting systems, these lamps must be allowed to stabilize for at least 100 hours. If two lamps are to be operated next to one another, make sure that the stamped ends are on the same side so that the cold spot is not heated.

Technical data

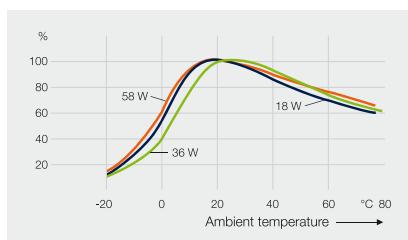

Temperature dependence

As with fluorescent lamps in general, the rated luminous flux for T5 HE and TE HO fluorescent lamps is specified at 25°C, and T5 HE and T5 HO achieve their maximum luminous flux at temperatures between 34 and 38°C. One of the advantages of T5 lamps is therefore an increased fixture efficiency. T5 FC® circular fluorescent lamps achieve their maximum luminous flux between 25 and 30°C. The luminous flux of a T5 HO CONSTANT at 25°C is on average 97% of the maximum luminous flux. 90% of the maximum luminous flux is achieved in a temperature range from +5°C to +70°C (for 49 W: +20°C to +80°C).

Control gear. In order to operate, each lamp needs control gear appropriate to its wattage. The control gear not only starts the lamp but also limits the current in the discharge phase. Please note: fluorescent lamps are guaranteed only if they are operated with approved control gear or with control gear declared to be suitable. Control gear must comply with EN standards. Modern control gear, such as QUICKTRONIC®, enables energy-saving fluorescent lamps to be operated with optimum economy and lighting comfort, see Section 9. Control gear for sale in the European Union must carry the ENEC mark (tested to IEC 60081). This safeguards the warranty for the lamps under normal conditions.

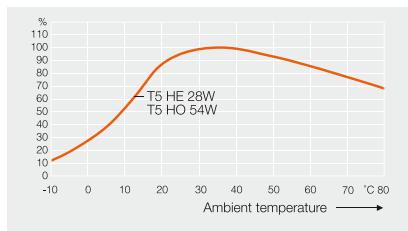

Circuits see circuit diagrams on page 5.55 and Section 9.

Power supply. Generally 230 V AC. The permissible voltage fluctuations for AC voltage is $\pm 10\%$, i.e. 207 V to 253 V. Electronic control gear is considerably less affected by fluctuations in the supply voltage than conventional control gear.

DC operation for emergency lighting systems in accordance with DIN VDE 0108 is indicated in the specifications for the electronic control gear.

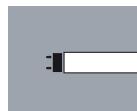

Accessories. Control gear and holders are available from electrical suppliers. OSRAM compact fluorescent lamps and fluorescent lamps are cadmium-free.

HCl® metal halide lamps with POWERBALL® ceramic technology

Product benefits

- Very high efficiency
- Good to excellent color rendering
- Very good color stability
- UV values significantly below the maximum permitted thresholds to IEC 61167 thanks to UV filter

Product features

- POWERBALL® ceramic technology
- UV filter technology
- Warm white light 830 WDL and neutral white light 942 NDL
- Average life of 15,000 hours on electronic control gear
- Average life of 12,000 hours on magnetic control gear

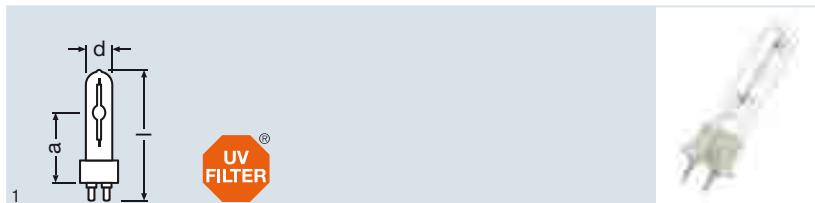

Applications

- Shop interiors, shop windows
- Shopping arcades
- Foyers, reception areas
- Museums and exhibitions
- Exhibition halls and trade fairs
- Factories and workshops
- Pedestrian zones, public squares
- Accent lighting

System guarantee

For the vast majority of our lamps we are offering an extended system guarantee in conjunction with OSRAM POWERTRONIC® control gear. For more information and the guarantee conditions go to www.osram.com/system-guarantee.

1) In preparation

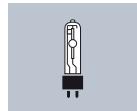

HCl® metal halide lamps with POWERBALL® ceramic technology

Product benefits

- Higher efficiency in comparison to HCl®-T (page 6.02)
- Better lumen maintenance in comparison to HCl®-T (page 6.02)
- Excellent color rendering
- Very good rendering of red tones
- Very good color stability
- UV values significantly below the maximum permitted thresholds to IEC 61167 thanks to UV filter

Product features

- POWERBALL® ceramic technology
- UV filter technology
- Warm white light 930 WDL
- Average life of 15,000 hours on electronic control gear
- Approx. 80 % lumen maintenance factor after 12,000 hours
- CRI ≥ 90

Applications

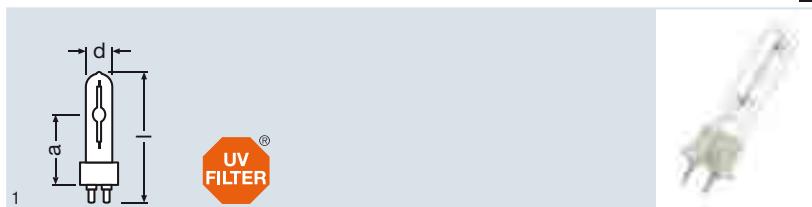

- Shop interiors, shop windows
- Shopping arcades
- Foyers, reception areas
- Museums and exhibitions
- Accent lighting

System guarantee

For the vast majority of our lamps we are offering an extended system guarantee in conjunction with OSRAM POWERTRONIC® control gear. For more information and the guarantee conditions go to www.osram.com/system-guarantee.

- Average life of 15,000 hours on electronic control gear
- Average life of 12,000 hours on magnetic control gear
- CRI ≥ 90

Applications

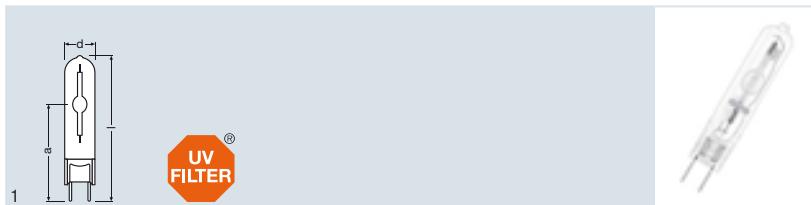

- Shop interiors, shop windows
- Foyers, reception areas
- Museums and exhibitions
- Accent lighting

System guarantee

For the vast majority of our lamps we are offering an extended system guarantee in conjunction with OSRAM POWERTRONIC® control gear. For more information and the guarantee conditions go to www.osram.com/system-guarantee.

POWERBALL® HCl®-TC for enclosed fixtures

Product reference	Product number	W	lm						Light No.
HCI-TC 20/830 WDL PB	4008321 683007	20	1700	G8.5	15	81	52	12	1

HCl® metal halide lamps with POWERBALL® ceramic technology

Product benefits

- Very high efficiency
- Good to excellent color rendering
- Very good color stability
- UV values significantly below the maximum permitted thresholds to IEC 61167 thanks to UV filter

Product features

- POWERBALL® ceramic technology
- UV filter technology
- Warm white light 830 WDL and neutral white light 942 NDL
- Average life of 15,000 hours on electronic control gear in h90 burning position
- Average life of 12,000 hours on magnetic control gear

Applications

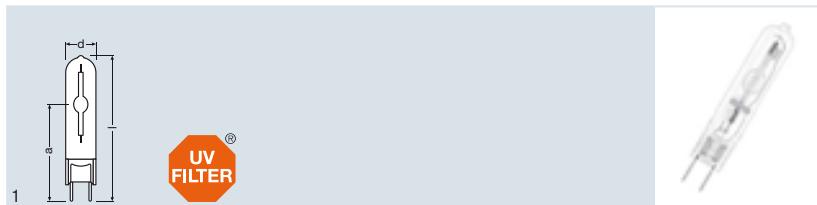

- Shop interiors, shop windows
- Shopping arcades
- Foyers, reception areas
- Museums and exhibitions
- Accent lighting
- Decorative lighting

System guarantee

For the vast majority of our lamps we are offering an extended system guarantee in conjunction with OSRAM POWERTRONIC® control gear. For more information and the guarantee conditions go to www.osram.com/system-guarantee.

POWERBALL® Plus HCI®-TC for enclosed fixtures

1) In preparation

HCI® metal halide lamps with POWERBALL® ceramic technology

Product benefits

- Higher efficiency in comparison to HCI®-TC (page 6.05)
- Better lumen maintenance in comparison to HCI®-TC (page 6.05)
- Excellent color rendering
- Very good rendering of red tones
- Very good color stability
- UV values significantly below the maximum permitted thresholds to IEC 61167 thanks to UV filter

Product features

- POWERBALL® ceramic technology
- UV filter technology
- Warm white light 930 WDL
- Average life of 15,000 hours on electronic control gear
- Approx. 80 % lumen maintenance factor after 12,000 hours
- CRI ≥ 90

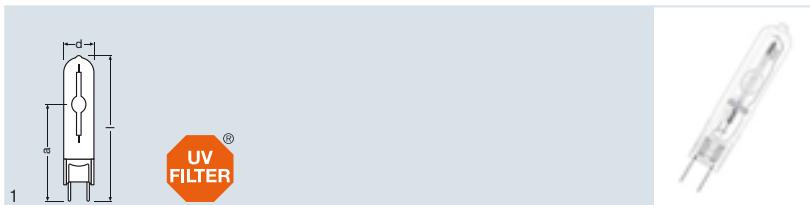

Applications

- Shop interiors, shop windows
- Shopping arcades
- Foyers, reception areas
- Museums and exhibitions
- Accent lighting
- Decorative lighting

System guarantee

For the vast majority of our lamps we are offering an extended system guarantee in conjunction with OSRAM POWERTRONIC® control gear. For more information and the guarantee conditions go to www.osram.com/system-guarantee.

POWERBALL® HCI®-TC Shoplight for enclosed fixtures

Product reference	Product number	W	lm		d max. [mm]	I [mm]	LCL a [mm]		Light No.
HCI-TC 35/930 WDL PB Shoplight	4008321682017	35	2800	G8.5	15	81	52	12	1
HCI-TC 70/930 WDL PB Shoplight	4008321681812	70	6300	G8.5	15	81	52	12	1

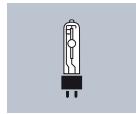

HCI® metal halide lamps with POWERBALL® ceramic technology

Product benefits

- Excellent color rendering
- Excellent rendering of red tones
- Very good color stability
- High efficiency
- UV values significantly below the maximum permitted thresholds to IEC 61167 thanks to UV filter
- Ideal for illuminating clothing and food

Product features

- POWERBALL® ceramic technology
- UV filter technology
- Warm white light 930 WDL Shoplight
- Average life of 15,000 hours on electronic control gear in h90 burning position
- Average life of 12,000 hours on magnetic control gear
- CRI ≥ 90

Applications

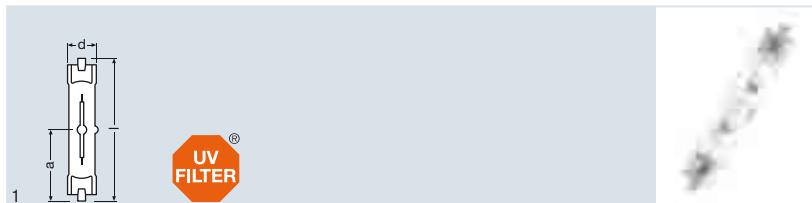

- Shop interiors, shop windows
- Foyers, reception areas
- Museums and exhibitions
- Accent lighting
- Decorative lighting

System guarantee

For the vast majority of our lamps we are offering an extended system guarantee in conjunction with OSRAM POWERTRONIC® control gear. For more information and the guarantee conditions go to www.osram.com/system-guarantee.

HCI® metal halide lamps with POWERBALL® ceramic technology

Product benefits

- Very high efficiency
- Simple lamp installation/replacement in open fixtures
- Optimum emission
- Good to excellent color rendering
- Very good color stability
- UV values significantly below the maximum permitted thresholds to IEC 61167 thanks to UV filter

Product features

- POWERBALL® ceramic technology
- UV filter technology
- Approved for use in open and enclosed fixtures
- Integrated reflector
- Warm white light 830 WDL and neutral white light 942 NDL

Applications

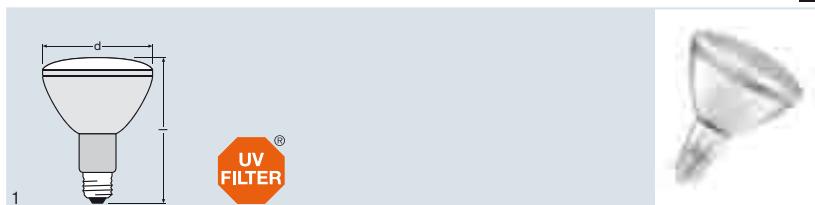

- Shop interiors, shop windows
- Shopping arcades
- Museums and exhibitions
- Industry
- Parks and gardens
- Buildings, monuments, bridges

System guarantee

For the vast majority of our lamps we are offering an extended system guarantee in conjunction with OSRAM POWERTRONIC® control gear. For more information and the guarantee conditions go to www.osram.com/system-guarantee.

HCl® metal halide lamps with POWERBALL® ceramic technology

Product benefits

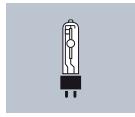

- High efficiency
- Good to excellent color rendering
- Very good color stability
- Easy relamping due to Twist & Lock base
- UV values significantly below the maximum permitted thresholds to IEC 61167 thanks to UV filter

Product features

- POWERBALL® ceramic technology
- UV filter technology
- Warm white light 830 WDL and 930 WDL
- Average life of 12,000 hours
- Twist & Lock base

Applications

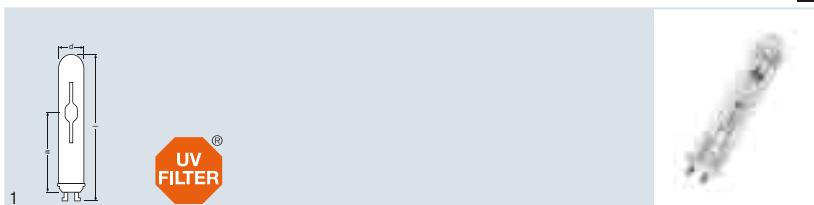

- Shop interiors, shop windows
- Shopping arcades
- Foyers, reception areas
- Museums and exhibitions
- Accent lighting
- Decorative lighting

System guarantee

For the vast majority of our lamps we are offering an extended system guarantee in conjunction with OSRAM POWERTRONIC® control gear. For more information and the guarantee conditions go to www.osram.com/system-guarantee.

- Foyers, reception areas
- Museums and exhibitions
- Exhibition halls and trade fairs
- Streets
- Pedestrian zones, public squares
- Parks and gardens

System guarantee

For the vast majority of our lamps we are offering an extended system guarantee in conjunction with OSRAM POWERTRONIC® control gear. For more information and the guarantee conditions go to www.osram.com/system-guarantee.

POWERBALL® HCI®-ET for enclosed fixtures

Product reference	Product number	W	lm	E27	d max. [mm]	l [mm]	24	No.
HCI-ET 70W/830 WDL PB	4008321 688286	70	7200	E27	70	156	24	1

HCI® metal halide lamps with POWERBALL® ceramic technology

Product benefits

- Very high efficiency
- Uniform distribution of light
- Good color rendering
- Excellent color stability
- Excellent lumen behavior throughout the life of the lamp
- Full output available soon after switching the lamp on
- Dimmable on POWERTRONIC® PTo 3DIM
- UV values significantly below the maximum permitted thresholds to IEC 61167 thanks to UV filter

Product features

- Lamp survival factor (LSF) $\geq 95\%$ after 12,000 hours
- POWERBALL® ceramic technology
- UV filter technology
- Warm white light 830 WDL
- Complies with the ignition requirements of IEC 60662
- Can be operated on existing NAV® fixtures

Applications

- Streets
- Factories and workshops
- Exhibition halls and trade fairs
- Car parks, courtyards
- Pedestrian zones, public squares
- Buildings, monuments, bridges

Note

Where possible, use a timer igniter (switch-off time of at least 15 minutes). Otherwise, switch off the fixture for at least 15 minutes if a brief interruption has occurred to the power supply.

System guarantee

For the vast majority of our lamps we are offering an extended system guarantee in conjunction with OSRAM POWERTRONIC® control gear. For more information and the guarantee conditions go to www.osram.com/system-guarantee.

1) Operate on NAV® control gear | In preparation | Operate only on suitable hot restrike igniters with an ignition voltage of up to 25 kV

2) Operate with NAV® control gear

HCI® metal halide lamps with POWERBALL® ceramic technology

Product benefits

- Very high efficiency
- Excellent color rendering
- Excellent color stability
- Much more compact than other discharge lamps of the same output
- Same light center length (LCL) as HQI®-TM 600 W and 1000 W
- Approved for hot restrike (with GY22)
- G22/GY22 plug-in base for good positioning
- UV values significantly below the maximum permitted thresholds to IEC 61167 thanks to UV filter

Product features

- POWERBALL® ceramic technology
- Warm white light 830 WDL and neutral white light 942 NDL
- Average life of 12,000 hours
- Approved for use only in enclosed fixtures
- UV filter technology

Applications

- Foyers, reception areas
- Museums and exhibitions
- Factories and workshops
- Exhibition halls and trade fairs
- Sports halls and multi-purpose halls
- Industrial installations
- Rail stations, overground and underground
- Pedestrian zones, public squares

POWERSTAR® HQI®-R for enclosed fixtures

1) at 25 mm | at 10 mm

Metal halide lamps POWERSTAR® HQI® with quartz technology

Product benefits

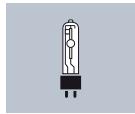

- For compact optical systems with high efficiency
- Optimum adjustment
- Low thermal load on the light guide
- Quick and easy lamp replacement
- UV values significantly below the maximum permitted thresholds to IEC 61167 thanks to UV filter

Product features

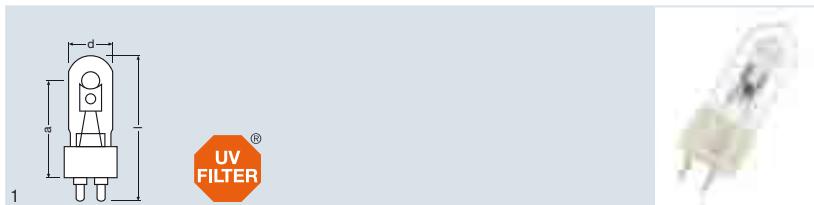

- POWERSTAR® quartz technology
- UV filter technology
- Neutral white light NDL
- Average life of 9,000 hours

Applications

- Fiber-optic systems

POWERSTAR® HQI®-T with G12 base for enclosed fixtures

Product reference	Product number	W	lm		d max. [mm]	I [mm]	LCL 8 [mm]	Light No.
HQI-T 70/WDL	4008321974341	70	5300	G12	25	84	56	1
HQI-T 70/NDL	4008321974327	70	5800	G12	25	84	56	1

HQI-T 150/NDL	4008321974365	150	13000	G12	25	84	56	1

Metal halide lamps POWERSTAR® HQI® with quartz technology

Product benefits

- High efficiency
- Good to excellent color rendering
- UV values significantly below the maximum permitted thresholds to IEC 61167 thanks to UV filter

Product features

- POWERSTAR® quartz technology
- UV filter technology
- Warm white light WDL and neutral white light NDL
- Average life of 9,000 hours

Applications

- Shopping arcades
- Exhibition halls and trade fairs
- Factories and workshops
- Pedestrian zones, public squares
- Buildings, monuments, bridges

Note

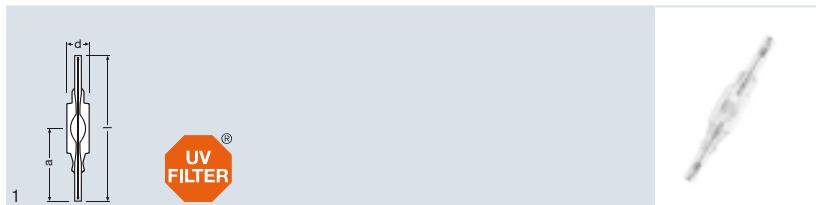

Burning position: For the horizontal burning position, mount the holder so that the lamp electrodes are not arranged one on top of the other.

System guarantee

For the vast majority of our lamps we are offering an extended system guarantee in conjunction with OSRAM POWERTRONIC® control gear. For more information and the guarantee conditions go to www.osram.com/system-guarantee.

Metal halide lamps POWERSTAR® HQI® with quartz technology

Product benefits

- High efficiency
- Uniform distribution of light
- Good to excellent color rendering
- Hot restrike capable

Product features

- POWERSTAR® quartz technology
- UV filter technology
- Warm white light WDL, neutral white light NDL, daylight D and cool daylight CD
- Average life of 12,000 hours

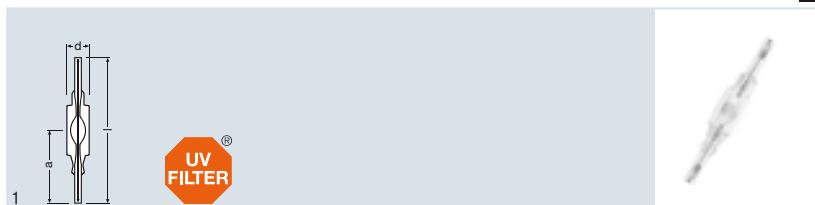

Applications

- Shop interiors, shop windows
- Shopping arcades
- Foyers, reception areas
- Buildings, monuments, bridges
- Museums and exhibitions
- Exhibition halls and trade fairs
- Pedestrian zones, public squares
- Parks and gardens

System guarantee

For the vast majority of our lamps we are offering an extended system guarantee in conjunction with OSRAM POWERTRONIC® control gear. For more information and the guarantee conditions go to www.osram.com/system-guarantee.

Metal halide lamps POWERSTAR® HQI® with quartz technology

Product benefits

- High efficiency
- Uniform distribution of light
- High color saturation (up to 66 %) in blue, magenta and green
- Hot strike capable

Product features

- POWERSTAR® quartz technology
- UV filter technology
- Average life of 12,000 hours

Applications

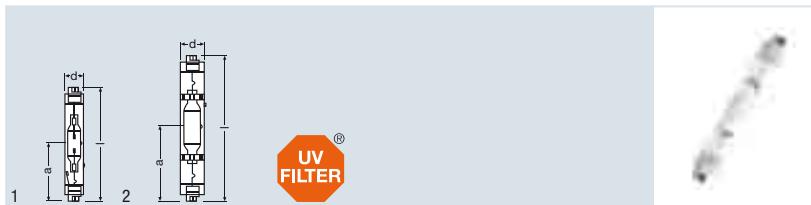

- Buildings, monuments, bridges
- Decorative lighting with the need for long operating times
- Parks and gardens

System Guarantee

For the vast majority of our lamps we are offering an extended system guarantee in conjunction with OSRAM POWERTRONIC® control gear. For more information and the guarantee conditions go to www.osram.com/system-guarantee.

2) Operate with NAV® control gear

Metal halide lamps POWERSTAR® HQI® with quartz technology

Product benefits

- High efficiency
- Uniform distribution of light
- Excellent color rendering
- Long life
- Hot restrike capable
- UV values significantly below the maximum permitted thresholds to IEC 61167 thanks to UV filter

Product features

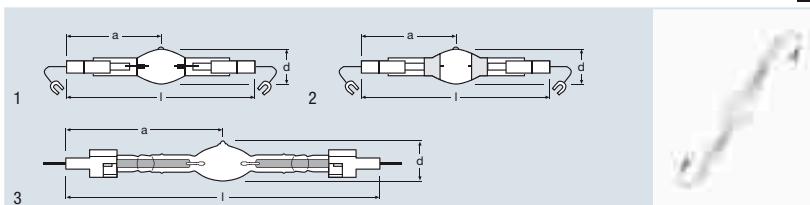

- POWERSTAR® quartz technology
- Warm white light WDL, neutral white light NDL and daylight D
- Approved for use only in enclosed fixtures
- UV filter technology

Applications

- Foyers, reception areas
- Factory and hall lighting with low-cost installations
- Exhibition halls and trade fairs
- Sports halls and multi-purpose halls
- Pedestrian zones, public squares
- Parks and gardens
- Buildings, monuments, bridges

Metal halide lamps POWERSTAR® HQI® with quartz technology

Product benefits

- High efficiency
- Excellent color rendering
- Excellent color stability
- Small loss of luminous flux over the life of the lamp
- Hot restrike capable
- Compact dimensions for small spotlights

Product features

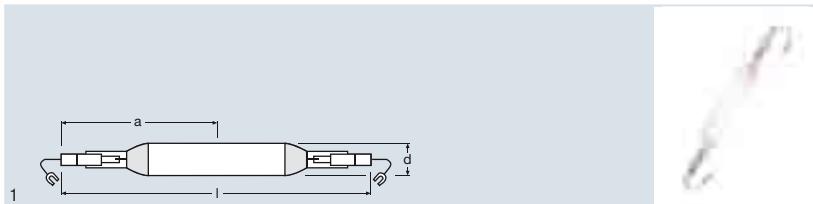

- POWERSTAR® quartz technology
- Neutral white light NDL and daylight D
- Approved for use only in enclosed fixtures
- K12s base for good positioning

Applications

- Sports stadiums and floodlight systems
- Sports halls and multi-purpose halls
- Airports
- Solar simulation, material testing

POWERSTAR® HQI®-TS long arc, without outer bulb for enclosed fixtures

Product reference	Product number	W	lm	d max. [mm]	I [mm]	LCL	A [mm]	Light No.
HQI-TS 2000W/N/L	4008321530660	2000	230000	K12s-36	32	274	137	10

Metal halide lamps POWERSTAR® HQI® with quartz technology

Product benefits

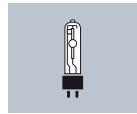

- Very high efficiency
- Very high luminous flux
- Long life
- Can be used with conventional igniters and control gear
- Ideal for compact floodlights

Product features

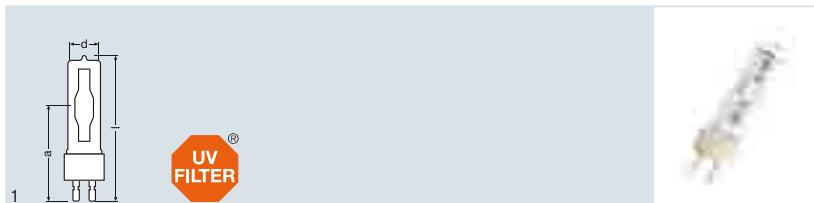

- POWERSTAR® quartz technology
- Approved for use only in enclosed fixtures
- K12s base for good positioning

Applications

- Sports stadiums and floodlight systems
- Industrial installations
- Airports
- Docks and port facilities
- Marshaling yards, container transshipment facilities

3) In preparation

4) In preparation | Operate only on suitable hot restart igniters with an ignition voltage of up to 25 kV

Metal halide lamps POWERSTAR® HQI® with quartz technology

Product benefits

- Very high efficiency
- Good to excellent color rendering
- Excellent color stability
- Much more compact than other discharge lamps of the same output
- Same light center length (LCL) as HQI®-TM 250 W and 400 W
- Approved for hot restart (with GY22)
- G22/GY22 plug-in base for good positioning

Product features

- POWERSTAR® quartz technology
- Neutral white light NDL and daylight D
- Average life of 10,000 hours
- Approved for use only in enclosed fixtures
- UV filter technology

Applications

- Factories and workshops
- Sports halls and multi-purpose halls
- Sports stadiums and floodlight systems
- Industrial installations
- Airports
- Buildings, monuments, bridges
- Marshaling yards, container transshipment facilities
- Docks and port facilities

VIALOX® NAV®-E SUPER 4Y® high-pressure sodium vapor lamps

Product benefits

- Dimmable on CCGs and ECGs
- Optimum energy efficiency on POWERTRONIC® PTo 3DIM ECGs
- Up to 25% longer life than standard lamps
- Greater reliability than standard lamps
- Up to 20% higher luminous efficacy than standard lamps
- Greater mast spacing possible than with standard lamps
- Better luminous flux maintenance than standard lamps
- 4-year relamping cycle

Product features

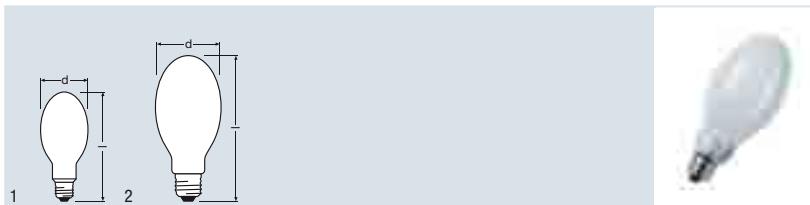

- Lamp survival factor (LSF) $\geq 95\%$ after 16,000 hours (for $P \geq 70W$)
- All wattages are ErP-compliant

Applications

- Industrial installations
- Streets
- Tunnels, underpasses
- Car parks, courtyards
- Parks and gardens
- Buildings, monuments, bridges

VIALOX® NAV®-E Plug-in high-pressure sodium vapor lamps

Applications

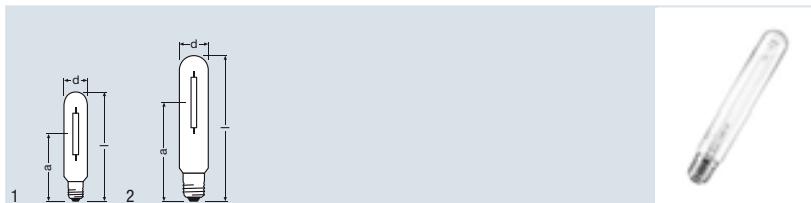

- Industrial installations
- Streets
- Car parks, courtyards
- Parks and gardens

Note

The lamps can be used in fixtures for HQL® 80W, 125W, 250W, or 400W mercury vapor lamps without any modifications to the existing components, provided the control gear is suitable for the higher operating current of the NAV® lamps. Check that the maximum permissible winding temperatures as defined in VDE and IEC specifications are not exceeded. If in doubt, consult the manufacturer of the fixture and/or control gear.

1) In accordance with Directive 2009/125/EC (ErP)

VIALOX® NAV®-T SUPER 4Y® high-pressure sodium vapor lamps

Product benefits

- Dimmable on CCGs and ECGs
- Optimum energy efficiency on POWERTRONIC® PTo 3DIM ECGs
- Up to 25 % longer life than standard lamps
- Greater reliability than standard lamps
- Up to 20 % higher luminous efficacy than standard lamps
- Greater mast spacing possible than with standard lamps
- Better luminous flux maintenance than standard lamps
- 4-year relamping cycle

Product features

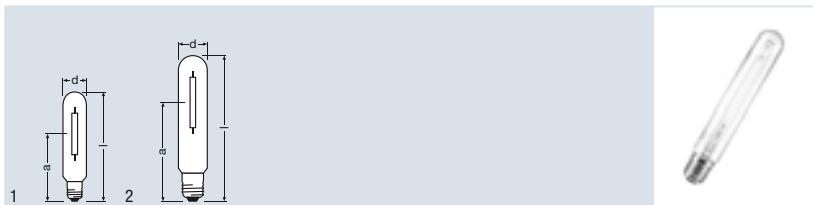

- Lamp survival factor (LSF) $\geq 95\%$ after 16,000 hours (for $P \geq 70\text{W}$)

Applications

- Industrial installations
- Streets
- Tunnels, underpasses
- Car parks, courtyards
- Parks and gardens
- Buildings, monuments, bridges

VIALOX® NAV®-T 4Y®

Product reference	Product number	W	lm		d max. [mm]	I [mm]	LCL a [mm]		No.
NAV-T 70 4Y	4050300579061	70	6000	E27	38	156	104	12	1

VIALOX® NAV®-T 4Y® high-pressure sodium vapor lamps

Product benefits

- Up to 25 % longer life than standard lamps
- Greater reliability than standard lamps
- 4-year relamping cycle

Product features

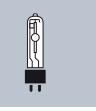

- Lamp survival factor (LSF) ≥ 95 % after 16,000 hours

Applications

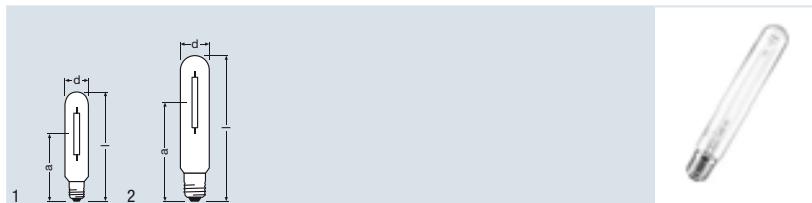

- Industrial installations
- Streets
- Tunnels, subways
- Car parks, courtyards
- Parks and gardens
- Buildings, monuments, bridges

Note

- None of the wattages will be ErP-compliant after April 2012. For more information on ErP compliance see www.osram.com/the-better-light

VIALOX® NAV®-T (Standard)

VIALOX® NAV®-T (Standard) high-pressure sodium vapor lamps

Product features

- Lamp survival factor (LSF) $\geq 95\%$ after 12,000 hours (for $70\text{ W} \leq P \leq 400\text{ W}$)

Applications

- Industrial installations
- Streets
- Tunnels, subways
- Car parks, courtyards
- Parks and gardens
- Buildings, monuments, bridges

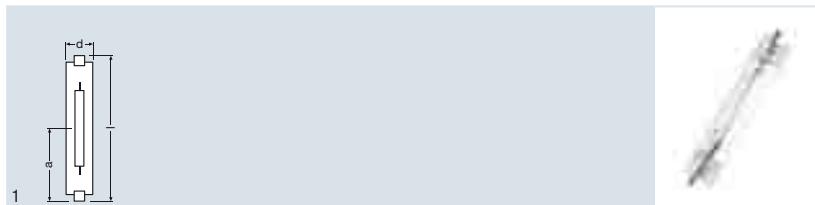

Note

- None of the wattages will be ErP-compliant after April 2012 (except NAV®-T 1000W). For more information on ErP compliance see www.osram.com/the-better-light

VIALOX® NAV®-TS SUPER 4Y®

PLANTASTAR 600/400	4008321284303	600	87000	E40	47	285	175	12	1

PLANTASTAR® lamps are ideal for additional lighting in the professional horticulture sector because they stimulate assimilation and growth in plants. This is particularly relevant for the production of cut flowers, vegetables, pot plants and seedlings.

Product benefits

- Shorter production times
- Healthier plants
- Control over blossoming

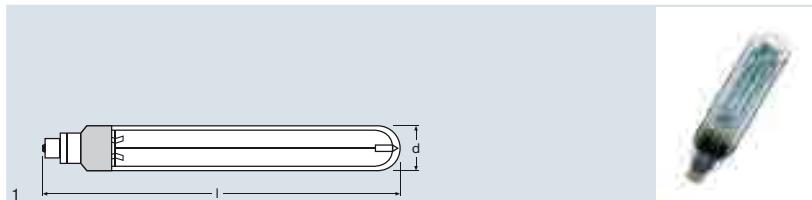

Product features

- Average life of 12,000 hours

Applications

- Greenhouses

Low-pressure sodium lamps – SOX

1) No control gear or igniters required

HWL® mercury mixed-light lamps

Product benefits

HWL® lamps can be used instead of incandescent lamps because they do not need either control gear or igniters.

Applications

- Factory and hall lighting with low-cost installations
- Upgrading light fittings with high-wattage incandescent lamps
- Factories and workshops
- Pedestrian zones, public squares

Relative spectral power distribution of discharge lamps

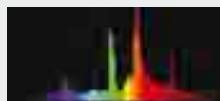

Visible range from 380 to 780 nm, relative spectral emission per 5 nm.

1) In preparation. 2) Operate on NAV® control gear. 3) Operate only on electronic control gear. 4) Typical value at rated voltage and $\cos \phi \geq 0.9$. 5) For the horizontal burning position, mount the holder so that the lamp electrodes are not arranged one on top of the other. 6) Axial luminous intensity cd. 7) Operate only with NAV® control gear. 8) Operate only on 12.2 A control gear. 9) Operate only on suitable hot restart igniters with an ignition voltage of up to 25 kV. 10) Operate with HQ® control gear. 11) Lamps ignite at an ignition voltage of 0.9 to 1.3 kVs. Lamps must not be operated with 4 to 5 kV igniters. 12) Operation without an external igniter. 13) Color shifts are possible in the base-down burning position. 14) Lamps ignite at an ignition voltage of 0.56 to 1 kVs; lamps must not be operated with an ignition voltage >1.5 kVs. 15) Important: Before changing to NAV® standard lamps in existing installations, check that the igniters are suitable. 16) No igniter required. 17) Lamps require igniters with an ignition voltage of 4 to 5 kVs. 18) Value resulting from operating the lamp with a high-reactance transformer. 19) No control gear or igniters required. 20) For circuit diagrams see page 6.54. 21) See operating instructions: "Photometric and electrical data." 22) Provisional value.

Operating instructions

Power supply

Suitable control gear is required to operate the lamps. This may be chokes or electronic control gear. For chokes, the tap provided for the available supply voltage (usually 230 V AC at 50 Hz) must be used. If a different supply voltage is used, control gear with appropriate taps designed for these voltages must be used.

Permitted line voltage deviation

The permitted line voltage deviation for HQL® is $\pm 10\%$ and for HCl®, HQI® and NAV® is $\pm 3\%$. Sudden fluctuations in the line voltage of more than $\pm 10\%$ may cause the lamps to go out. If the deviation from rated supply voltage (230 V or 400 V) is permanent without an adjusted choke tap, high intensity discharge lamps may exhibit changes in chromaticity and luminous flux. Lamp life may also be reduced.

Safety

OSRAM high intensity discharge lamps meet the safety requirements defined in IEC 62035 and IEC 61167.

Because of their high operating pressure the following lamps may only be used in fully enclosed fixtures designed to take them. In the rare case that a discharge vessel shatters, the fixture must be able to retain all the hot pieces of ceramic or glass throughout its life.

This relates to the following lamps:

- All HCl®-T and HQI®-T lamps
- All HCl®-TM and HQI®-TM lamps
- All HCl®-TC lamps
- All HQI®-TF lamps
- All HCl®-TS and HQI®-TS lamps
- All HCl®-TT and HCl®-ET lamps
- All HQI®-E lamps
- HQI®-R 150 W/NDL lamps

 Operating lamps with a damaged outer bulb is dangerous and therefore not permitted. At the end of their lives, sodium high-pressure lamps and metal halide lamps exhibit a "rectification" effect. This is not a manufacturer-specific effect. Because of the excessive DC components, the lamp operating equipment (control gear, transformers and/or starters) may be overloaded. To meet the requirements of IEC 62035 therefore, suitable protective measures must be taken to ensure that safety is maintained under these conditions. This applies also to control gear with the option of power reduction. NAV® PLUG-IN lamps have been developed specially as substitutes for mercury vapor lamps in existing fixtures and are therefore not affected. The chokes and pf correction capacitors generally needed for operating discharge lamps may, under certain conditions, create oscillating circuits. These circuits may then produce excessive currents and voltages, which in turn can destroy the lamps, control gear and capacitors. Such resonance phenomena must be avoided by appropriate circuits and fuses.

Lamp operation

Operating high intensity discharge lamps for short periods in combination with frequent on/off switching will shorten their life. The lamps should be operated for at least 3 hours and should remain off for at least 30 minutes. This applies in particular to HQI® ≥ 1000 W. NAV® lamps are not suitable for short on/off cycles but should burn for at least 5 minutes. In low-temperature applications down to -50°C only HCl®, HQI® and NAV® lamps are suitable for operation with an external igniter. Such applications call for special (heatable) igniters such as MZN 400 SU-LT from BAG Turgi (for lamps from 100 to 400 W) and similar igniters from other manufacturers.

The following lamps are suitable for open fixtures:

- All HCl®-E/P, HCl®-PAR and HCl®-TX/P lamps
- All HQI®-E/P lamps

Fixture design

Fixtures must comply with the EN 60598 standard design (thermal characteristics and fuse protection). HQI® 1000 W to 2000 W lamps should be held without pressure or by means of a lamp support close to the crown end. The same applies to NAV®-T 1000 W lamps in the horizontal burning position. In particular, no radiation must be reflected onto the sensitive parts of the lamp. This may cause thermal overloads, which in turn will generally lead to premature failure. For a detailed description and instructions on how to avoid problems see the brochure entitled "Metal halide lamps. Notes on handling and applications" on the internet at www.osram.com/hid-general-downloads.

Operating instructions

Control gear

HWL®:

No control gear required; connect directly to power supply.

HCI®, HQI®, HQL®, NAV®:

- Control gear:

< 220 V high-reactance transformer
≥ 220 V choke

For HCI®, HQI® and NAV® lamps, control gear with suitable overload protection should be used (see Safety).

- Igniters: HCI®, HQI® and NAV® lamps also need an appropriate igniter.

Exceptions:

- HQI®-T 2000/N
- HQI®-T 2000/D/I
- NAV®-E 50/I 4Y®
- NAV®-E 70/I 4Y®
- NAV®-E 50/I
- NAV®-E 70/I
- NAV®-E 110
- NAV®-E 210
- NAV®-E 350

NAV® SUPER lamps require igniters with a higher ignition energy.

With suitable igniters or operating equipment HCI®, HQI® and NAV® lamps can be instantly restarted while hot. For more information see Restarting.

SOX, SOX-E:

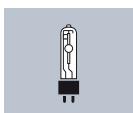

Operation with high-reactance transformers (except SOX 18 tapped choke and 5 µF ignition capacitor) or hybrid control gear.

For the distances between the lamp and the control gear, check the information provided by the equipment manufacturer.

Start-up current

HCI®, HQI®, NAV®, HQL®:

Depending on the control gear used, the start-up current may be up to twice as high as the operating current.

Circuit protection

Fuses for HCI®, HQI® and NAV® lamps must be slow-acting. If fuse-wire is used it should be rated for twice the rated lamp current. If MCBs are provided they should comply with characteristic "C".

Holders

The holders used must be capable of withstanding the high voltages that occur during ignition and hot restrikes. Suitable high-voltage holders can be ordered from lampholder manufacturers. A retainer is recommended for outdoor applications to prevent them coming loose (IEC 60238).

Power factors

(without correction)

- HWL®: cos φ~1
- HCI®, HQI® and HQL®: cos φ 0.5 to 0.7
- NAV®: With chokes cos φ 0.5
- SOX, SOX-E: cos φ~0.3 (SOX 18: cos φ~0.9)

For the PFC capacitors required check the manufacturer's specifications. For examples see pages 6.43 to 6.49.

Power reduction

HQI® lamps must not be operated at reduced wattage as this may result in color shifts, poorer maintenance and shorter lamp life. In principle, dimming of HCI® POWERBALL® lamps is technically feasible. The higher thermal load capacity of the round ceramic burner offers better dimming behavior in terms of luminous efficacy and color rendering compared to metal halide lamps with quartz burners or cylindrical ceramic burners.

As before, however, dimming does lead to a change in the chromaticity coordinates. Lamps operated at dimmed settings suffer a greater loss of luminous flux and a greater color shift over their lifetime. These effects are unwanted particularly in indoor lighting. They are more pronounced in CGG mode than in ECG mode.

Operating instructions

OSRAM therefore advises against dimming in CCG mode and in indoor lighting for lamps currently available.

The method of dimming has a strong influence on the results. It is advisable to reduce the lamp power with a controllable square-wave ECG; dimming should not be achieved by reducing the voltage or by leading-edge phase dimming. The product characteristics cannot be guaranteed for lamps that are operated at dimmed settings.

The combination of POWERBALL® HCI® and POWERTRONIC® PTo offers energy-saving operation wherever optimum color rendering is not essential for outdoor lighting.

PTo with square-wave operation and optimized ignition operates POWERBALL® HCI® lamps at optimum performance down to 60% of rated lamp output. There are no significant adverse effects even if power is reduced to 85% of rated output.

Operation between 85% and 60% of rated lamp output also has no impact on the failure rate. The lamps increasingly exhibit a slight green tinge and may differ from one another in terms of their color (color spread). Luminous flux decreases over the life of the lamp at a faster rate in dimming mode than at 100% output on PTo. This effect can be reduced by mixed operation involving dimming mode and 100% mode.

NAV® and HQL® lamps can be operated at up to 50% lower wattage by changing the impedance, provided ignition takes place at rated wattage.

Switch-on

HWL®:	Instant full luminous flux. Starting current approx. 30% higher
HQL®:	Full luminous flux after approx. 5 minutes. Starting current approx. 40% higher
HCI®:	Full luminous flux after approx. 1 to 3 minutes. Starting current approx. 40% to 90% higher – depending on lamp type and control gear
HQI®:	Full luminous flux after approx. 2 to 4 minutes. Starting current approx. 40% to 90% higher – depending on lamp type and control gear
NAV®:	Full luminous flux after approx. 6 to 10 minutes depending on lamp type and control gear. Starting current approx. 25% higher
SOX, SOX-E:	Full luminous flux after approx. 12 to 15 minutes. Or longer at low ambient temperatures. No higher starting current.

Restarting

HCI®, HQI®, NAV®, HQL®, HWL®:

These lamps need a little time (0.25 to 15 minutes) to cool down before they can be restarted because the ignition voltage to begin with would be higher than the supply voltage or, in the case of HCI®, HQI® and NAV®, above the ignition voltage of the igniter. Instant restarting is possible with suitable igniters for the following lamps:

HQI® TS EXCELLENCE

HQI®-TS (exception: HQI®-TS 2000W/N/L)

HCI®/HGI®-TM...HR (HR – Hot Restrike)

NAV®-TS

The necessary restrike voltage is 25 to 60 KV.

SOX, SOX-E:

SOX 18 lamps can be instantly restarted. All other SOX lamps need a cooling time of a few minutes before they can be restarted.

Radio interference

After ignition, radio interference does not normally occur with high pressure lamps. Should radio interference occur with HQL® lamps it can be avoided by connecting a low induction capacitor of 0.1 µF parallel to the lamp. Capacitors must not be connected parallel to any other high-pressure lamp. The requirements of DIN EN 50160 must be met.

Operating instructions

Photometric and electrical data

All lamp-specific electrical and photometric data is measured after 100 hours of operation under laboratory conditions on reference equipment. For HCl® lamps the specified values relate to the horizontal burning position for TS types and to the base-up burning position for other types, unless otherwise indicated. For HQI® lamps the specified values apply to the horizontal burning position for -T and -TS types and for the base-up burning position for -E and -TM types, unless otherwise indicated. NAV® lamps are all measured in the horizontal burning position, and HQ and HW lamps in the base-up position. In other burning positions there may be considerable differences in the measured values, particularly the luminous flux, color temperature and life. With the exception of SOX, the luminous flux is virtually unaffected by the ambient temperature outside the fixture. At low ambient temperatures down to around -50 °C special igniters are needed.

All POWERBALL® HCl®-TS ..., POWERSTAR® HQI®-TS ... and VIALOX® NAV®-TS ... lamps achieve their rated data at relatively high ambient temperatures, such as those in typical fixtures or fixture simulators. Detailed information on thermal protection tubes (fixture simulators) for determining lamp data for HQI®-TS and HCl®-TS can be found in IEC 61167, Annex B.6. NAV®-TS ... lamps should be treated similarly.

Color shift

HCl® and HQI® lamps may show color shifts from lamp to lamp. These shifts may be due to external influences such as the line voltage, control gear, burning position or fixture design.

End of life

High intensity discharge lamps (HCl®, HQI®, NAV® and HQL®) can be considered to have reached the end of their life if:

- there is a marked change in their color or
- there is a significant loss of brightness or
- the lamp no longer ignites or
- the lamp periodically goes out and comes on again.

To protect the control gear and to avoid unnecessary radio interference, HCl®, HQI®, NAV® and HQL® lamps must be replaced as soon as they reach the end of their life.

Guarantee

High intensity discharge lamps are only guaranteed if the prescribed operating conditions are observed; in other words, in particular if the maximum permissible lamp temperatures are not exceeded and the lamps are operated only on appropriate control gear. In addition, the lifetimes specified by OSRAM apply only to operation in fixtures that do not reflect radiation onto the lamp (see Fixture design, page 6.50).

OSRAM System® Guarantee for HCl®/HGI®/NAV® lamps and POWERTRONIC® ECGs

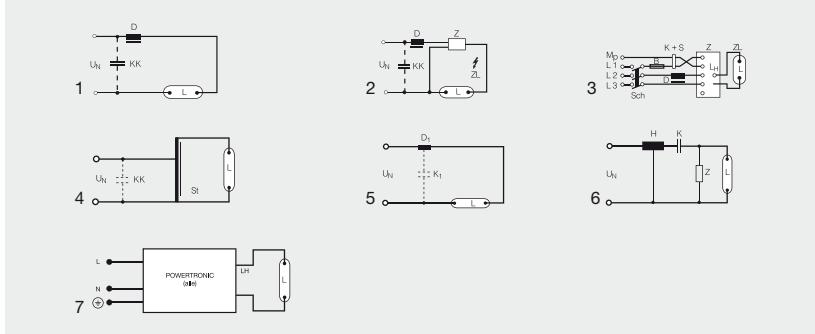

POWERTRONIC® control gear from OSRAM enables high intensity discharge lamps to be operated with perfect results and a high degree of intelligence.

For system operation you get an extended guarantee on the POWERTRONIC® ECG and on the relevant HCl®/HGI®/NAV® lamp.

For detailed usage and guarantee conditions and a registration form go to www.osram.com/system-guarantee.

Circuit diagrams

1) LCL = light center length (distance from the coil to the lug of base)

2) 2% failure rate within 16,000 hours. This is restricted to failures due to lamp faults.

3) Only the permissible burning positions may be used otherwise the lamp will fail prematurely

Thanks to continual improvements, low-voltage halogen lamps from OSRAM now offer an excellent set of properties.

Product benefits

- 2-year replacement cycle
- Life of approx. 16,000 hours (taking into account the entire service life in the signal)
- Maximum of 2% premature failure rate (failures due to lamp faults only)
- Reduction in maintenance costs for the signaling system thanks to long lamp life
- Can be used in standard installations without the need for upgrades or adjustments

Applications

- Road traffic light signaling systems

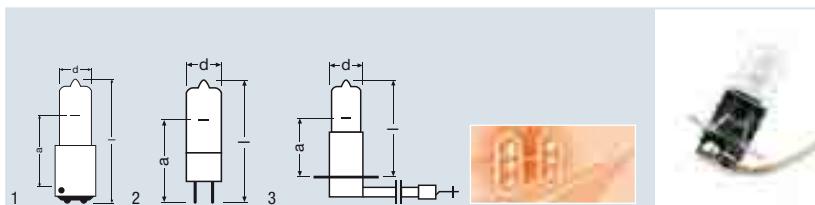

Legal notices

Compliance with DIN 49842 Parts 1 and 3 and DIN 67527-1

Operating instructions

All halogen signal lamps operate at high temperature and pressure. They may therefore only be operated in signal equipment/fixtures specially designed for the purpose. Make sure that the lamps are protected against moisture during operation and in particular during relamping. When installing a new lamp, handle it by its protective cardboard sleeve.

Low-voltage halogen lamps for road traffic

Product reference	Product number Single pack	V TEST	W	lm	t [h]

1) On request

2) Particularly suitable for use in fibre-optic traffic signals

3) LCL = light center length (distance from the coil to the lug of base)

4) Average life

5) Only the permissible burning positions may be used otherwise the lamp will fail prematurely! Lamps with transverse filaments should only be inclined perpendicular to the filament plane

Product benefits

- Low-voltage halogen lamp, therefore capable of very high luminous flux
- Almost point-like light source for optimum focusing in the reflector
- Virtually constant luminous flux throughout the life of the lamp
- Very long life compared to conventional lamps

Applications

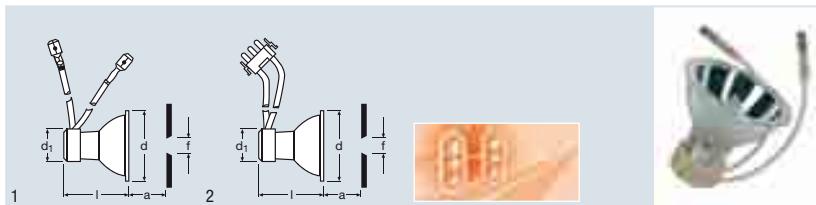

- Road traffic light signaling systems

Operating instructions

All halogen signal lamps operate at high temperature and pressure. They may therefore only be operated in signal equipment/fixtures specially designed for the purpose. Make sure that the lamps are protected against moisture during operation and in particular during relamping. When installing a new lamp, handle it by its protective cardboard sleeve.

1) For rail signals

2) Measured behind the aperture of 10.2 mm Ø = W fiber bundle

3) Average life at test voltage/current

Product benefits

- Fixed adjustment of the halogen burner with regard to the reflector leads to high axial luminous intensity
- Virtually constant axial luminous intensity thanks to high-quality coating on the reflector
- Very long life thanks to the halogen burner
- Connecting cables equipped with contacts and insulation that are highly resistant to corrosion and heat

Applications

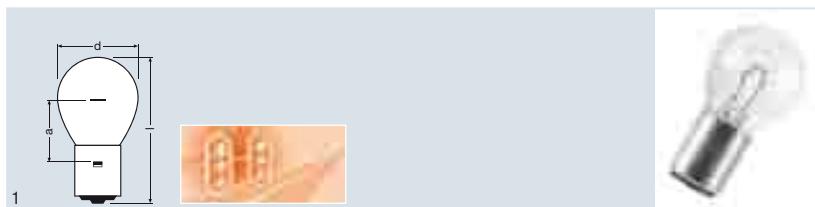

- Road and rail traffic signals

Operating instructions

All halogen signal lamps operate at high temperature and pressure. They may therefore only be operated in signal equipment/fixtures specially designed for the purpose. Make sure that the lamps are protected against moisture during operation and in particular during relamping.

Low-voltage overpressure lamps in 10 V technology for road traffic

Product reference	Product number Single pack	V TEST	W	lm		
SIG 1227	4008321903990	10.5	22	270	s135 ²⁾	BA20s
SIG 1238	4008321904003	10.5	30	400	s135 ²⁾	BA20s
SIG 1259	4050300831770	10.5	45	600	s135 ²⁾	BA20s
Product reference	d [mm]	I [mm]	LCL a [mm]	Product number Standard pack		No.
SIG 1227	36	67	31 ¹⁾	4050300235028	200	1
SIG 1238	36	67	31 ¹⁾	4050300253091	200	1
SIG 1259	36	67	31 ¹⁾	4050300253633	100	1

1) LCL = light center length (distance from the coil to the lug of base)

2) Lamps with transverse filaments should only be inclined perpendicular to the filament plane! Only the permissible burning positions may be used otherwise the lamp will fail prematurely

Product benefits

- Much higher luminous efficacy than high-voltage signal lamps
- Significant increase in lamp quality thanks to inert gas filler and higher gas pressure
- Reduction in the energy consumption of signaling systems
- High resistance to shock and vibrations compared to high-voltage signal lamps
- Maximum of 2% premature failure rate up to 4,400 hours (failures due to lamp faults only)
- Benefits also apply to existing 230 V signaling systems after upgrading. For this, the lamp and reflector have to be replaced and a transformer installed.

Applications

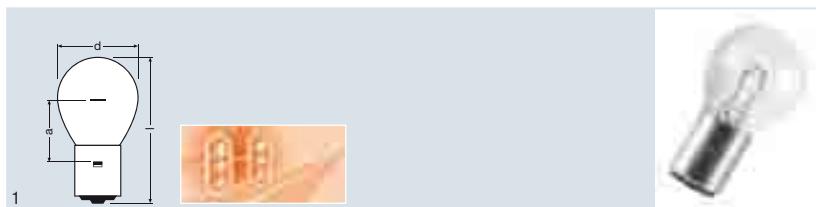

- Road traffic light signaling systems

Operating instructions

Operate only in approved fixtures/signals. Protect the lamps against moisture during operation and in particular during relamping.

Low-voltage LONGLIFE lamps in 10 V technology for road traffic equipment

Product reference	Product number Single pack	V TEST	W	lm		
SIG 1227 LL	4008321037695	10.5	22	270	s135 ²⁾	BA20s
SIG 1238 LL	4008321037701	10.5	30	400	s135 ²⁾	BA20s

SIG 1238 LL	36	67	31 ¹⁾	4050300790503	200	1

1) LCL = light center length (distance from the coil to the lug of base)

2) Lamps with transverse filaments should only be inclined perpendicular to the filament plane! Only the permissible burning positions may be used otherwise the lamp will fail prematurely

The low-voltage signal lamp has undergone continual improvement and has now been developed into a LONGLIFE lamp. This leads to further improvements in the economical operation of signaling systems.

Product benefits

- Longer life compared to previous low-voltage signal lamps
- Maintenance intervals of up to one year (depending on the system)
- Maximum of 2% premature failure rate up to 8,000 hours (failures due to lamp faults only)
- Can be used as replacements for old low-voltage high-pressure lamps without the need for adjustment
- Benefits also apply to existing 230 V signaling systems after upgrading. For this, the lamp and reflector have to be replaced and a transformer installed.

Applications

- Road traffic light signaling systems

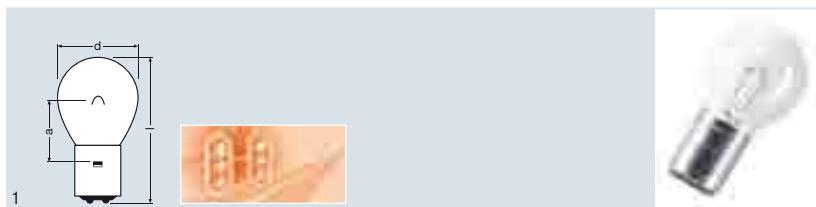

Operating instructions

Operate only in approved fixtures/signals.

Protect the lamps against moisture during operation and in particular during relamping.

Low-voltage high-pressure lamps for 40 V systems, single-coil, for road traffic

Product reference	Product number Single pack	V TEST	W	lm		
SIG 1455	4050300832364	40	25	250	s135 ²⁾	BA20d

Product reference	d [mm]	I [mm]	LCL a [mm]	Product number Standard pack		No.
SIG 1455	36	67	31 ¹⁾	4050300218328	100	1
SIG 1462	36	67	31 ¹⁾	4050300218366	100	1
SIG 1470	36	67	31 ¹⁾	4050300218403	100	1

1) LCL = light center length (distance from the coil to the lug of base)

2) Lamps with transverse filaments should only be inclined perpendicular to the filament plane | Only the permissible burning positions may be used otherwise the lamp will fail prematurely

Product benefits

- Long average life: 8,000 h
- Maximum of 2% premature failure rate up to 3,000 hours (failures due to lamp faults only)
- Maintenance intervals of up to four months (depending on the system)

Applications

- Road traffic light signaling systems

Legal notices

The lamps comply with DIN 49842 Parts 1 and 3.

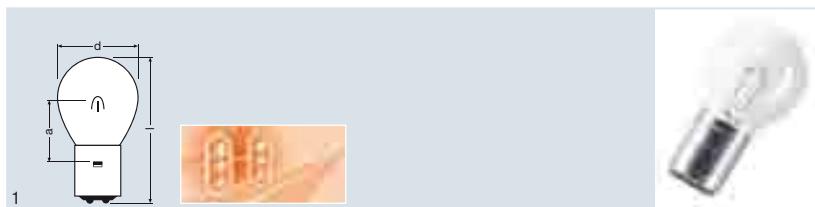

Operating instructions

Operate only in approved fixtures/signals.

Protect the lamps against moisture during operation and in particular during relamping.

Low-voltage high-pressure lamp for 40 V systems, dual-coil, for road traffic equipment

Product reference	Product number Single pack	V TEST	W	lm		
SIG 1456	4050300832340	40	25/25	250	s135 ²⁾	BA20d
SIG 1463	4050300832302	40	40/40	500	s135 ²⁾	BA20d
SIG 1471	4050300832265	40	60/60	800	s135 ²⁾	BA20d
Product reference	d [mm]	I [mm]	LCL a [mm]	Product number Standard pack		No.
SIG 1456	36	67	31 ¹⁾	4050300218342	100	1
SIG 1463	36	67	31 ¹⁾	4050300218380	100	1
SIG 1471	36	67	31 ¹⁾	4050300218427	100	1

1) LCL = light center length (distance from the coil to the lug of base)

2) Lamps with transverse filaments should only be inclined perpendicular to the filament plane | Only the permissible burning positions may be used otherwise the lamp will fail prematurely

Dual-coil lamps are the intelligent way to increase the availability of signaling systems significantly. If the main filament fails in these dual-coil lamps, it is possible to switch to the secondary filament. For safety reasons, however, it is recommended that the lamp be replaced as soon as possible. The specified lifespan applies to the main filament only.

Product benefits

- Dual-coil lamp for greater reliability of the signaling system
- If the main filament fails it is possible to switch easily to the secondary filament
- Long average life: 8,000 hours (applies only to the main filament)
- Maximum of 2% premature failure rate up to 3,000 hours (failures due to lamp faults only)
- Maintenance intervals of up to four months (depending on the system)

Applications

- Road traffic light signaling systems

Legal notices

The lamps comply with DIN 49842 Parts 1 and 3.

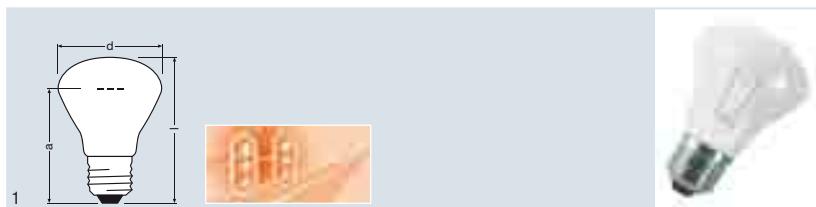

Operating instructions

Operate only in approved fixtures/signals.

Protect the lamps against moisture during operation and in particular during relamping.

High-voltage krypton lamps for road traffic equipment

Product reference	Product number Single pack	V TEST	W	lm		
SIG 1541	4008321044273	235	60	420	s105 ²⁾	E27
SIG 1543	4008321044365	235	75	600	s105 ²⁾	E27

SIG 1541	62	91	69 ¹⁾	4050300405070	100	1
SIG 1543	62	91	69 ¹⁾	4050300032443	100	1
SIG 1546	62	101	79 ¹⁾	4050300284101	100	1

1) LCL = light center length (distance from the coil to base contact)

2) Only the permissible burning positions may be used otherwise the lamp will fail prematurely

Product benefits

- Excellent optical efficiency thanks to a small cradle diameter
- High luminous efficacy thanks to krypton gas filler
- Long average life: 8,000 h
- Maximum of 2% premature failure rate up to 3,000 hours (failures due to lamp faults only)
- Maintenance intervals of up to four months (depending on the system)
- Corrosion-resistant bases
- High resistance to shock and vibrations thanks to the nine supports for the filament

Applications

- Road traffic light signaling systems

Legal notices

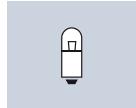

The lamps comply with DIN 49842 Parts 1 and 3.

Luminous intensity values comply with DIN 67527-1 and EN 12368 (depending on the system)

Operating instructions

Operate only in approved fixtures/signals.

Protect the lamps against moisture during operation and in particular during relamping.

High-voltage LONGLIFE krypton lamps for road traffic equipment

4) Lamps with transverse filaments should only be inclined perpendicular to the filament plane

5) One base contact is a blind contact

Safety on the railways calls for reliable signaling equipment. Defective lamps pose a serious risk and lead to costly and time-consuming maintenance work because of the large distances between signals. OSRAM has played a major role over many years in ensuring that railways have operated at high levels of safety and efficiency.

Product benefits

- Narrow geometric tolerances for reliable operation of the signaling systems
- Precise alignment of the light center length for optimum adjustment in the signal
- Long life for economical operation of the signaling systems
- High reliability avoids costly train delays

Applications

- Rail traffic signaling systems

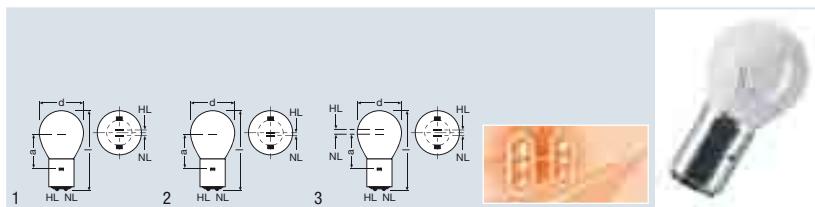

Operating instructions

Operate only in approved fixtures/signals.

Protect the lamps against moisture during operation and in particular during relamping.

5) Lamps with transverse filaments should only be inclined perpendicular to the filament plane

Dual-coil lamps are the intelligent way to increase the availability of rail signaling systems significantly. If the main filament fails in these dual-coil lamps, it is possible to switch to the secondary filament. For safety reasons, however, it is recommended that the lamp be replaced as soon as possible. The specified lifespan applies to the main filament only.

Product benefits

- Dual-coil lamp for greater reliability of the signaling system
- The secondary filament can quickly take on the function of the main filament if this latter fails
- The various wattages are perfectly matched to the specific needs of the relevant optical systems

Applications

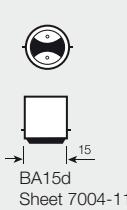

- Rail traffic signaling systems

Operating instructions

Operate only in approved fixtures/signals.

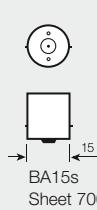

Protect the lamps against moisture during operation and in particular during relamping.

OSRAM ECGs – innovative technology for energy-efficient lighting

Research and development

Provide today what tomorrow requires. Continual research and development in all OSRAM products holds out the promise of innovative systems with additional user benefits. For example, thanks to the lamp detection circuit built into the QUICKTRONIC® INTELLIGENT ECG it is possible to achieve variable lumen values from the same fixture. This halves the number of fixture types and simplifies fixture handling for OEMs, trade and users.

Your benefits:

- Compliance with the latest regulations, and allowance in certain cases for planned regulations
- Exceptional energy efficiency in lighting systems
- State-of-the-art equipment

Perfect combination

You can expect more than just control gear. You can expect a perfect system. As one of the world's two leading suppliers of ECGs and lamps, OSRAM can provide you with perfectly matched high-quality ECGs and lamps – an unbeatable combination. Whatever your requirements you can be sure of the ideal solution.

Delhi airport, Terminal 3, India

Your benefits:

- One-stop shop for lamps, ECGs and service
- Maximum reliability in system operation
- Only one point of contact to deal with any matters relating to light

Metro Dubai

The reliable ECGs

Put your trust in OSRAM ECGs and start saving – time, money and anguish. The high reliability of OSRAM ECGs has impressed our customers worldwide. OSRAM is particularly appreciated on the lighting market for its reliable data relating to temperature and ECG life. Even in thermally critical applications there are only minimal ECG failures in fixtures with long operating times. This is why, for example, OSRAM QUICKTRONIC® PROFESSIONAL units are the most popular ECGs for damp-proof fixtures. They have continued to operate reliably for many years.

Your benefits:

- High reliability of the lighting system over many years
- OSRAM ECGs save time and money
- Long-term satisfaction among system operators

Petuel tunnel in Munich, Germany

Fully guaranteed up to 5 years

Hundreds of thousands of customers put their trust in us year after year after year. In return we offer them guarantees that stretch for years. OSRAM ECGs are of such high quality that we offer a full 3-year guarantee on them. In combination with OSRAM lamps this ECG guarantee increases to as much as 5 years. OSRAM ECG systems are ideal because they give you the security that you expect over a long period of time. On that you can rely.

Your benefits:

Within the guarantee period* OSRAM will refund

- Any lamp that fails*
- Any ECG that fails*
- Only one point of contact

* The system guarantee is handled directly by OSRAM.
For terms and conditions see www.osram.com/system-guarantee.

Excellent experience with 800 million installed ECGs

You will only ever put your trust in a company that provides top-quality products. The performance of OSRAM ECGs is significantly better than the market standard at up to 50,000 hours for a maximum failure rate of 10%. Thanks to this excellent reliability, OSRAM ECGs are the choice not only of leading fixture manufacturers but also renowned major users throughout the world.

- Statements by major OEM customers confirm that of the 1 million ECGs sold each year less than 0.1% had a fault of any kind
- The fact that there are more than 12 million registered OSRAM ECGs in the industrial, retail and public sectors speaks for itself

More than 100,000 OSRAM ECGs for fluorescent lamps are in use at Munich airport. They were chosen mainly for a 10 K lower t_c , temperature in typical fixtures. For users, this means that the ECGs last twice as long.

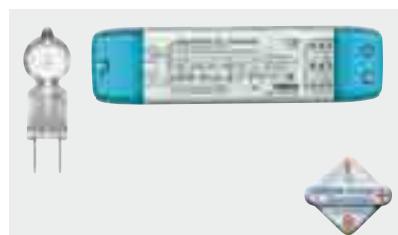

Quality in the palm of your hand

The multi-level system guarantee from OSRAM

OSRAM introduced the System^{*} Guarantee for lamp and ECG from a single source more than 8 years ago. The System^{*} Guarantee is popular with system operators as it provides additional security for using modern energy-efficient systems, especially dimming systems. More than 12 million ECGs throughout the world have already been registered, in applications ranging from industrial facilities and shopping centers to the smallest lighting systems. The System^{*} Guarantee is in high demand among users particularly for dimming systems and high-intensity discharge lamps.

Under the guarantee OSRAM is the only ECG supplier who will refund **any** ECG that has failed as the result of a material or manufacturing defect.*

* For conditions and details go to www.osram.com/system-guarantee

Guarantee Level 1 OSRAM Guarantee

OSRAM offers a full 3-year guarantee on all electronic control gear.

The guarantee starts when the relevant fixture with the appropriate OSRAM ECG is first put into operation. There is no need to register. For more information on Guarantee Level 1 go to www.osram.com/system-guarantee

Guarantee Level 2 OSRAM System Guarantee

If ECGs and lamps from OSRAM are used together, OSRAM offers a full 5-year guarantee on selected electronic control gear.

For the System Guarantee the lighting system must be registered with OSRAM on the internet at www.osram.com/system-guarantee. Here you will also find further information and conditions relating to Guarantee Level 2.

Guarantee Level 3 OSRAM System+ Guarantee

If OSRAM ECGs and light sources are used together (selected series or types), OSRAM offers a guarantee on LED modules, LUMILUX® fluorescent lamps, HPI/HQI® high-intensity discharge lamps and ECO low-voltage halogen lamps and a full 5-year guarantee on the electronic control and operating devices. For the System+ Guarantee, the lighting system must be registered with OSRAM on the internet at www.osram.com/system-guarantee. Here you will also find further information and conditions relating to Guarantee Level 3.

Guarantee Level 4 OSRAM Premium Guarantee

If OSRAM ECGs and light sources are used together (selected series or types) and operated with OSRAM lighting controllers, OSRAM offers a guarantee on LED modules, LUMILUX® fluorescent lamps, HPI/HQI® HID lamps and ECO low-voltage halogen lamps and a full 5-year guarantee on the electronic control and operating devices. For the System+ Premium Guarantee, the lighting system must be registered with OSRAM on the internet at www.osram.com/system-guarantee. Here you will also find further information and conditions relating to Guarantee Level 4.

In view of the increasing use of LED lighting OSRAM now offers a PrevalLED® System+ Guarantee. It applies to perfectly matched components such as the PrevalLED® light engine, OPTOTRONIC® OTp ECGs and cabling from OSRAM.

For more information go to
www.osram.com/system-guarantee

QUICKTRONIC® INTELLIGENT dimmable QTi (DALI)...DIM

QTi dimmable – DALI or 1-10 V interface

The current generation of dimmable QUICKTRONIC® Intelligent control gear with DALI (Digital Addressable Lighting Interface) or 1-10 V interface (QTi DALI/DIM):

- Automatic lamp detection by intelligent multilamp operation and use of a large number of different lamps
→ Flexible fixtures and reduction in the number of ECG types

Very high energy efficiency.

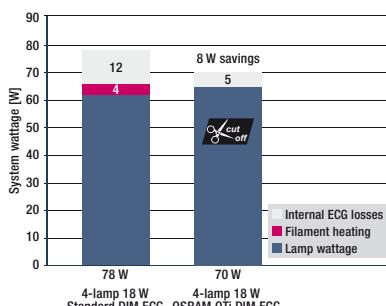

Lowest standby consumption on the DALI ECG market.

- Energy Efficiency Index EEI=A1 BAT
- Very low standby consumption:
 - QTi DALI 1x, 2x: 0.2 W (in AC & DC operation)
 - QTi DALI 3x, 4x: < 0.5 W (in AC & DC operation)
- Optimum preheating in any dimmer setting
- Dimming range: 1 to 100% luminous flux

Outstanding flexibility and quality.

Now also for energy saver lamps.

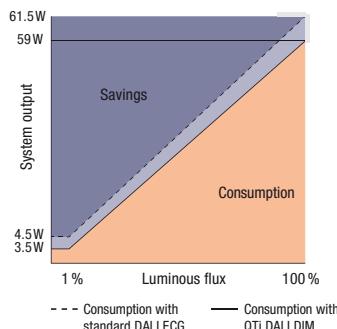

- **Full dimming functionality** even with amalgam and **energy saver** lamps
- **NEW:** Large number of additional ECG/lamp combinations (OSRAM DULUX L...HE, XT)
- Life of up to 100,000 hours (for a definition of life see page 9.111, section 13)
- Suitable for fixtures of protection class I
- Effective overtemperature protection of the dimmable ECG thanks to intelligent thermal management at high t_c temperatures
- Optimized hot restrike within 0.6 s
- Stable dimming operation from 1(3) to 100 % even of CONSTANT amalgam lamps
- OSRAM CFL and T5 CONSTANT lamps: dimming in outdoor applications possible
- Very high efficiency of OSRAM dimming ECGs of up to 94 % thanks to high-efficiency components and temperature-dependent cut-off. For dimmer settings > 80 % disconnection of electrode heating
→ Additional energy savings of up to 4 W (type-dependent)

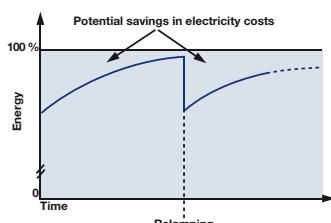

Values related to the same luminous flux (Ballast Lumen Factor) (BLF) for all QTi DIM=1.0

Fig. 2. Electronic control gear QTi DIM from OSRAM is renowned for its optimized system output

Comparison between a T5 fluorescent lamp (54 W) on QT DALI DIM and one on a standard DALI ECG

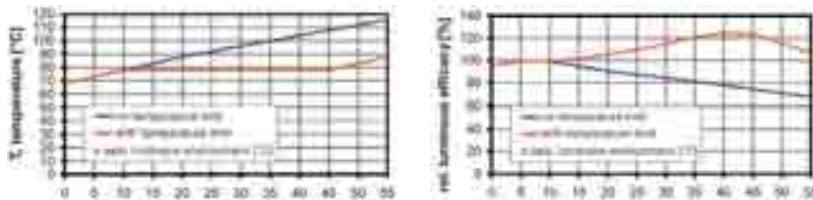

- Adjustment of the planning factor (0.8) thanks to the use of dimmable ECGs saves an additional 10% in electricity costs

For a 2xHO 49-W fixture additional savings over the life of the lamps of € 20 can be achieved simply by adjusting the planning factor (0.8):
10% of 110 W x 18,000 h x 0.10 €/kWh = 20 €/fixture in 4 years.

This adjustment can be done by the building management system or by a light sensor.

- Effective thermal protection thanks to intelligent power reduction at high T_c temperatures
→ Simplifies the safety approval for hot fixtures

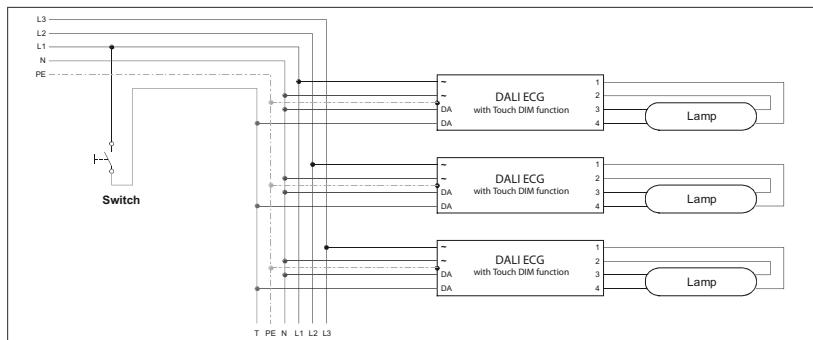

The benefits are a significant increase in the luminous efficacy (lm/W) of hot fixtures and a reduced thermal load on the fixture components

- End of Life (EoL) disconnection according to Test 2 (asymmetrical power test)
- DALI standard as per IEC 60929 and IEC 62386

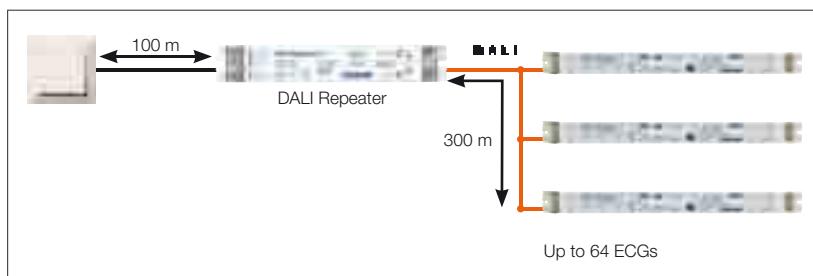

QTi DALI – DALI or Touch DIM® in one unit

- Touch DIM® – dimming without a dimmer thanks to direct connection to conventional momentary-action switches

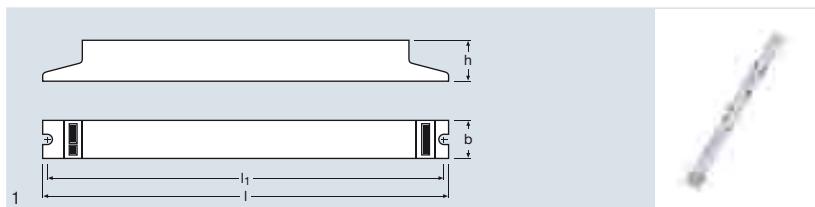

Double click to store the switch-on value

- Operation of more than 4 and up to 64 DALI ECGs via repeaters

- Touch DIM® Sensor – light management without a controller thanks to direct connection of a combined light and motion sensor

1) -20°C operation possible for all QTi (DALI) ... DIM ECUs. Restriction of the lower dimmer setting is needed. For more information see the Dimming Guide.

Product characteristics

- Supply voltage: 220 to 240 V
- Line frequency: 0 Hz | 50 Hz | 60 Hz
- Line voltage: 198 to 264 V
- Dimming range: 1 to 100 % luminous flux
- Lamp start within 0.6 s
- Energy Efficiency Index EEI: A1 BAT
- Configurable emergency power characteristics
- Overtemperature protection thanks to thermal management at high t_c temperatures
- Approval marks:   
- Additional features:  
- Safety: to EN 61347-2-3
- Lamp operation: to EN 60929
- RL suppression: to EN 55015:2006+A1:2007+A2:2009/CISPR 15, EN 55022
- Line harmonics: to EN 61000-3-2
- Immunity: to EN 61547

Product benefits

- Same luminous flux with direct and alternating current
- Perfect hot restrike for applications with motion sensors
- Dimming of amalgam lamps without flickering or reduced lifespan
- Very high efficiency thanks to cut-off technology
- Life of up to 100,000 hours (for $T=65^{\circ}\text{C}$ at T_0)
- Automatic safety shutdown of lamps in the event of a defect or at end of life (EoL T.2)
- Automatic restart of replacement lamps
- Control gear complies with the MINERGIE standard thanks to very low standby consumption

Applications

- Suitable for use in emergency lighting systems as per EN 50172 / DIN VDE 0108-100
- Suitable for fixtures of protection class I

DALI product features

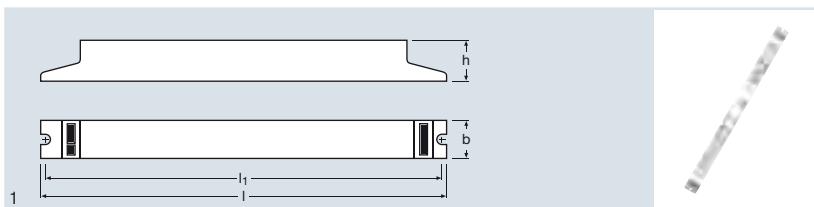

- Control via the DALI interface
- Compliance with the DALI standard to IEC 60929 and IEC 62386
- The control input is protected against overvoltage and polarity reversal in all OSRAM ECGs

Touch DIM® and Touch DIM® sensor function

- Manual dimming without any controller and with standard switches
- Includes memory function (double click) and soft start

1) -20°C operation possible for all QTi (DALI) ... DIM ECGs. Restriction of the lower dimmer setting is needed. For more information see the Dimming Guide.

Product characteristics

- Control via the 1-10 V interface
- Supply voltage: 220 to 240 V
- Line frequency: 0 Hz | 50 Hz | 60 Hz
- Line voltage: 198 to 264 V
- Dimming range: 1 to 100 % luminous flux
- Lamp start within 0.6 s
- Energy Efficiency Index EEI: A1 BAT
- Configurable emergency power characteristics
- Overtemperature protection thanks to thermal management at high t_c temperatures
- Approval marks:   
- Additional features:  
- Safety: to EN 61347-2-3
- Lamp operation: to EN 60929
- RI suppression: to EN 55015:2006+A1:2007+A2:2009/CISPR 15, EN 55022
- Line harmonics: to EN 61000-3-2
- Immunity: to EN 61547

Product benefits

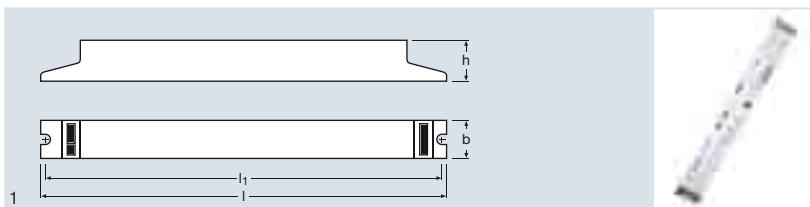

- Same luminous flux with direct and alternating current
- Perfect hot restrike for applications with motion sensors
- Dimming of amalgam lamps without flickering or reduced lifespan
- Very high efficiency thanks to cut-off technology
- Life of up to 100,000 hours (for $T = 65^\circ\text{C}$ at T_c)
- Automatic safety shutdown of lamps in the event of a defect or at end of life (EoL T.2)
- Automatic restart of replacement lamps
- Control gear complies with the MINERGIE standard thanks to very low standby consumption

Applications

- Suitable for use in emergency lighting systems as per EN 50172 / DIN VDE 0108-100
- Suitable for fixtures of protection class I

QUICKTRONIC® DE LUXE HF DIM (1-10 V) for T8 lamps

Product characteristics

- Control via the 1-10 V interface
- Supply voltage: 230 to 240 V
- Line frequency: 0 Hz | 50 Hz | 60 Hz
- Line voltage: 198 to 264 V
- Dimming range: 1 to 100% luminous flux
- Energy Efficiency Index EEL: A1
- Approval marks:
- Safety: to EN 61347-2-3
- Lamp operation: to EN 60929
- RL suppression: to EN 55015:2006+A1:2007+A2:2009/CISPR 15, EN 55022
- Line harmonics: to EN 61000-3-2
- Immunity: to EN 61547

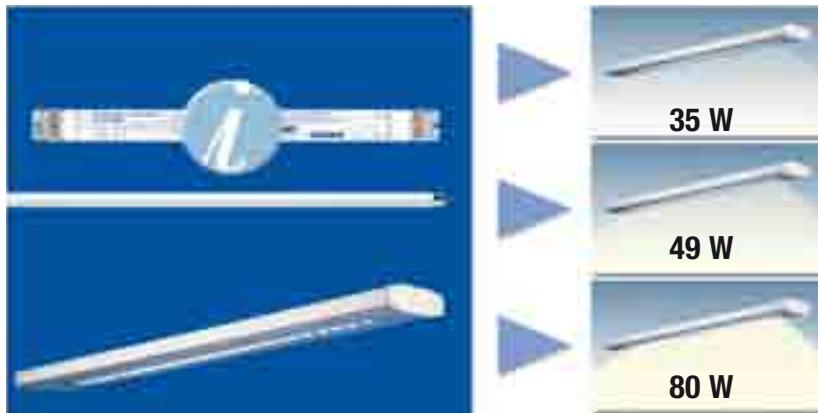

Product benefits

- Same luminous flux with direct and alternating current
- Automatic safety shutdown of lamps in the event of a defect or at end of life (EoL)
- Automatic restart of replacement lamps

Applications

- Suitable for use in emergency lighting systems as per EN 50172 / DIN VDE 0108-100
- Suitable for fixtures of protection class I

35/49/80

OSRAM always has the right control gear for you

For tubular fluorescent lamps T5/ø 16 mm:

- **QUICKTRONIC® INTELLIGENT QTi**,
2nd generation (GII) – thanks to intelligent lamp detection over 50% fewer ECG types and greater flexibility in lighting systems. Up to three lighting levels can be provided from a single fixture.
- Life of up to 100,000 hours (for a definition of life see page 9.111, section 13)
- For fixtures of protection classes I and II
- For T5 SEAMLESS lamps
- For T5 energy saver lamps

- **QUICKTRONIC® INTELLIGENT DUALPOWER ECG QTi DP ... LED**
Operation of T5 lamp and LED on only one common ECG. Ideal for corridors, side rooms and parking decks

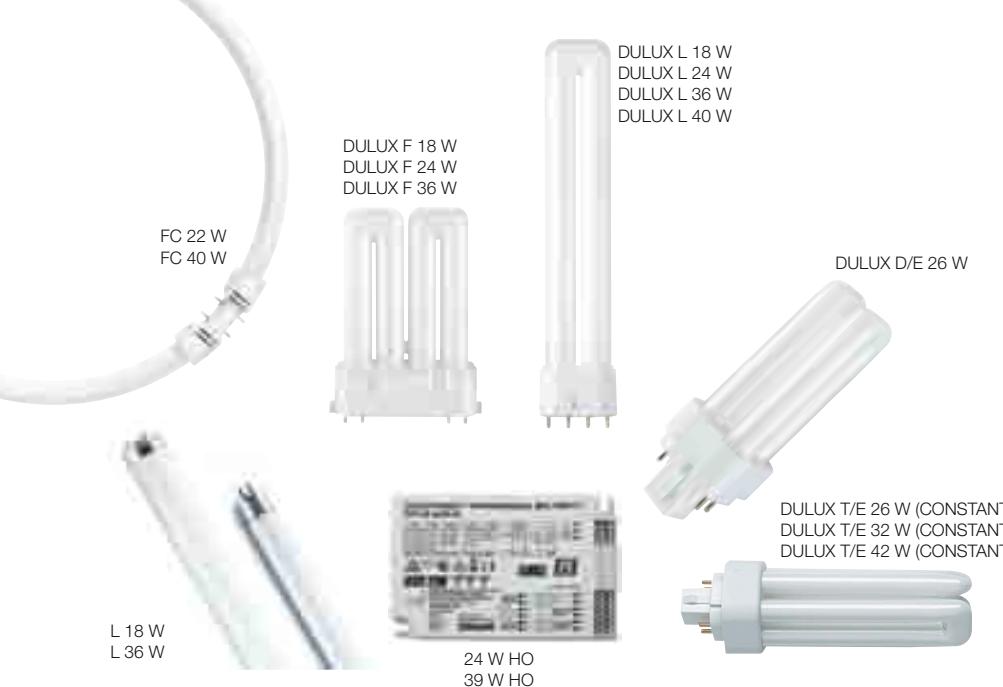

- **QUICKTRONIC® PROFESSIONAL QTP5**,
2nd generation (GII) longlife 100,000 h hot restrike ECG, also for protection class II fixtures
- **QUICKTRONIC® QTP-FC, QTP-M and QT-M**
The compact control gear for small T5 circular lamps

For tubular fluorescent lamps T8/ø 26 mm:

- **QUICKTRONIC® PROFESSIONAL QTP8**
The tried and trusted 100,000 h hot restrike ECG
- **QUICKTRONIC® FIT8**
The reliable 50,000 h hot restrike ECG, particularly energy-saving in conjunction with motion sensors

For tubular fluorescent lamps T2/ø7 mm:

- **QUICKTRONIC® QT-ECO FM**

The reliable slim low-profile ECG for reliable operation of FM-T2 miniature fluorescent lamps

For compact fluorescent lamps:

- **QUICKTRONIC® MULTIWATT-QTP-M and QT-M** – the universal hot restrike ECG for

up to 18 different lamps (OSRAM DULUX® L, F, D/E, T/E, ...) from 18 to 42 W

- **QUICKTRONIC® PROFESSIONAL QTP-DL**

For OSRAM DULUX® L and F from 18 to 55 W and **QTP-D/E, T/E** for OSRAM DULUX® T/E, D/E and S/E from 9 to 42 W

- **QUICKTRONIC® ECONOMIC**

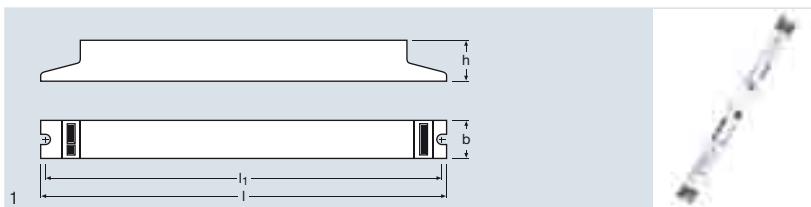

The electronic alternative to LLG.
For OSRAM DULUX® S/E, D/E, T/E, T5, T8 from 4 to 26 W

- **DULUXTRONIC®**

The ECG with integrated lampholder for OSRAM DULUX® S/E, D/E, T/E from 5 to 18 W

QUICKTRONIC® INTELLIGENT QTi for T5 lamps

Product characteristics

- Supply voltage: 220 to 240 V
- Line voltage: 198 to 264 V
- Line frequency: 0, 50 - 60 Hz
- For use in emergency lighting systems as per EN 50172 / DIN VDE 0108-100
- Lamp start with optimum filament preheating
- Perfect hot restrike for applications with motion sensors
- Lifetime: up to 100,000 hours (for $T = 65^\circ\text{C}$ at T_0)
- Energy Efficiency Index EEI: A2 BAT
- Automatic safety shutdown of lamps in the event of a defect or at end of life (EoL)
- Automatic restart of replacement lamps
- Approval marks:     
- Safety: to EN 61347-2-3
- RI suppression: EN 55015:2006+A1:2007+A2:2009/CISPR 15
- Line harmonics: to EN 61000-3-2
- Immunity: to EN 61547
- Lamp operation: to EN 60929

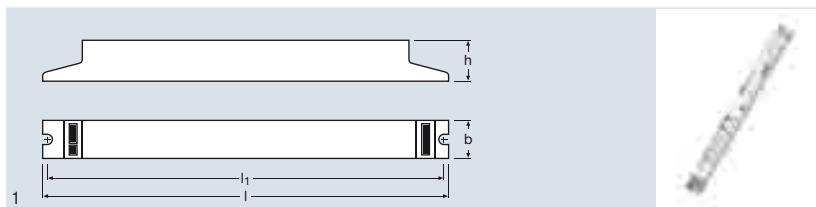

QUICKTRONIC® INTELLIGENT DUAL POWER QTi-DP for T5 lamps and LEDs

Product characteristics

- Operating modes:
 - LED only: Step Dim terminal SD (pin 7) without associated signal
 - FL only: Step Dim terminal SD (pin 7) with associated signal
 - FL + LED: Pin 1 and Step Dim terminal SD (pin 7) permanently wired before the ECG is switched on
- Automatic detection of connected LED technology (24 V or 350 mA)
- Supply voltage: 220 to 240 V
- Line voltage: 198 to 264 V
- Line frequency: 0, 50 - 60 Hz
- For use in emergency lighting systems as per EN 50172 / DIN VDE 0108-100
- Lamp start with optimum filament preheating
- Perfect hot restrike for applications with motion sensors
- Lifetime: up to 100,000 hours (for $T = 65^\circ\text{C}$ at T_0)
- Energy Efficiency Index EEI: A2 BAT
- Automatic safety shutdown of lamps in the event of a defect or at end of life (EoL)
- Automatic restart of replacement lamps
- Approval marks:     
- Safety: to EN 61347-2-3
- RI suppression: EN 55015:2006+A1:2007+A2:2009/CISPR 15
- Line harmonics: to EN 61000-3-2
- Immunity: to EN 61547
- Lamp operation: to EN 60929

QUICKTRONIC® PROFESSIONAL QTP-M, -D/E, -T/E for CFL OSRAM DULUX D/E, T/E

Product characteristics

- Supply voltage: 220 to 240 V
- Line voltage: 198 - 254 V or 198 - 264 V
- Line frequency: 0, 50 - 60 Hz
- For use in emergency lighting systems as per EN 50172 / DIN VDE 0108-100
- Lamp start with optimum filament preheating
- Perfect hot restrike for applications with motion sensors
- Automatic safety shutdown of lamps in the event of a defect or at end of life (EoL)
- Automatic restart of replacement lamps
- Approval marks:
- Safety: to EN 61347-2-3
- RI suppression: EN 55015:2006+A1:2007+A2:2009/CISPR 15
- Line harmonics: to EN 61000-3-2
- Immunity: to EN 61547
- Lamp operation: to EN 60929

QUICKTRONIC® for OSRAM ENDURA®

Product characteristics

- Supply voltage: 120 to 240 V
- Line voltage: 108 to 264 V
- Line frequency: 0, 50 - 60 Hz
- Energy Efficiency Index EEI: A2 BAT
- Safety: to EN 61347-2-3
- RI suppression: EN 55015:2006+A1:2007+A2:2009/CISPR 15
- Line harmonics: to EN 61000-3-2
- Immunity: to EN 61547

POWERTRONIC®

POWERTRONIC® electronic control gear for optimum operation of HCl®, HQI® and NAV® metal halide lamps

POWERTRONIC® ECGs have a wide variety of uses.

Their low weight and small volume increase the scope for fixture design and system planning.

POWERTRONIC® ECGs make the economical light from metal halide lamps even more comfortable, reliable and safe by constantly monitoring lamp starts and lamp operation and by reliably disconnecting the lamps when appropriate.

POWERTRONIC® ECGs can be used in the following applications:

For outdoor lighting:

PTo 3DIM: Robust HID ECG – lightning-proof to 10 kV, vibration tested (EN 60598),
approved for fixtures of protection classes I and II,
3 control options:
- DALI control or
- StepDIM (2-stage switching) or
- AstroDim (dimming with an integrated timer control).

For indoor lighting with strain relief for separate mounting:

PTi I: Tried and trusted technology for long system life

PTi SNAP: As for PTi I, but ST 18/GST 18 plug system

PT-FIT I: For standard applications

For luminaire installation:

PTi S: Tried and trusted technology for long system life

PT-FIT S: For standard applications

For greenhouse lighting:

PTg 1000: For greenhouse lighting (with 400 V_{AC} input)

Accessories:

Inrush current limiter EBN-OS for greater flexibility at the installation stage

Applications

- Shop interiors/shop windows
- Foyers/entrance halls
- Production facilities/industrial plants
- Public buildings
- Art galleries/museums/exhibition rooms
- Streets/parks/outdoor facilities (PTo)

Comfort:

- Flickerfree light
- Greater color stability and less scatter around the color location
- No flashing of old or faulty lamps

Better economy with POWERTRONIC® ECGs compared with conventional control gear

- Energy Efficiency Class A2
- Up to 15% higher system efficiency
- Up to 20% better luminous flux maintenance and smaller spread of luminous flux
- Up to 30% longer lamp life

Safety:

- Reliable shutdown of aging or faulty lamps for much greater system safety and reliability
- Integrated ignition time restriction prevents attempts to ignite faulty or old lamps and therefore prevents lamp cycling and radio interference

Guarantee:

OSRAM offers its customers its successful System Guarantee*:

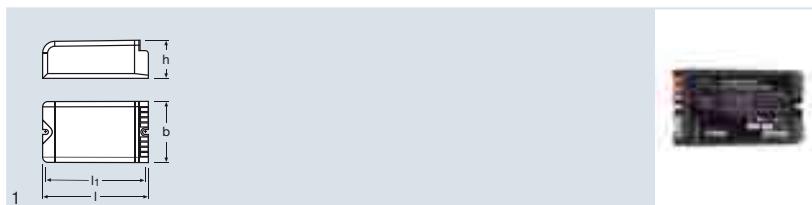

- 5 years on PT ECGs in conjunction with OSRAM HQI®, HCl® and NAV® lamps.
- 3 years on PT ECGs.

* For conditions and details go to www.osram.com/system-guarantee

** Selected lamps such as HCl®-T/TT, NAV®-E ...

PTi I – The professional ECG with strain relief for separate installation

PTi SNAP – Simple installation thanks to Plug&Play system

Product benefits

- Extended terminal section enables mains looping
- Screw-down cable clamps for reliable strain relief
- Long reliable life at maximum permitted temperatures
- Precabled versions available on request
- (SNAP) Integrated socket/plug offers many benefits
- (SNAP) Rapid error-free installation of the power and fixture connections
- (SNAP) Incorrect wiring virtually impossible thanks to coded plug/socket
- (SNAP) Based on the established ST 18/GST 18 plug system

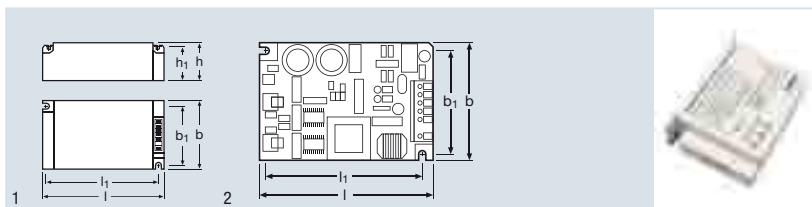

Product characteristics

- Energy Efficiency Index EEI: A2
- Rated voltage: 220-240 V
- Line frequency: 50 to 60 Hz
- RI suppression: to EN 55015/CISPR 15
- Safety: to EN 61347-2-12

Inrush current limiter EBN-OS for POWERTRONIC® ECGs

Product reference	Product number	T _a	V	W	I [mm]	b [mm]	h [mm]	g	ECG
EBN-OS/220-240	4006584548019	-10...+45	220-240	0.6	90	18	58	75	100

General

- Increases the maximum number of HID ECGs per automatic cutout by factor 2.5 (for values see page 9.105)
- Can be used in combination with all POWERTRONIC® ECGs
- Can be used as required depending on the size of the installation
- Simple installation/retrofit on DIN rail to DIN EN 50022
- Operating frequency: 50 to 60 Hz
- Maximum continuous load: 16 A
- Limitation time: 70 ms
- Switching operations: at least 10,000 switching cycles

HALOTRONIC®

HALOTRONIC® electronic transformers and dimmers to optimum operation of low-voltage halogen lamps

HALOTRONIC® is primarily intended for:

- Recessed ceiling fixtures with strain relief
- Display lamps
- Residential fixtures (built-in and surface-mounted furniture fixtures)

Versions

HTi DALI 105 DIM / HTi DALI 150 DIM can be integrated in DALI lighting systems and can be dimmed with a momentary-action switch via Touch DIM®. Daylight-dependent and presence-dependent operation is possible with a DALI MULTileco controller. Both transformers are suitable for emergency power installations.

For more information on DALI see page 10.38; for usable components see section 10.

HALOTRONIC® LONG (HTL) is available in 105 W and 225 W versions for easy separate mounting:

- 2 terminal pairs on the primary side for looping from unit to unit
- 3 large terminal pairs on the secondary side for connecting up to 3 fixtures in parallel

They offer long life and high thermal load capability, making them suitable for use in emergency installations.

HALOTRONIC® MOUSE® HTM is available in three wattages as a compact standard unit with strain relief for shallow suspended ceilings. The electronic transformer from OSRAM – successfully used in millions of applications.

HALOTRONIC® NANO (HTN) in conjunction with miniaturized low-voltage halogen lamps is ideal for particularly tight spaces and small fixtures. Excellent thermal behavior despite the extremely small size.

ET-PARROT® is a cost-effective alternative to conventional transformers in the 70 -150 W range.

HTi DALI 315 DIM as a trailing-edge phase dimmer enables all the listed electronic transformers to be integrated in a DALI system and can alternatively be operated by means of a momentary-action switch. Daylight-dependent and presence-dependent operation is possible with a DALI MULTileco controller. Also suitable for line-voltage lamps.

Applications

- Accent lighting
- Decorative lighting
- Foyers/reception areas
- Passages/corridors
- Shops and exhibition rooms
- Offices and conference rooms
- Residential

Comfort

- Since it weighs around 80% less and takes up 40% less space than conventional transformers it gives much greater scope for planning halogen-based lighting systems
- All devices have secure strain relief and fixing options
- Dimmable
- Electronically reversible cutout to protect against short circuits, overloads and overtemperature

Economy

- Protective operation throughout the entire partial-load range for long lamp life
- No additional fusing measures required for connecting the device
- Approx. 60% lower power loss compared to conventional transformers

Safety

- All the transformers are VDE/IMQ tested
- Suitable for mounting on wooden surfaces
- All transformers have $\nabla\nabla$
- Suitable, without any additional measures, for fixtures in protection classes II and III, fixtures with ∇ and $\nabla\nabla$ labels and with ∇ and $\nabla\nabla$ labels
- Complies with international, European and German standards for safety and EMC

Guarantee

OSRAM offers its customers unique guarantees (for details on the guarantee see page 9.05)*:

- 5-year guarantee for OSRAM HALOTRONIC® electronic transformers in connection with low-voltage halogen ECO lamps from OSRAM
- 5-year guarantee for OSRAM HALOTRONIC® DIMMER in connection with HALOTRONIC® transformers
- 3 year guarantee for HALOTRONIC® Electronic transformers

HTL 225/230-240	11.6 (225W) 11.7 (50W)	Trailing-edge or leading-edge dimmer	170	44	34	140	225	10	1

1) RMS

Product benefits

- Short-circuit protection, overload protection, overtemperature protection: electronically reversible
- Dimmable on the leading edge and trailing edge
- Very low power loss thanks to high efficiency
- Through-wiring possible on the primary side
- Large temperature range
- Protective operation throughout the entire partial-load range for long lamp life

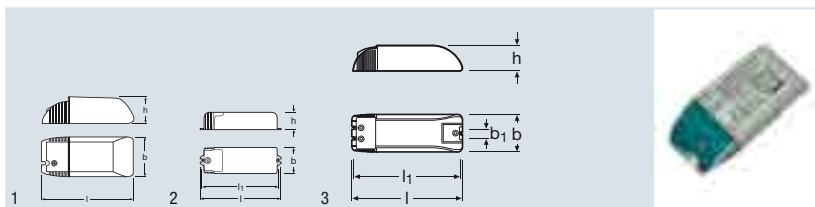

Product characteristics

- Suitable for emergency installations
- Line frequency: 0, 50 - 60 Hz
- RI suppression: to EN 55015 (A1: 2007) / CISPR 15, EN 55022
- Line harmonics: to EN 61000-3-2
- Immunity: to EN 61547
- Safety: to EN 61347
- Electrical isolation from the primary and secondary side
-

Applications

- Effect and accent lighting
- Living rooms
- Object lighting
- Conference rooms
- Restaurants
- Recessed and surface-mounted furniture fixtures
- Shop lighting
- Event rooms

HALOTRONIC® electronic transformers -COMPACT- HTM, HTN

1) RMS

Product benefits

- Short-circuit protection, overload protection, overtemperature protection: electronically reversible
- Dimmable on the leading edge (without HTN) and trailing edge
- Very low power loss thanks to high efficiency
- Strain relief suitable for different cable types (HTM)
- Suitable for space-critical installation thanks to compact functional design
- (HTN) extremely compact transformer for highly space-critical installation conditions
- Protective operation throughout the entire partial-load range for long lamp life

Product characteristics

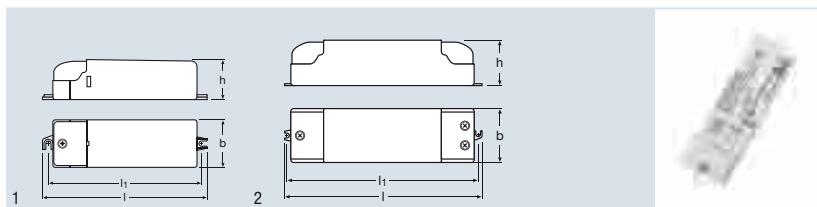

- Line frequency: 50 to 60 Hz
- RI suppression: to EN 55015 (A1: 2007) / CISPR 15, EN 55022
- Line harmonics: to EN 61000-3-2
- Immunity: to EN 61547
- Safety: to EN 61347
- Electrical isolation from the primary and secondary side
-

Applications

- Effect and accent lighting
- Living rooms
- Object lighting
- Conference rooms
- Restaurants
- Recessed and surface-mounted furniture fixtures
- Shop lighting
- Event rooms

Dimmer modules for controlling HALOTRONIC® and ET-PARROT®

Product reference	Product number				CONTROL			
HTi DALI 315 DIM	4008321957344				DALI or Touch DIM/ Touch DIM Sensor			
Product reference	HTi DALI 315 DIM							
	Trailing-edge phase dimmer							

Product benefits

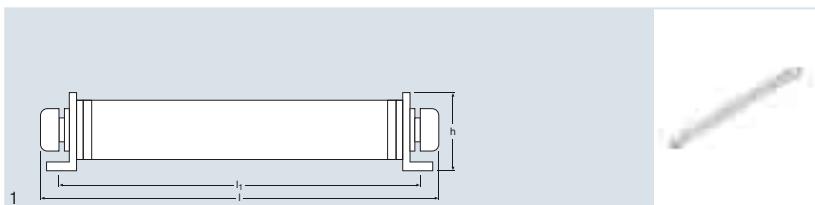

- Standby power consumption < 0.5 W

Product characteristics

- Total connected load 20...315/420 VA
- DALI/Touch DIM® control signal
- Suitable for all OSRAM HALOTRONIC® and ET-PARROT® ECGs

ECG accessories – protective casing

Product reference	Product number		Ta	l1 [mm]	b [mm]
OUTKIT 21 L	4008321159595		-25...+50	520	38

OUTKIT 30 L	4008321159557	38	495	120	20
OUTKIT 30 S	4008321159533	38	430	120	20

Protective housing for electronic control gear in humid applications

Electronic control gear for fluorescent lamps now plays a major role in indoor lighting. If the benefits of energy saving and low maintenance costs that ECG operation brings are to be enjoyed in outdoor systems as well, these valuable ECGs have to be protected against moisture. In other words, they need a special housing.

Applications

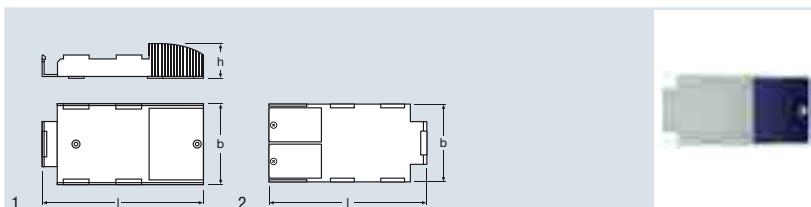

Outdoor lighting applications in which relatively high protection against moisture for the ECG is needed, e.g. outdoor displays

General

- Type of protection: IP67, no penetration of dust, protected against the consequences of temporary immersion in water
- Suitable as an additional measure if the fixture does not offer IP67 protection
- Self-heating: only 5 K higher than an open ECG

ECG accessories – strain relief

Product reference	Product number	h [mm]	l [mm]	b [mm]
QT CABLE CLAMP K2	4008321190727		147	71
QT CABLE CLAMP K3	4008321190741		168	84
Product reference		h [mm]	l [mm]	b [mm]
QT CABLE CLAMP K2	33	65	10	1
QT CABLE CLAMP K3	37	70	10	2

Product characteristics

- Separate installations thanks to optional cable clamp for K2 and K3 casings
- Suitable for QTP-D/E, T/E, QTP-M, QTi (DALI)-T/E DIM ECG and OT 35/220-240/700 LTCS, OT 45/220-240/700 LTCS
- Suitable for various cable types with an outer diameter of at least 7 mm and no more than 11 mm

OPTOTRONIC®

OPTOTRONIC® a key component for LED systems

LED technology is changing the world of general lighting and opening up entirely possibilities in lighting planning and luminaire design. Constant development of LEDs and the new requirements that follow as a result, which also applies to LED control gear, call for a high degree of flexibility and future-proof design – with high performance in terms of efficiency and the power factor for example.

Electronic control gear is a key component in LED solutions. The OPTOTRONIC® portfolio meets these requirements and provides the basis for applications with high-quality light, long life, exceptional reliability and attractive design. The product range with its graded features offers an ideal selection of LED control gear.

Depending on the technical application, there is a choice of two OPTOTRONIC® ECG types.

• OPTOTRONIC® constant voltage ECGs

Constant voltage ECGs with an output voltage of 12 V and 24 V in an output power range up to 240 W are suitable for modular and scalable LED systems. In this product range OSRAM offers LED ECGs with an integrated control interface (DALI, 3DIM, 1..10 V, EASY, ...) and with externally combinable control units (DALI, DMX, 1..10 V, ...). The electrical isolation between the primary and secondary sides (SELV, SELV equivalent) and the reversible protection mechanisms for overload, short-circuit and overtemperature enable the LED systems to be set up safely and reliably.

• OPTOTRONIC® constant current ECGs

OPTOTRONIC® constant current ECGs provide the basis for highly efficient LED solutions in demanding applications. OSRAM offers a wide range of both simple and fully programmable devices including the innovative LEDset interface. The devices from this product category have various control interfaces (DALI, EASY, 3DIM, leading-edge and trailing-edge dimming, ...) between the OPTOTRONIC® ECG and the LED module to meet the different requirements of the relevant applications.

Comfort:

- The majority of OPTOTRONIC® devices are suitable for luminaires of protection class II
- ECGs for outdoor applications have high surge protection
- Full flexibility in the selection of the LED module and the functionality through LEDset interface
- Wide variety of dimming options
- Small space requirements thanks to compact functional design

Economy:

- Very low power consumption thanks to extremely high efficiency
- Low maintenance factor thanks to "constant lumen" function
- New dimming methods in street applications for existing installations (3DIM)
- Impressive reliability through long life
- Future-proof design (thanks to LEDset)

Safety

- All the OPTOTRONIC® ECGs meet the necessary standards for lighting technology:
 - Safety (EN 61347-2-13)
 - Operation (EN 62384)
 - Radiated and line-bound radio interference suppression (EN 55015)
 - EMC immunity (EN 61547)
 - Harmonics (EN 61000-3-2)
- Protection mechanisms for short-circuit, overtemperature and overload are implemented
- Operation in a wide range of ambient temperatures

OT 9/10-24/350 DIM

- Compact housing
- Dimmable via external potentiometer
- Suitable for indoor applications

OT 9/200-240/350

- SELV equivalent
- Compact housing
- Suitable for installation in flush-type boxes
- Suitable for indoor applications

OT 9/200-240/350 DIM

- SELV equivalent
- Compact housing
- Dimmable via external potentiometer
- Cable clamp housing for independent mounting
- Suitable for indoor applications

OTe 13/220-240/350 SD

- SELV equivalent
- StepDIM interface: switch between two predefined output currents by means of an external switch or PIR sensor
- Slim housing with separate push-in terminals
- Suitable for indoor applications

OTe 25/220-240/2x350 SD

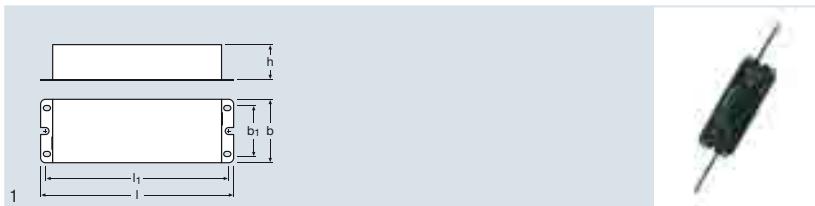

- SELV equivalent
- 2 output channels
- StepDIM interface: switch between two predefined output currents by means of an external switch or PIR sensor
- Slim housing with separate push-in terminals
- Suitable for indoor applications

OTe 90/220-240/4x350 E

- Large output power range up to 81 W
- 4 output channels each with low output voltage (< 60 V)
- High surge protection up to 3 kV (L-N) / 3.5 kV (L/N-PE)
- Robust and reliable design
- Doubling of the output current (2x350 mA = 700 mA) by connecting two channels in parallel
- Suitable for outdoor applications

OPTOTRONIC® control gear - 500 mA

OPTOTRONIC® LEDset

LEDset – simple effective tuning

LED technology offers a high degree of flexibility in the design of luminaires. Its rapid innovation cycles in terms of efficiency and operating current call for optimum matching of the ECGs to meet the new requirements.

The new OPTOTRONIC® devices with the LEDset interface take account of this flexibility by covering a wide range of wattages and currents and supporting future generations of LEDs with their future-proof design.

LEDset is an intelligent interface between the LED module and the ECG and offers the following possibilities:

- Flexible current setting by means of an external resistor
- Local dimming function within the luminaire
- Customer-specific overtemperature protection for the LED module
- 12 V auxiliary supply (15 mA) for customer-specific control of the LED module (sensor-controlled current, constant lumen, ...)

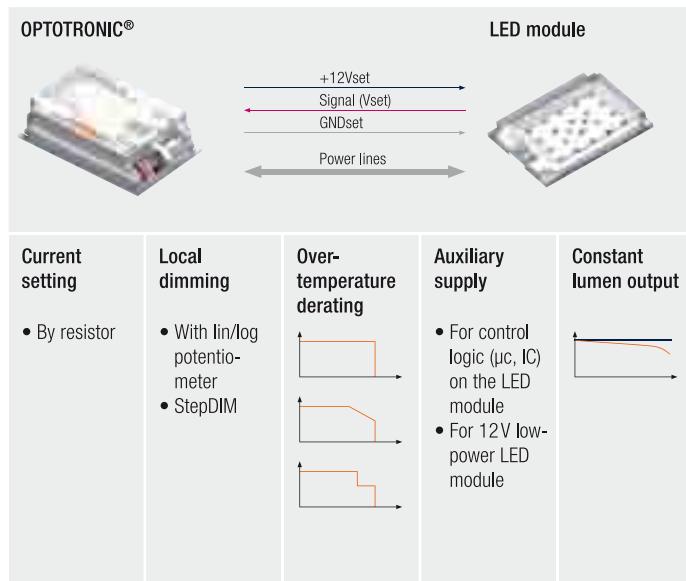

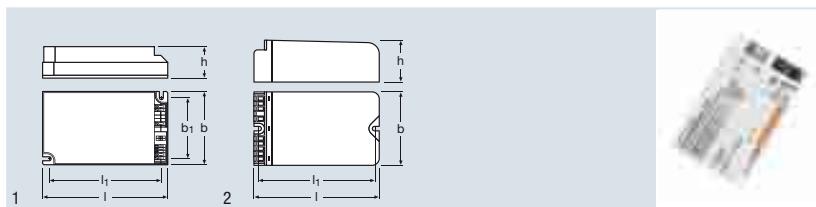

Figure 1: LEDset application features

For more information and typical applications go to www.osram.com/ledset

- Control of current setting via LEDset interface
- Suitable for luminaires of protection classes I and II
- Current output range 75 – 700 mA
- High surge protection up to 4 kV (L-N) / 4 kV (L/N-PE)
- Future-proof and flexible current setting
- Consistently high efficiency
- Suitable for outdoor applications

OPTOTRONIC® 3DIM

3DIM – Three independent dimming modes in one device

3DIM stands for a combination of three control and dimming options in one device. OSRAM offers this functionality for constant-current and constant-voltage LED ECGs and also for ECGs for high-intensity discharge lamps. It is therefore a uniform concept for a wide range of lighting technologies.

3DIM	StepDIM	AstroDIM	DALI
Energy savings through dimming	●	●	●
Simple installation in the existing infrastructure	●	●	
Flexibility		●	●
Feedback from the light source and ECG status			●

StepDIM

- Dimming via an external control phase. Predefined dim levels can be varied by the 3DIM Tool software, and so can the polarity of the phase

AstroDIM

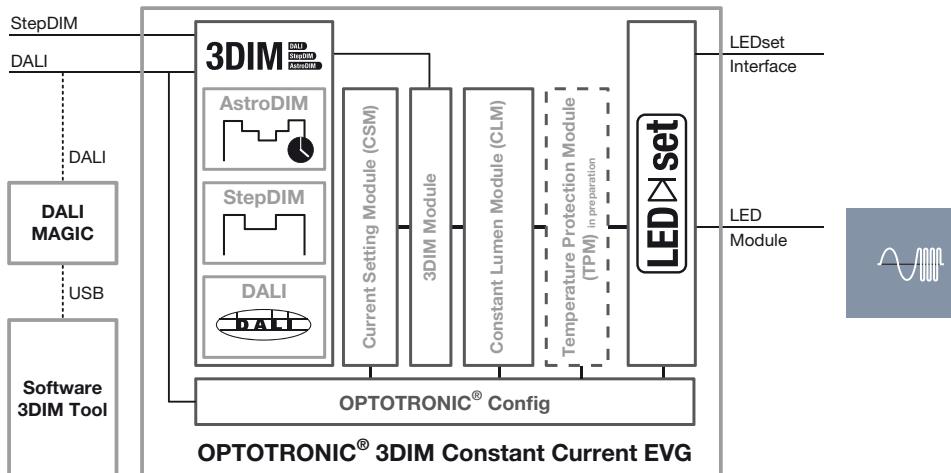

- Automatic dimming via an integrated timer, predefined periods and dim levels can be changed via the software

DALI

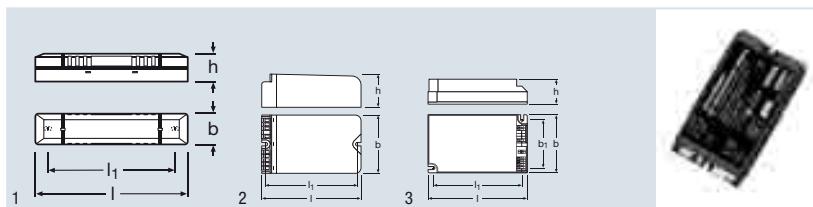

- Suitable for integration in bidirectional telemanagement systems

OPTOTRONIC® LED constant current 3DIM control gear

This fully programmable family of devices offers not only 3DIM functionality but also the option of setting the parameters for output current, lumen maintenance and, in future, overtemperature protection on the LED module via the 3DIM Tool software. The high degree of flexibility of these devices provides the basis for optimum adjustment to the required lighting conditions, reduces the maintenance factor and also increases the reliability of the luminaire in critical operating conditions.

OTi DALI 75/220-240/24

- For 24 V LED modules
- 4-channel DALI converter
- Suitable for luminaires of protection classes I and II
- Dimming range: 0 to 100 % luminous flux
- Suitable for independent mounting
- Flexible addressing via DALI
- Suitable for indoor applications

OT 65/220-240/24 3DIM E

- For 24 V LED modules
- 3DIM interface (StepDIM/AstroDIM/DALI)
- Suitable for luminaires of protection classes I and II
- High surge protection > 3 kV
- Flexible setting options for dimming mode and level
- Stand-alone dimming function enables operation in existing installation
- Suitable for outdoor applications
- Accessories: 3DIM Tool 2.0 Software and DALI magic hardware for configuring 3DIM ECGs (www.osram.com/3dim)

OT DALI 45/220-240/700 LTCS

- Large output power range up to 45 W*
- SELV equivalent
- Current output range 50 – 700 mA
- Control of current setting via DIP switch and LEDset interface
- Very low inrush current
- Future-proof and flexible current setting
- Consistently high efficiency
- Suitable for indoor applications

OT 50/220-240/700 3DIMLT E

- Large output power range up to 54 W
- 3DIM interface (StepDIM/AstroDIM/DALI)
- Suitable for luminaires of protection classes I and II
- Current output range 75 – 700 mA
- High surge protection up to 4 kV (L-N) / 4 kV (L/N-PE)
- Flexible current setting, fully programmable ECG
- Different dimming modes and levels can be set
- Stand-alone dimming function enables operation in existing installation
- Suitable for outdoor applications

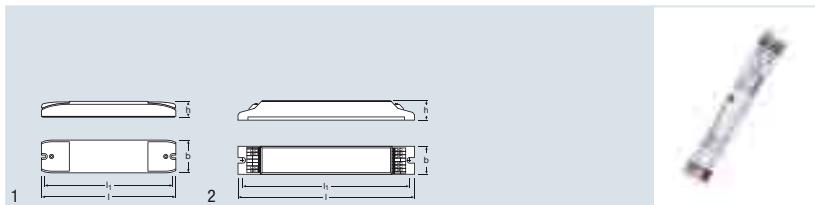

OT 90/220-240/700 3DIMLT E

- Large output power range up to 90 W
- 3DIM interface (StepDIM/AstroDIM/DALI)
- Suitable for luminaires of protection classes I and II
- Current output range 75 – 700 mA
- High surge protection up to 4 kV (L-N) / 4 kV (L/N-PE)
- Flexible current setting, fully programmable ECG
- Different dimming modes and levels can be set
- Stand-alone dimming function enables operation in existing installation
- Suitable for outdoor applications

* Suitable for emergency application

OTi DALI DIM

- Intelligent electronic constant-voltage 1-channel DALI dimmer
- Max. output current 5 A
- Housing with strain relief for separate installation
- Integrated TouchDIM® functionality enables dimming and switching via standard switches
- Dimming range 0.1-100 %
- Reversible overload, overtemperature and short-circuit protection

OTi DALI DIM LI

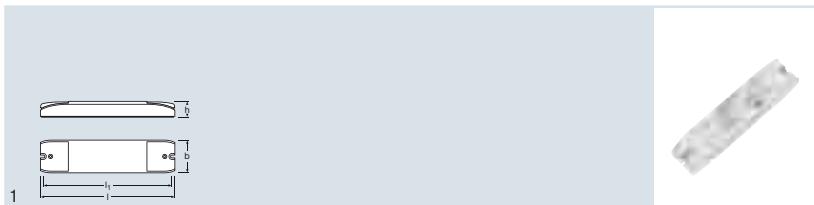

- Intelligent electronic constant-voltage 1-channel DALI dimmer
- Max. output current 4 A
- Compact housing for luminaire installation
- Integrated TouchDIM® functionality enables dimming and switching via standard switches
- Dimming range 0.1-100 %
- Reversible overload, overtemperature and short-circuit protection

OTi DALI 2x700 CS

- Intelligent electronic constant-current 2-channel DALI dimmer
- Output power: 32W @ 350 mA...66W @700 mA
- Housing with strain relief for separate installation
- Current of 350 or 700 mA (selectable)
- 1-channel (= one DALI address) or 2-channel operation (= occupancy of 2 DALI addresses), selectable
- Integrated TouchDIM® functionality enables dimming and switching via standard switches
- Dimming range 0.1-100 %
- Reversible overload, overtemperature and short-circuit protection

OPTOTRONIC® DIM

- Intelligent electronic constant-voltage 1-channel 1-10 V dimmer
- Maximum operating output voltage of 5 A
- Cable clamp housing for independent mounting
- Dimming range 0.1 to 100%
- The control input is separate in accordance with SELV requirements
- Reversible overload, overtemperature and short-circuit protection

OPTOTRONIC® RGB DIMM

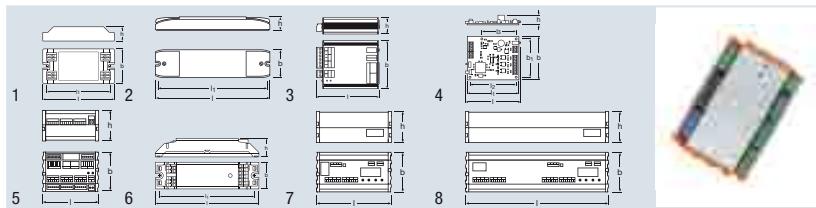

- Intelligent electronic constant-voltage 3-channel 1-10 V dimmer
- Maximum operating output voltage of 2 A per channel
- Cable clamp housing for independent mounting
- Dimming range 0.1 to 100%
- The control input is separate from the output in accordance with SELV requirements
- Reversible overload, overtemperature and short-circuit protection

OPTOTRONIC® RGB Sequencer

- Intelligent electronic constant-voltage 3-channel 1-10 V dimmer
- Maximum operating output voltage of 2 A per channel
- Cable clamp housing for independent mounting
- Dimming range 0.1 to 100%
- 8 color sequences; the brightness and speed are controlled via a 1-10 V input
- The control input is separate from the output in accordance with SELV requirements
- Reversible overload, overtemperature and short-circuit protection

OT DMX 3x1 RGB DIM

- Intelligent electronic constant-voltage 3-channel DMX dimmer
- Three output channels, can be controlled individually via DMX
- Automatic addressing via DIP switches
- Maximum operating output voltage of 1 A per channel
- Compact housing for luminaire installation
- Control via DMX interface by means of DMX control units such as EASY DMX SO
- Reversible overload, overtemperature and short-circuit protection

OT DMX RGB DIM

- Intelligent electronic constant-voltage 3-channel DMX dimmer
- Three output channels, can be controlled individually via DMX
- Addressing via rotary switches
- Maximum operating output voltage of 2 A per channel
- Constant-current dimmer with strain relief for separate installation
- Control via DMX interface by means of DMX control units such as EASY DMX SO
- Reversible overload, overtemperature and short-circuit protection

OT DMX 3x2.5 A DIM

OT DMX 3x2.5 A PCB DIM

- Intelligent electronic constant-voltage 3-channel DMX dimmer
- Three output channels, can be controlled individually via DMX
- Automatic or manual addressing
- Maximum operating output voltage of 2.5 A per channel
- Housing for installation or board version
- Control via DMX interface by means of DMX control units such as EASY DMX SO
- Daisy chaining for controlling multiple DMX and/or PWM-controlled LED light sources
- Reversible overload and short-circuit protection

OT DMX 9x2 A DIM SO

- Intelligent electronic constant-voltage 9-channel DMX dimmer
- Nine output channels, can be controlled individually via DMX
- Automatic or manual addressing
- Maximum operating output voltage of 2 A per channel
- Housing for series installation
- Control via DMX interface by means of DMX control units such as EASY DMX SO
- Daisy chaining for series control of multiple DMX devices
- Reversible overload and short-circuit protection

OT DMX 3x350 DIM LI

- Intelligent electronic constant-current 3-channel DMX dimmer
- Three output channels, can be controlled individually via DMX
- Manual addressing via pushbuttons
- Output current 350 mA
- Housing for luminaire installation and separate mounting
- Control via DMX interface by means of DMX controllers such as EASY DMX SO
- Reversible overload, overtemperature and short-circuit protection

OT DMX 6x350/700 DIM SO

- Intelligent electronic constant-current 6-channel DMX dimmer
- Six output channels, can be controlled individually via DMX
- Automatic or manual addressing
- Constant current dimmer, adjustable from 50 mA to 700 mA
- Housing for series installation
- Control via DMX interface by means of DMX controllers such as EASY DMX SO
- Control of multiple DMX and/or PWM-controlled LED light sources
- Daisy chaining for series control of multiple DMX devices
- Automatic amplification of the DMX signal
- Reversible short-circuit protection
- Overtemperature protection

OT DMX 12x350/700 DIM SO

- Intelligent electronic constant-current 12-channel DMX dimmer
- Twelve output channels, can be controlled individually via DMX
- Automatic or manual addressing
- Constant current dimmer, adjustable from 50 mA to 700 mA
- Housing for series installation
- Control via DMX interface by means of DMX controllers such as EASY DMX SO
- Daisy chaining for series control of multiple DMX devices
- Automatic amplification of the DMX signal
- Reversible short-circuit protection
- Overtemperature protection

Installation and operating instructions

The following installation and operating instructions have been included to help you to get the most out of your electronic control gear.

Requirements

The requirements to be met by lighting systems with luminaires operated with ECGs fall into the following categories:

1. Fault currents/RCD
2. Rating for automatic line protection systems/switch-on currents
3. ECGs in three-phase operation
(overvoltages/undervoltages/missing neutral conductor)
4. ECGs in emergency lighting systems
(voltage ranges and switch-on times)
5. Power factor/compensation
6. Permissible cable lengths
7. Faults in infrared controls/transmission systems
(IR remote control, sound transmission, audio frequency ripple control, paging systems)
8. Dimming
9. Fixtures for ECGs
10. Ambient and ECG temperatures
11. ECGs for outdoor lighting
12. Wiring of the ECGs
13. Life and reliability of ECGs

For more detailed information see the Technical Guides at www.osram.com/ecg-downloads

Installation and operating instructions

1. Fault currents/RCD

Problem:

For ECGs with protective earth (PE) both the high short-duration in-rush current and the small leakage current from the interference suppression capacitors in the ECGs can trigger the residual current detector.

Solution:

- Distribute luminaires across 3 phases and use 3-phase RCDs
- Use surge-current-resistant short-delay RCDs
- If permissible, use 30 mA RCDs

2. Rating for automatic line protection systems

In a choke/starter circuit the lamps do not all ignite simultaneously; in an ECG circuit all the fluorescent lamps ignite simultaneously.

On switch-on at peak voltage, the storage capacitors of electronic control gear cause a high but very brief current pulse.

In this case, the simultaneous charging of these capacitors in ECG operation can mean a higher system switch-on current than with a choke/starter circuit.

This reduces the maximum number of fixtures allowed per automatic line protection unit (see tables on the following pages).

For example, the maximum number of fixtures allowed on a 10 A automatic system reduces from 15 fixtures with 2x58 W lamps with conventional control gear in a twin circuit to 8 fixtures in an ECG circuit.

OSRAM offers an inrush current limiter EBN for POWERTRONIC® devices and for some OPTOTRONIC® devices.

The EBN-OS restricts the switch-on current, which means that a larger number of ECGs can be connected to an automatic cutout.

In the case of PTo the maximum permitted number of fixtures on a 10 A cutout is reduced to 7 PTos, 50 W.

Installation and operating instructions

Ratings for automatic line protection systems

10 A circuit breaker

Maximum permissible number of ECGs for operating T8 fluorescent lamps (L 18W, L 36W, L 58W) with an N circuit breaker 10 A, single-pole, type B (made by Siemens)

	ECG type 1-lamp	Max. no. of ECGs	LLG 1-lamp uncomp.	LLG 1-lamp parallel comp.	ECG type 2-lamp	Max. no. of ECGs	LLG 2-lamp DUO

Installation and operating instructions

Ratings for automatic line protection systems

When using the values given in these tables please note the following:

- In ECG operation the load data relates to switching on at peak voltage
- Circuit breaker type and characteristics:
The specified load from fluorescent lamps and the associated control gear applies to N circuit breakers of Type 5 SL and 5 SX with B characteristics.
If the above circuit breaker types with C characteristics are used the number of permitted fixtures for ECG operation can be doubled (please note VDE-0100-410 in particular)
- Circuit breaker design:
The specified loading is for single-pole circuit breakers. When multi-pole circuit breakers are employed (2-pole, 3-pole) the number of permitted fixtures is reduced by 20%.

- Lamp switch-on:

The specified load applies:

- to the joint and group-wise starting of the relevant number of fixtures in "choke operation"
- to the maximum permissible number of fixtures switched together (with one switching operation)

- Circuit impedance:

The specified loading applies with reference to a line impedance of 800 mΩ.

(This corresponds to a 15 m long cable with a diameter of 1.5 mm² from the distribution board to the first fixture and a further distance of 20 m to the middle of the circuit; at a line impedance of 400 mΩ, the permitted values are reduced by 10%, and by 20% for a line impedance of 200 mΩ)

Inrush currents for ECGs measured at $U_N = 230 \text{ V}_{\text{AC}}$

1) On request or in data sheet

Installation and operating instructions

The diagram above shows the wiring for fixtures or fixture groups in 3-phase circuits and with a common neutral conductor. If the common neutral conductor is interrupted in a 3-phase star

configuration and voltage is present, then fixtures or groups of fixtures operated with electronic control gear may be exposed to unacceptably high voltages and the ECG itself may be destroyed.

3. ECG in 3-phase mode

Overvoltages/undervoltages/no neutral conductor

1. Check whether the line voltage is within the application range of the ECG (DC/AC range from 198 V to 254 V for example).
2. The line connection should only be made to the fixture terminal. For fixtures or groups of fixtures in 3-phase circuits.
3. Make absolutely sure that the neutral conductor is correctly connected to all the ECG fixtures and that it is making proper contact.
4. Cables should only be disconnected or connected when no voltage is present.
5. For 3x230/240 V supply networks in triangular circuit arrangements, protection by way of common disconnection of the phase conductor is necessary.

Important:

- In new systems the loads must not be connected when the insulation resistance is measured with 500 V DC, since according to VDE 0100 T600 Section 9 the test voltage is also applied between the neutral conductor (N) and all 3 external lines (L1, L2, L3). In existing systems it is sufficient, without disconnecting the loads, to conduct an insulation test between the external conductors (L1, L2, L3) and the protective earth (PE). The neutral conductor (N) and the protective earth (PE) must not be electrically connected in any way when this is done. For this insulation measurement (500 V DC to ④) the neutral conductor disconnection terminal may only be opened with the line voltage switched off.
- Before the equipment is put into operation, make sure that the N conductor is correctly connected.
- During operation do not disconnect the N conductor under any circumstances.

Installation and operating instructions

1) The lamps must be ignited at over 198 V however

2) If POWERTRONIC® is switched on from cold, it takes 1 to 2 minutes for the lamp to reach 70% of the luminous flux

3) For suitable types see page 9.50

4) See data sheet for control gear

5. Power factor/compensation

The power factor λ for an electrical load is the ratio of the effective power ($P_{\text{eff}} = \text{voltage} \times \text{effective current}$) to the apparent power ($P_{\text{app}} = \text{voltage} \times \text{current}$). This value is affected both by the phase displacement $\cos \varphi$ between the current and the voltage and by the current distortion ε .

$$\lambda = \frac{P_{\text{eff}}}{P_{\text{app}}} = \varepsilon \cdot \cos \varphi$$

In contrast to CCGs (inductive, 50 Hz), there is hardly any phase displacement ($\cos \varphi=0.95$) with ECG (high frequency) so compensation is not required.

However distortion in the sine-wave current supply occurs during operation of electronic control gear. Generally speaking, these distortions are classified by integer multiples of the line frequency (harmonics). The harmonic content of the line current is strictly controlled by national and international standards (IEC 61000-3-2).

OSRAM ECGs have integrated active electronic harmonic filters for this purpose, which ensure a value for ε of more than 0.95 and therefore a power factor λ greater than 0.9 (exceptions are indicated).

Installation and operating instructions

6. Permissible cable lengths

QUICKTRONIC®:

When ECGs are used in fixtures the cables, if correctly routed within the fixtures, produce little interference. When ECGs are used in master/slave circuits the maximum permissible cable length between the ECG and the lamp must not be exceeded.

HALOTRONIC®:

The maximum 12 V cable length must be less than 2 m to comply with radio interference limit values. This means that fixtures can be installed within a radius of 4 m around HALOTRONIC®. The recommended minimum cross-section is 1 mm².

Cable routing:

The supply cable should not be routed alongside the HALOTRONIC® casing nor alongside the high-frequency 12 V secondary cable. This avoids high-frequency interference on the supply cable.

Instruments for measuring the secondary voltage: An instrument for measuring the secondary voltage must be a true RMS meter and have a bandwidth greater than or equal to 250 kHz (~3 dB). Any other instrument will give false readings.

OPTOTRONIC®:

The maximum cable length between OPTOTRONIC® and the LED module depends on the type of cable, the currents carried, compliance with radio interference limit values and how the cable is routed. The following maximum cable lengths can be used as guidelines:

OPTOTRONIC® control gear – 12V

OT 90/220-240/700 LT E	2 m
OT 50/220-240/700 LT E	2 m

Cable routing:

For reasons of interference suppression, the power cable should not be laid parallel to the casing and/or the secondary cable. This will avoid high-frequency coupling effects.

Measurement of the secondary voltage: standard multimeters with appropriate accuracy can be used.

POWERTRONIC®:

The maximum cable lengths between the lamp and POWERTRONIC® depend on the type of cable and how it is routed. The following maximum cable lengths can be used as guidelines:

Max. cable length for AC operation

Installation and operating instructions

7. Faults in infrared control/transmission systems

Fluorescent lamps have an emission in the wavelength range which is also used for infrared transmission and which can be affected by the lamp. Since the IR receivers used are largely non-selective, interference may occur in the IR system. The operating frequency of the ECGs is between 20 and 120 kHz. The light emitted from the fluorescent lamp is modulated at twice the operating frequency. Interference is produced by signals in the same frequency range.

Exception: Interference is not expected with POWERTRONIC®, HALOTRONIC® or OPTOTRONIC®.

IR remote control:

Systems operating at a sufficiently high carrier frequency (400 to 1500 kHz) are unlikely to suffer interference.

Sound transmission:

Up to now the carrier signal frequency for sound transmission has been 95 kHz and higher, which has led to serious disturbance from the 3rd, 5th and 7th harmonics of the ECG operating frequency (20 to 120 kHz in normal operation and up to 100 kHz with dimming). Headphone manufacturers have adopted higher and higher frequencies such as 2.3 MHz and 2.8 MHz.

Simultaneous interpreting systems also operate in the 95 kHz to 250 kHz range so it is best not to use the first six transmission channels, particularly channel 1, of the 32 available channels since these are likewise affected by the harmonics of the basic ECG frequencies.

High-frequency ripple control:

The carrier frequencies used are around 120 kHz. Transmission can be adversely affected by radio interference suppression capacitors which are included in all ECGs and other electronic loads, such as the power supplies of PCs.

Paging systems:

Generally only HF paging systems (operating in the MHz range) should be used. If inductive paging systems are used (25 to 40 kHz) reliable operation is not possible.

Electronic merchandise security systems:

In many shops nowadays, merchandise such as DVDs, hifi equipment and clothing is protected against theft by electronic security systems. These systems typically operate with resonance frequencies in the kHz range (e.g. a pulse is emitted which causes an amorphous metal in the security tag to resonate; one of the largest suppliers uses a security system that operates at 58 kHz).

In unfavorable conditions, these systems may suffer from interference if the operating frequency is between 30 kHz and 150 kHz. Such interference can be eliminated by increasing the distance between the fixture and the transmitting/receiving system and by using fixtures with metallic louvers.

8. Dimming mode

a) QUICKTRONIC® units that can be dimmed have the letters ...DIM in their references. They are dimmed via the 1-10 V interface (QTi...DIM), or via the DALI interface (QTi DALI ... DIM) or via Touch DIM® (also with QTi DALI ... DIM), see p. 10.13 ff. For special technical data, such as wiring and associated control components, please refer to the technical guide for QUICKTRONIC® DALI/DIM. Allow new lamps to burn in for 100 hours at 100% luminous flux since only after this time will they exhibit stable values. A master/slave circuit (one ECG for two separate fixtures with wiring) is not permitted for dimmable ECGs.

b) HALOTRONIC® can be controlled with various dimmers (see page 9.49) or dimming modules (see page 9.53). Since the interface between the dimmer and the electronic transformer is not standardized, there may be malfunctions in individual cases.

c) POWERTRONIC® PTo 3 DIM units enable metal halide lamps with ceramic burners and also sodium vapor lamps to be dimmed. Dimming is performed via the DALI interface, StepDIM 2-stage phase control or autonomously via the internal AstroDIM control system of the ECG. Details on dimming HID lamps can be found in "Technical information on power reduction for high-intensity discharge lamps" (www.osram.com).

d) OPTOTRONIC® ECGs offer the following interfaces for dimming: 1-10 V, DALI, leading-edge/trailing-edge phase dimmers and 3DIM. The minimum dimming value depends on the type of device. In addition, some ECGs offer the option of operating MULTI3 sensors directly on the device. Constant voltage LED ECGs can be expanded with appropriate DIM modules (p. 9.74).

9. Fixtures with ECGs

The following general points apply to fixtures with electronic control gear:

- a) The temperature limits of the ECGs as regards ambient temperature and measuring point temperature on the ECG must not be exceeded (see 10. Ambient and ECG temperatures).
- b) The maximum permissible radio interference suppression values (EN 55015) must not be exceeded. Make sure the protective conductor and the function earth are correctly connected. Running the lamp cables and protective conductor together (e.g. NYM cables) may lead to problems due to high-frequency interference.
- c) After being installed or replaced, the lamps must be burned in at full load for 100 hours to stabilize the discharge process.

Installation and operating instructions

10. Ambient and ECG temperatures

The temperature ranges specified for the relevant control gear must be maintained to enable the ECG to operate reliably. Generally speaking, lower operating temperatures can extend the life of ECGs. When ECGs are built into fixtures the measuring point temperature t_c on the casing is the crucial parameter. The maximum permissible value specified for the ECG concerned must not be exceeded.

11. ECGs for outdoor fixtures

Electronic control gear has been developed for indoor use (IP 20).

ECGs for high-intensity discharge lamps (PTo) and devices for LED modules (OT...E and OT...P) have been designed specifically for outdoor applications. They are specially equipped for such applications; for example they are protected against moisture, AC voltage peaks and vibrations (wind load, rail vehicles). When using ECGs in outdoor fixtures it must be remembered that the ECG may be exposed to humidity.

1. For fixtures of protection type 5 (protected against water jets, IP65 for example) standard ECGs can be used since moisture cannot penetrate this type of fixture, so there is little chance of ECG corrosion.
2. For fixtures of protection type 3 (protected against splash water, IP43 for example) it is likely that water droplets will penetrate and thus cause corrosion and failure of unprotected standard ECGs. In cases of doubt (e.g. bollard luminaires, outdoor displays), additional protective measures should be taken such as using OUTKIT (see page 9.54).

12. Wiring of ECGs

Parallel connection of HALOTRONIC® and OPTOTRONIC® (with the exception of OT 75/220-240/24 [E], OTe 90/220-240/4x350 E and OTe 90/220-240/4x500 E) is not permitted on the secondary side. Series connection of HALOTRONIC® and OPTOTRONIC® to increase the voltage or for voltage matching is not permitted on the secondary side, unless specifically indicated in the data sheet. Lamp-side switching or dimming is not permitted. The only permitted loads for electronic transformers are low-voltage halogen lamps. For details see the Technical Guides.

13. Life and reliability of ECGs

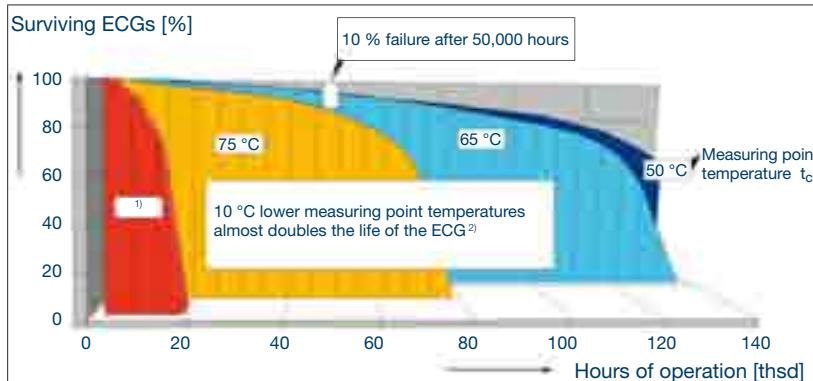

The failure rate of electronic components depends not only on the component specification and quality but also very considerably on the operating temperature. OSRAM's ECGs are designed so that at the maximum permissible ECG temperature (t_c , max.) a failure rate of fewer than 2 per thousand ECGs per 1000 hours of operation can be expected. This corresponds to an ECG life of 50,000 hours at a percentage ECG failure rate of 10%. In actual practice it can be assumed that at a temperature 10°C less than the maximum permitted temperature (t_c) the life of an ECG is doubled.

The following have different lifetimes:

1. up to 30,000 hours for QUICKTRONIC® QT-ECO and DULUXTRONIC®, HALOTRONIC® HTM MOUSE® and HTN at a failure rate of < 10%
2. up to 60,000 hours for QT ENDURA at a failure rate of < 10%
3. up to 30,000, 50,000 or 85,000 hours for OPTOTRONIC® depending on version at a failure rate of < 10%
4. up to 60,000 hours for POWERTRONIC® PTo at a failure rate of < 8%, up to 40,000 hours for POWERTRONIC® PTi at a failure rate of < 10%, up to 30,000 hours for POWERTRONIC® PT-FIT at a failure rate of < 10%

Subject to change without notice. Errors and omission excepted. This catalog information supersedes all previous information.

Special applications, such as operation in corrosive atmospheres, strong vibrations, impermissible voltage conditions etc., may necessitate further protection measures.

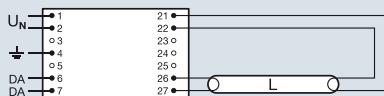

1) If the maximum permissible temperature at the t_c point is exceeded the failure rate may increase dramatically.

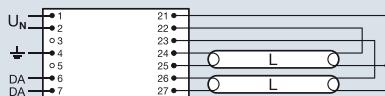

2) For more precise information please refer to the product data sheet.

Light management systems from OSRAM – simple, complete, innovative

The right light in the right amount at the right place and at the right time promotes our sense of well-being and stimulates us to be active. In addition to the technical and architectural aspects, light management systems (LMS) therefore play an important role in the holistic approach to planning high-quality lighting systems.

Light management systems detect and control different lighting levels and color mixes, so they give lighting a dynamic dimension. Automatic changes to the amount, color and direction of the light means that the lighting system can be controlled on the basis of demand – from daylight-dependent control and dynamic lighting applications to pushbutton selection of different lighting scenes.

Light management solutions can bring the demands for comfort and energy savings into perfect harmony. Users can adjust the lighting level themselves at any time to suit their specific needs. At the same time, the lighting system can be faded up or down automatically depending on the amount of available daylight, leading to enormous energy saving potential.

Light management products from OSRAM provide the ideal basis for innovative tailor-made lighting concepts – from a simple individual luminaire to complex and large-area solutions. Thanks to our many years of experience and in-depth technical know-how, our wide-ranging product portfolio meets the requirements in many different areas of applications.

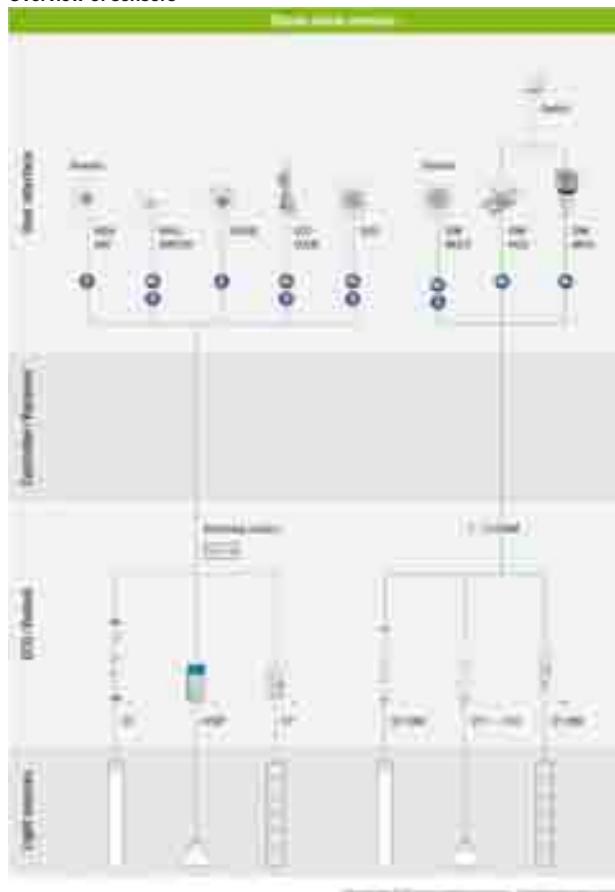

Stand-alone sensors: starting point for energy-saving lighting control

Sensors provide the basis for energy-saving daylight-dependent and motion/presence-dependent lighting. With motion/presence sensors the incident daylight is measured and if necessary supplemented with artificial light. The lighting system is switched on only if persons are present in the room. Using sensors can therefore achieve energy savings of up to 70%*.

Applications

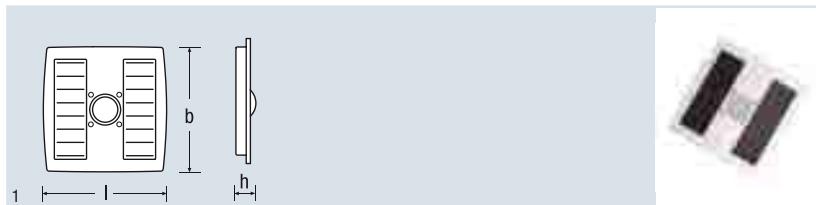

- Offices: single and group workplaces
- Waiting rooms and conference rooms
- Corridors and foyers
- Private living spaces
- Hotel rooms
- Shops and premises
- Toilets and washrooms
- Factories and warehouses

Overview of sensors

* Compared with conventional systems: T8 lamp, conventional control gear, no sensors

SOLAR

Product reference	Product number	Product description			
SOLAR	4008321385628	Light and presence sensor	9 ¹⁾	100 ²⁾	10...1000 ²⁾
Product reference					
SOLAR	Ceiling mounting	IP50	108	108	26

1) Max. diameter (m)
2) Approx.

Product characteristics

- Range: up to 30 m (in buildings) or up to 100 m (in the open air)

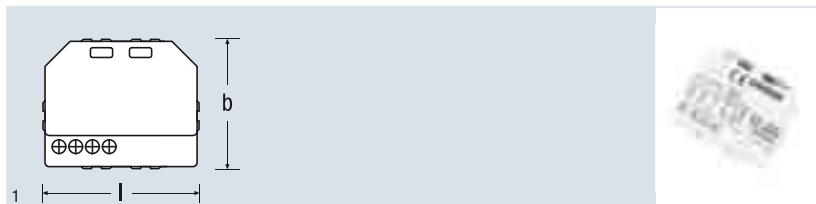

Product benefits

- No cables, no batteries: maintenance-free EnOcean radio technology
- Up to 45 % energy savings (compared with manual switching)

Applications

- Wireless and flexible installations

Switch RC

Product reference	Product number	Product description			
Switch RC	4008321385642	Radio receiver	220-240	50	Max. 30 ¹⁾
Product reference					
Switch RC	Integration in flush-type box I	IP20 Ceiling installation	45	37	23

1) Valid in buildings

Product characteristics

- Adjustable switch-off delay: 1 to 20 minutes
- Range: up to 30 m (in buildings) or up to 100 m (in the open air)
- Up to 8 sensors and 8 wall-mounted/handheld transmitters can be trained on one Switch RC receiver
- Frequency band: 868.3 MHz

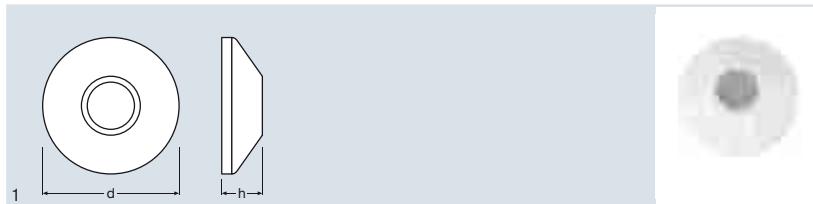

Product benefits

- Choice of 5 different operating modes

Technical equipment

- Suitable for all OSRAM control elements and sensors with EnOcean radio technology
- Suitable for up to 14 ECGs

HIGH BAY

Product reference	Product number	Product description	V	Hz	l
HIGH BAY	4008321410078	Motion sensor	120-277	50-60	18 ¹⁾
Product reference	Max. diameter (m) 2)	Max. height (m) 13	Ceiling mounting	IP	d [mm] h [mm]
HIGH BAY	100 ²⁾	13	Ceiling mounting	IP20	116 39

1) Max. diameter (m)

2) Approx.

Product characteristics

- 3 to 10 m: detection of motion by people
- 3 to 13 m: detection of vehicle movement (e.g. fork lift truck)
- Adjustable switch-off delay: 30 s to 20 min
- Standby consumption: max. 0.25 W

Product benefits

- Up to 35 % energy savings (compared with manual switching)

Applications

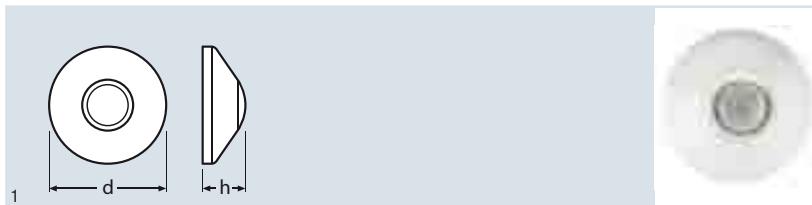

- High ceilings
- Sports halls and factories

Technical equipment

- Suitable for up to 15 ECGs
- Installation by use of mounting adapters possible

VISION

Product reference	Product number	Product description	V	Hz	21 ¹⁾
VISION	4008321957047	Motion sensor	120-277	50-60	
Product reference			IP	d [mm]	h [mm]
VISION	140 ²⁾	4.5	IP20	116	40
		Ceiling mounting			20

1) Max. diameter (m)

2) Approx.

Product characteristics

- Adjustable switch-off delay: 30 s to 20 min
- Standby consumption: max. 0.25 W

Product benefits

- Up to 35 % energy savings (compared with manual switching)

Applications

- Large areas
- Open-plan offices, corridors and storage rooms

Technical equipment

- Suitable for up to 15 EOGs
- Installation by use of mounting adapters possible

DIM MULTI

Product reference	Product number	Product description	V	CONTROL	9 ¹⁾	100 ²⁾	Lx
DIM MULTI	4050300554471	Light and presence sensor	220-240	1...10 V	9 ¹⁾	100 ²⁾	20...800 ²⁾
Product reference			IP	I [mm]	b [mm]	h [mm]	
DIM MULTI	5	Luminaire installation Ceiling mounting Lamp clip	IP20	58	71	42	20

1) Max. diameter (m)

2) Approx.

Product characteristics

- Combined daylight and presence detection
- Daylight detection only
- All the functions can be selected via rotary switch
- Adjustable switch-off delay: 1 to 30 min
- Load capacity of switching contact: 5 A ohmic load

Product benefits

- Up to 70 % energy savings (compared with CCG + T8 lamp, without sensors)
- Daylight-dependent control with automatic shutdown in adequate daylight
- Compensates 100 % of the incoming daylight
- Multiple sensors can be networked

Applications

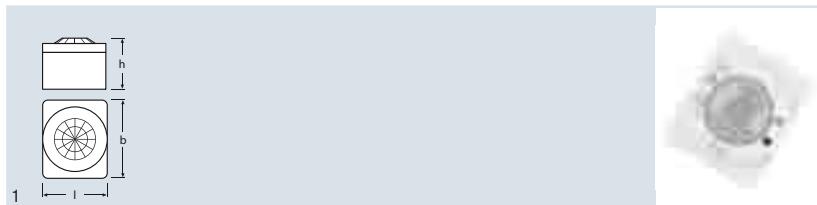

- Individual offices
- Open-plan offices
- Waiting rooms

Technical equipment

- Suitable for up to 30 ECGs

DUO

Product reference	Product number	Product description	V	Hz	12 ¹⁾	110 ²⁾	Lx
DUO	4008321496355	Light and presence sensor	220-240	50-60			50...500 ²⁾
Product reference			IP	I [mm]	b [mm]	h [mm]	
DUO	5	Luminaire installation Ceiling mounting Lamp clip	IP20	58	71	47	20

1) Max. diameter (m)

2) Approx.

Product characteristics

- Combined daylight and presence detection
- Daylight detection only
- Presence detection only
- All functions can be selected via rotary switch
- Adjustable switch-off delay: 1 to 60 min
- Load capacity of switching contact: 5 A ohmic load
- Standby consumption: max. 0.7 W

Product benefits

- Up to 45 % energy savings (compared with manual switching)
- Multiple sensors can be networked
- Maintenance-free operation and minimal installation costs

Applications

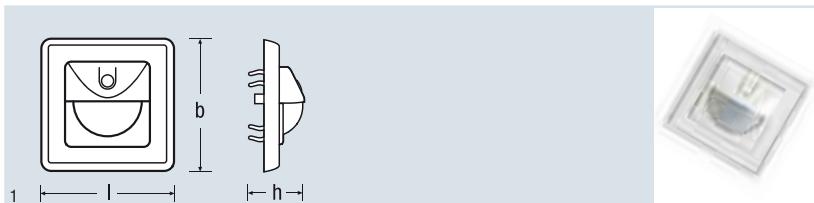

- Individual offices
- Open-plan offices
- Waiting rooms

Technical equipment

- Suitable for up to 30 ECGs

WALL Switch

Product reference	Product number	Product description	V	Hz			Lx
WALL Switch	4008321467386	Light and motion sensor	220-240	50-60	8 ¹⁾	180 ²⁾	20...1000 ²⁾
Product reference			IP				
WALL Switch	2	Integration in flush-type box	IP20	82	82	26	20

1) Max. diameter (m)

2) Approx.

Product characteristics

- Stairwell function
- Timer function
- Continuous light function
- Adjustable switch-off delay: continuous up to 30 min
- Ideal mounting height: 0.8 to 1.2 m (maximum 2.2 m)

Product benefits

- Up to 45 % energy savings (compared with manual switching)
- Multiple sensors can be networked

Applications

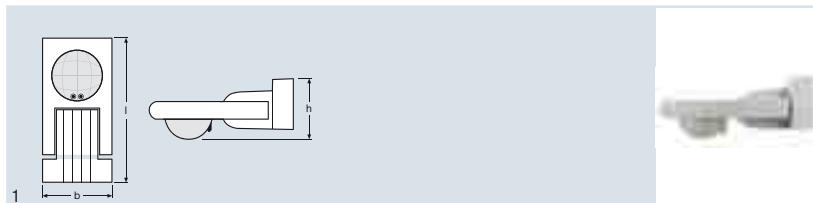

- Touch-free switching (e.g. in stairwells)

Technical equipment

- Suitable for up to 14 ECGs

OUTDOOR

Product reference	Product number	Product description	V	Hz	16 ¹⁾	120 ²⁾	Lx
OUTDOOR	4008321957061	Light and motion sensor	220-240	50-60	16 ¹⁾	120 ²⁾	> 1 ²⁾
Product reference			IP	I [mm]	b [mm]	h [mm]	
OUTDOOR	4	Ceiling mounting Wall mounting	IP55	180	86	74	20

1) Max. diameter (m)

2) Approx.

Product characteristics

- Combined daylight and motion detection
- Motion detection only
- Adjustable switch-off delay: 5 s to 30 min
- Ideal mounting height: 2.5 m

Product benefits

- Up to 45 % energy savings (compared with manual switching)
- Manual control with optional switch or pushbutton

Applications

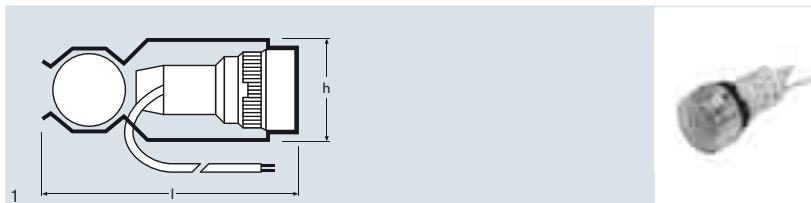

- Outdoor applications

Technical equipment

- Suitable for up to 14 ECGs

DIM MICO

Product reference	Product number	Product description	CONTROL	$\Delta\varphi$	Lx
DIM MICO	4008321586056	Light sensor	1...10 V	80 ¹⁾	20...800 ¹⁾
Product reference					
DIM MICO	8	IP20	95	40	35

1) Approx.

Product characteristics

- Simple clip-on fitting for T8 and T5 lamps
- Cable length: 700 mm

Product benefits

- Up to 40 % energy savings (compared with CCG + T8 lamp, without sensors)
- Compensates 100 % of the incoming daylight
- Direct connection to the 1...10 V-interface
- Simple setting of the setpoint by means of a potentiometer

Applications

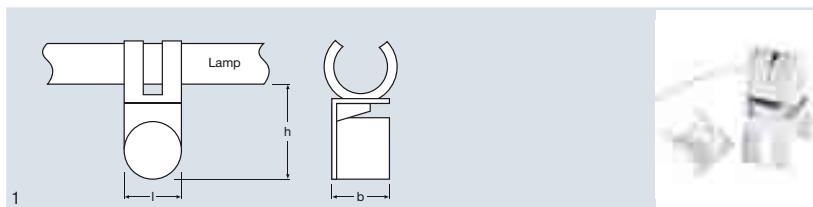

- Strip lighting in individual and open-plan offices

Technical equipment

- Suitable for up to 100 ECGs
- Suitable for up to 16 signal amplifiers

DIM PICO

Product reference	Product number	Product description	CONTROL	50 ⁽¹⁾	A	A/h
DIM PICO	4050300554457	Light sensor	1...10 V	50 ⁽¹⁾	5	
Product reference	Product number	IP	I [mm]	b [mm]	h [mm]	
DIM PICO	Luminaire installation	IP20	21	21	31	20

1) Approx.

Product characteristics

- Simple clip-on fitting for T8 and T5 lamps
- Load capacity of the control output: max. 6 mA
- Cable length: 700 mm

Product benefits

- Up to 30% energy savings (compared with CCG + T8 lamp, without sensors)
- Compensates 50% of the incoming daylight
- Direct connection to the 1...10 V interface
- Simple setting of the setpoint by means of a potentiometer

Applications

- Individual fixtures

Technical equipment

- Suitable for up to 10 ECGs

Touch DIM®: lighting control without a controller and dimming without a control line

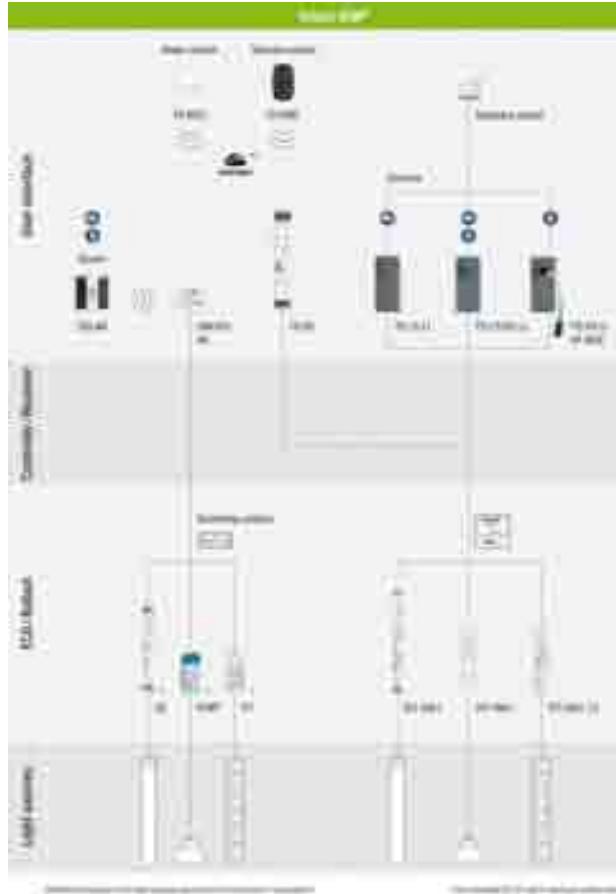

The Touch DIM® function in the DALI ECG family makes it possible to dim and switch the control gear directly with line voltage at the DALI control terminals. There is no longer any need for a separate controller as the ECG itself acts as the controller. By using DALI to 1...10 V converters it is possible also to control 1...10 V ECGs via Touch DIM®. The Touch DIM® function is characterized in particular by protective soft starting, precise setting of the required light value, manual storage of the switch-on value by double-clicking or switching on at the last dimmer value and automatic restoration of the last state after a power failure.

In conjunction with Touch DIM® sensors it is possible to provide daylight-dependent and presence-dependent lighting control, and with the 2-channel radio switch + associated radio receiver module all Touch DIM® compatible electronic control gear can be controlled. Both radio components are absolutely maintenance-free. Up to 30 radio switches can be easily saved and deleted in each receiver module with one click. Thanks to innovative piezo technology, batteries are not needed to power the transmitter module in the radio switch.

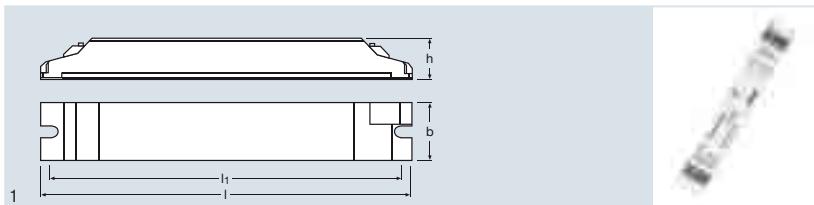

Applications

- Offices: single and group workplaces
 - Suspended luminaires
 - Recessed and surface-mounted ceiling fixtures
 - Strip lighting
 - Floor-luminaires
 - Modernization of existing systems
 - Renovation of historic buildings

System overview

Touch DIM® RC

Product reference	Product number	Product description	V	Hz	CONTROL	T _a
TOUCH DIM RC	4008321031938	2-channel radio receiver module	220-240	50-60	Touch DIM	0...+50
Product reference			I [mm]	b [mm]	h [mm]	
TOUCH DIM RC		Luminaire installation I IP20 Ceiling installation	189	30	21	25

Product characteristics

- Radio receiver for battery-free EnOcean radio switches for 2 lighting groups
- Maximum power consumption: 1.5 W
- Frequency band: 868.3 MHz
- 2 floating relay outputs: max. 45 mA/240 V
- Up to 30 wall transmitters can be saved

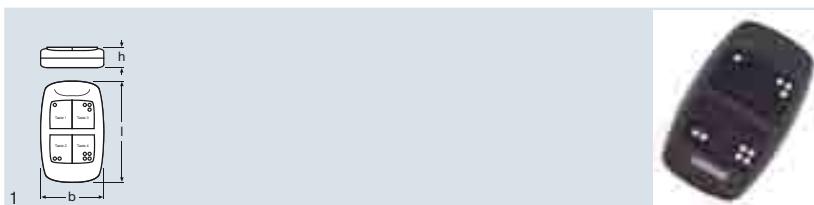

Product benefits

- Dimming without a control line by use of maintenance-free EnOcean radio technology

Technical equipment

- Suitable for up to 15 QTi DALI ECGs, OTi DALI ECGs or HTi transformers per output

Touch DIM® RMC

Product reference	Product number	Product description	CONTROL	IP

NEW

Product characteristics

- Up to 4 ECGs can be connected

Product benefits

- Maximum power consumption: 0.5 W

Applications

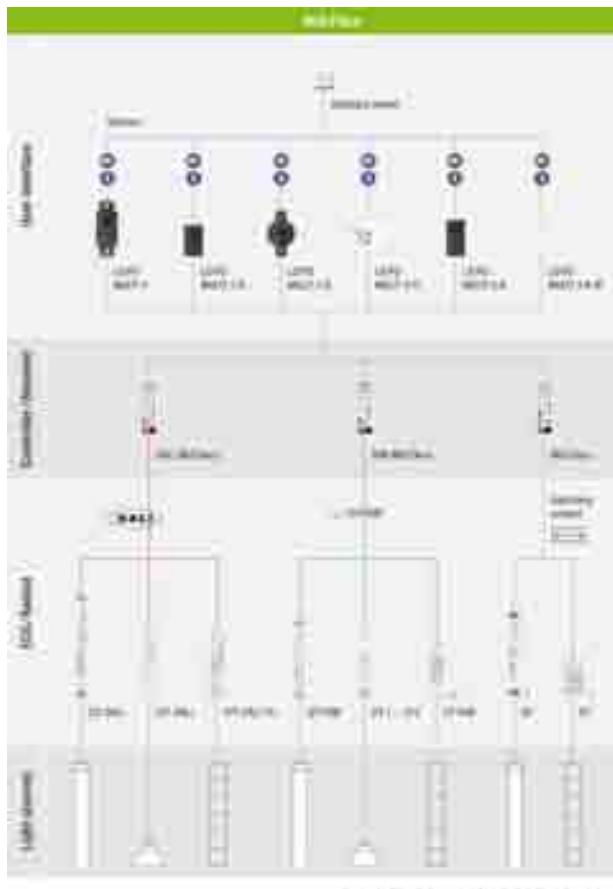

- Suitable for luminaire installation with small dimensions

Technical equipment

- Available with 4 different lens options (5 m; 10 m; Spot; Small movements)

MULTIeco: clever system for single and group workplaces

The compact and modular MULTIeco light management system offers varied daylight-dependent and presence-dependent lighting control with minimized standby power.

The right solution for every need.

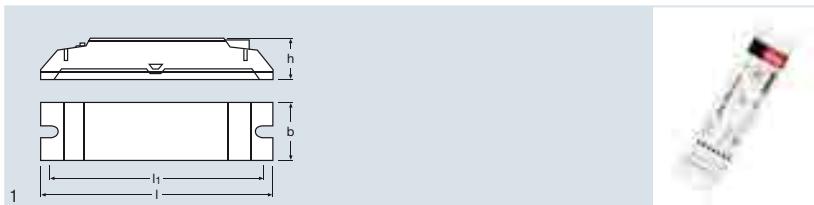

MULTIeco is extremely versatile. The controller is available in a DALI version, a 1...10 V version and a switching version. There are six different light and presence sensors for luminaire and ceiling installation as new systems or as retrofits. All MULTIeco controllers have extremely compact dimensions and can be installed separately in space-critical locations with the ECO CI KIT. Possible applications include offices, toilets and common areas.

The benefits of MULTIeco:

- Standby consumption < 0.5 W
- Luminaire integration or separate mounting with ECO CI KIT
- Control of up to 20 ECGs
- Extremely compact dimensions
- Meets the Swiss MINERGIE® guidelines and the EU Ecodesign specifications planned for 2012

DALI MULTleco

Product reference	Product number	Product description	V	Hz	CONTROL	T _a

DALI MULTleco	Luminaire installation Ceiling installation	IP20	II	118	30	21
						50

Product characteristics

- Suitable for daylight-dependent control with presence function
- Standby consumption: max. 0.5 W
- Integrated load contact
- 14 operating modes via DIP switches for daylight or presence-dependent lighting control
- Up to 3 controllers can be synchronized for a central presence function
- Manual dimming and setpoint setting via standard switches

Product benefits

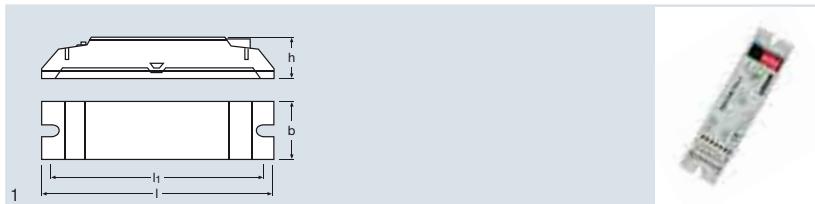

- Complies with MINERGIE and EU Ecodesign requirements planned for 2012
- Up to 75% energy savings (compared with CCG + T8 lamp, without sensors)
- Also available in industrial packs (50 units)

Technical equipment

- Suitable for up to 2 sensors (compatible with all MULTI 3 sensors)
- Suitable for up to 10 ECGs with DALI interface
- Separate installation possible with ECO CI KIT

1) Approx.

Product characteristics

- Retrofit sensor with clip
- Connection via modular 4p4c connector
- Connecting cable length: 2.1m (detachable)

Product benefits

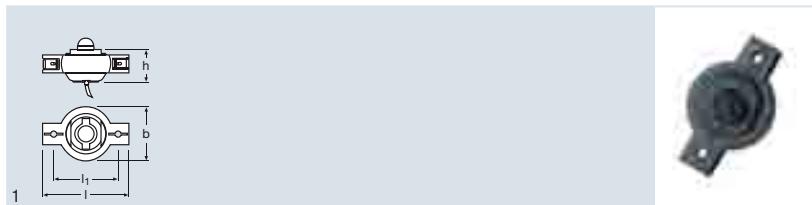

- Also available in industrial packs (50 units)

Technical equipment

- White version with high-temperature cable and clip
- Anthracite version with standard cable, no clip

DALIeco: intelligent and powerful light management system for lighting groups in small, medium and large rooms

2 DALI channels, 1-click setup, selectable lighting modes and remote controllable extra functions – DALIeco offers a wide range of operation possibilities for intelligent energy saving solutions.

Flexible.

The modular system is setting new standards in terms of flexibility in planning and installing a cost-efficient light management system. The system components offer the possibility of direct luminaire integration as well as independent luminaire installation.

Powerful.

Up to 32 DALI ECGs, 6 sensors and 4 pushbuttons can be connected via a DALIeco controller.

Intelligent.

1-click setup enables fully automatic system calibration in accordance with the photometric requirements for workplaces.

Simple.

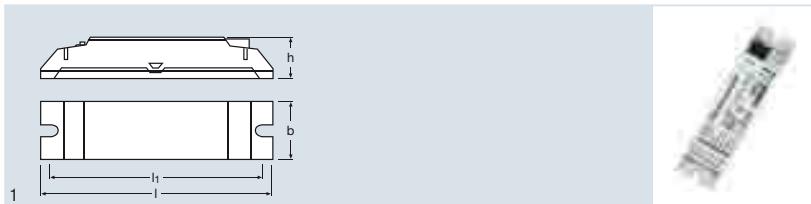

Integration of extension sensors and additional pushbuttons via the DALI lines is simple and installation-friendly.

Applications

- Offices: single and group workplaces
- Waiting rooms and conference rooms
- Corridors and foyers
- Private living spaces
- Hotel rooms
- Shops and premises
- Toilets and washrooms
- Factories and warehouses

DALIeco Control

Product reference	Product number	Product description	V	Hz	CONTROL	T _a

DALIeco Control	Luminaire installation	IP20	118	30	21	25

Product characteristics

- Suitable for daylight-dependent control with presence function
- 2 DALI lines with variable offset
- Multiple sensors can be connected via a direct sensor input or DALI line
- Simple system configuration by remote control
- 6 predefined function modes for offices, classrooms, corridors, etc.
- Different lighting functions can be selected, e.g. 100 hour lamp burn-in function

Product benefits

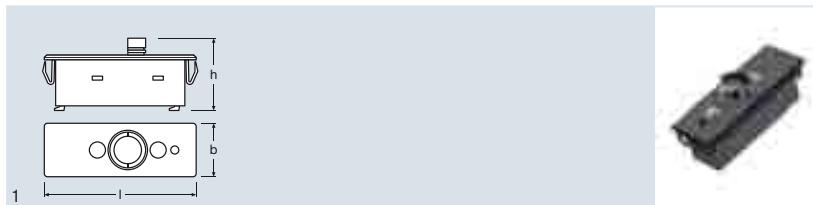

- Up to 75 % energy savings (compared with CCG + T8 lamp, without sensors)
- 1-click setup

Technical equipment

- Separate installation possible with ECO CI KIT

DALIeco LS/PD LI

NEW

Product characteristics

- Remote control for configuring the DALIeco system
- USB connection for PC data transfer

Technical equipment

- Batteries included

EASY Color Control: lighting control for static and dynamic illumination

You do not need to be an expert to use the EASY Color Control light management system to best effect. It has never been easier to create lighting scenes. Whether you need it for general illumination, accent lighting, small applications or complex ones, the EASY Color Control system is the right choice.

Innovative light sources (LEDs/OLEDs) and conventional light sources can be controlled simultaneously (on/off, dimming) at any time. The EASY Color Control light management system provides the basis for static or dynamic lighting solutions.

System architecture

Multiple output channels can be controlled separately with a single control element. The system has an integrated controller for four separate sequences and 16 freely definable lighting scenes. With the aid of a plug system protected against polarity reversal it can be expanded to a maximum of 64 controllers/256 channels. Most control units are available for luminaire integration and ceiling installation.

New functionality

Applications such as shops require new lighting concepts to attract people, secure brand communication and feel customers comfortable. The new DALI EASY SO is a clever light control that saves energy and costs without skimping on shopping experience.

Lighting scenes can be scheduled and recalled automatically by switch timers allowing retail personnel to focus on shop visitors needs.

Installer's job is easier with DALI EASY SO, at last creation of shop lighting concept does not require software. If different control functions are needed (e.g. for different room requirements or for controlling artificial and natural light by means of additional window blinds), the new EASY Touch Panel is the perfect answer. Its simple programming and the ability to configure all the screen elements to suit the needs of the particular user in a wide variety of language options make the EASY Touch Panel a highly versatile operating and control element.

Controls

There is a simple jogwheel control on the EASY Color Drive wall control unit and the EASY Hybrid Remote control. Infrared or radio receivers that can be installed in luminaires or ceilings provide remote control access to all the major functions.

A switch coupler that can be installed in a flush-mounted box enables standard pushbuttons, switches or motion sensors to be connected.

The controllers can be connected to a PC USB port via an adapter cable so that scenes and sequences can be easily set up and controlled on screen. Colors can be selected, copied and adjusted at the click of a mouse. The preview function provides a useful offline view of the scenes and sequences.

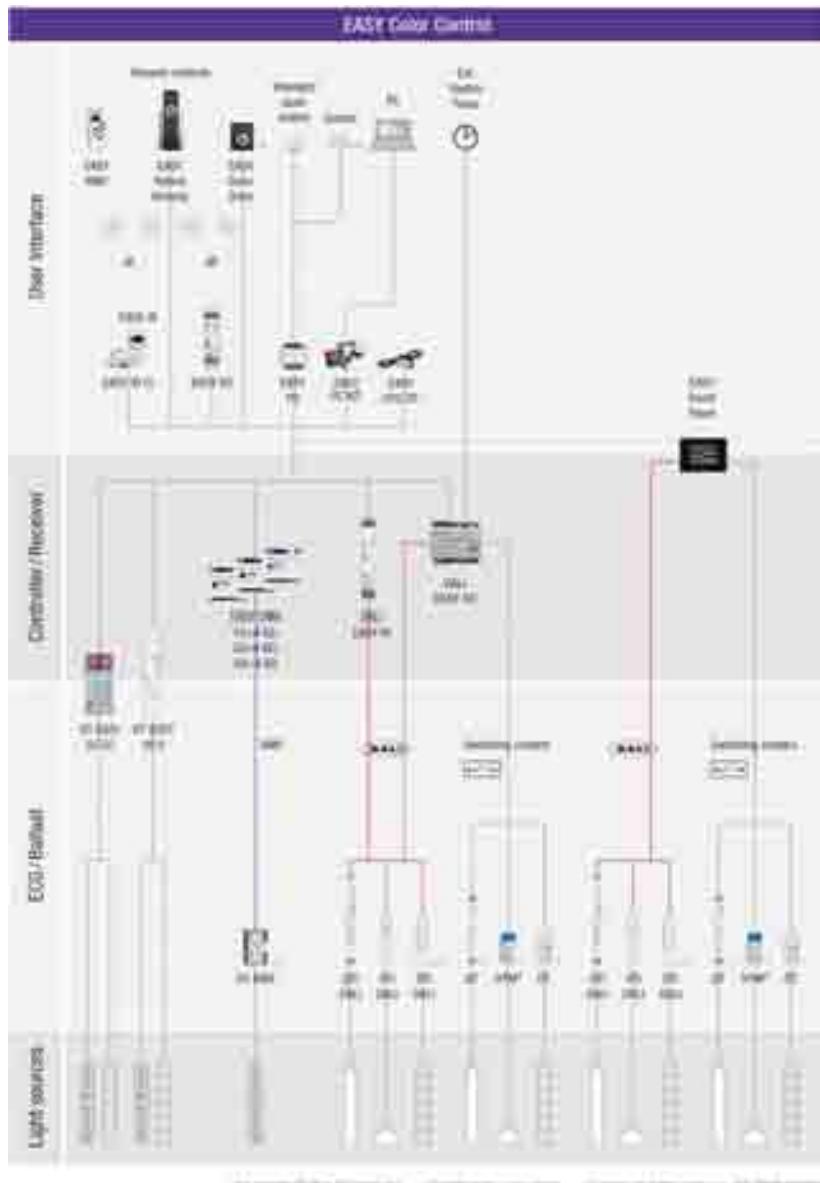

Applications:

- Shops and retail outlets
- Restaurants and bars
- Hospitals and retirement homes
- Hotel foyers and restaurants
- Conference rooms
- Health and fitness centers
- Façade lighting

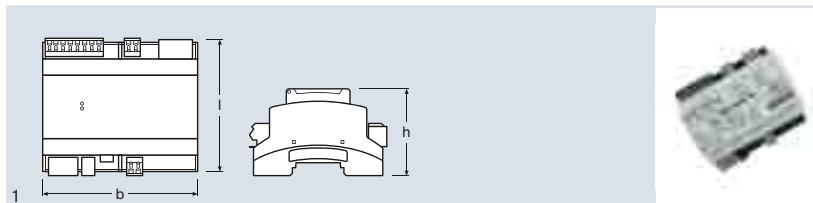

Main functions:

- Storage and retrieval of static scenes
- Switching and dimming of multiple luminaire groups
- Ideal for white, colored and tunable white light
- Can be expanded to 256 channels
- Intuitive time-based scene management
- Adjustable fade-in time for smooth scene transitions
- Daylight simulation in rooms without windows
- Daylight control (window blinds)
- Intuitive color control (LED and fluorescent lamps)

DALI EASY SO

Product reference	Product number	Product description	V	Hz	CONTROL	T _d
DALI EASY SO	4008321691040	Controller	110-240	50-60	DALI I EASY	0..+50
Product reference	Product number	Product description	I [mA]	b [mm]	h [mm]	T _d
DALI EASY SO	Snap-in	IP20	96	108	62	6

Product characteristics

- Control of lighting scenes and sequences (recall/store)
- Manual, event and time-dependent lighting control
- 4 independent DALI lines
- A maximum of 32 ECGs
- 1 output relay (3A)
- 2 inputs for floating contacts (on/off/dimming and time switch)
- Can be expanded to 64 devices
- Integrated load contact for ECG standby shutdown

Product benefits

- Basic setup without software
- Lighting schedule with external time switch
- Automatic scene recall
- PHM: Instant lamp starting from standby
- Control of switchable and dimmable lighting

Applications

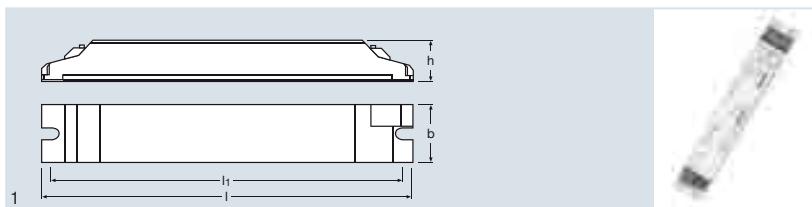

- Shops
- Bars/restaurants

Technical equipment

- Large number of EASY user interfaces / control units
- Can be used with DALI REPEATER
- Can be used with DALI CONV
- Can be used with DALI SWITCH

DALI EASY III

Product reference	Product number	Product description	V	Hz	CONTROL	No. of outputs

1) Up to

Product characteristics

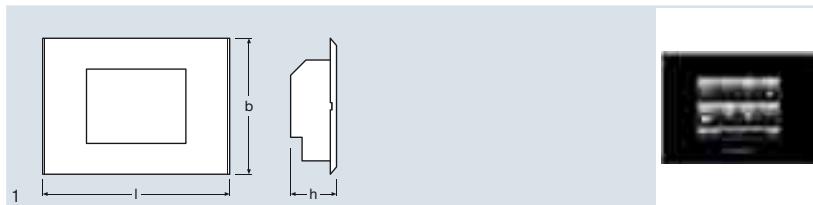

- Suitable for simple control of luminaires and devices via DMX addresses
- Available for controlling up to 16, 32 or 64 individual light points or lighting groups
- Up to 64 lighting scenes and 4 sequences can be programmed
- Dimming, ON/OFF via conventional switches
- Test procedures for rapid error-free installation without software

Technical equipment

- Configuration via the EASY Color Control software
- DALI Plug&Play expansion via DALI EASY SO

EASY Touch Panel

Product reference	Product number	Product description	V	Hz	CONTROL
EASY Touch Panel	4008321956989	Touchpanel	100-240	50-60	EASY DALI
Product reference					
EASY Touch Panel	Integration in flush-type box	IP20	220	160	55

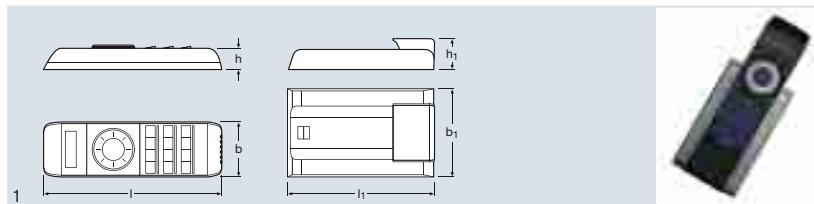

Product characteristics

- 5.7" display, 640x480 pixels, 16.8 million colors
- Operation of up to 64 lighting scenes and 4 sequences
- Operation of 4 switchable loads or 2 louver blinds via integrated relay contacts
- 4 integrated DALI broadcast channels for up to 32 ECGs, can be expanded to 16 channels

Technical equipment

- Suitable for up to 32 DALI ECGs
- Flexible expansion via DALI repeaters or EASY control

EASY Hybrid Remote

Product reference	Product number	Product description	CONTROL		IP

1) Valid in buildings

Product characteristics

- Infrared remote control for configuring and operating the EASY controllers
- Control of the sequencing speed, central dimming, 4 channels and 4 scenes

Technical equipment

- Docking station for wall mounting included

EASY PB Coupler

Product reference	Product number	Product description	CONTROL	IP
EASY PB COUPLER	4008321915597	Pushbutton coupler	EASY	IP20
Product reference	$\frac{l}{[mm]}$	$\frac{b}{[mm]}$	$\frac{h}{[mm]}$	
EASY PB COUPLER	47	44	13	25

Product characteristics

- Pushbutton coupler for connection to EASY controllers
- 8 inputs for floating make contacts
- Group and scene control, central switching and dimming, starting and stopping of sequences
- Floating make contacts of motion sensors can be connected
- Up to 2 EASY pushbutton couplers can be connected to the complete system

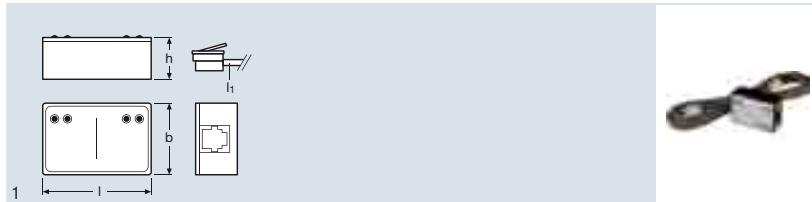

Applications

- Installation in flush-type boxes

Technical equipment

- Connection via Y-connector (included)

EASY SYS CP

Product reference	Product number	Product description	CONTROL	IP
EASY SYS CP	4008321320902	System coupler	EASY	IP20
Product reference	$\frac{l}{[mm]}$	$\frac{b}{[mm]}$	$\frac{h}{[mm]}$	
EASY SYS CP	45	30	18	25

Product characteristics

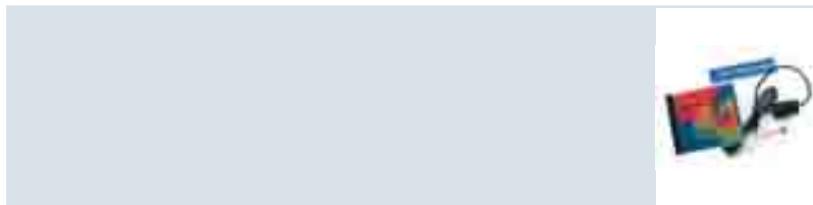

- Coupler element for connecting up to 4 EASY systems

Product benefits

- Enables the EASY cable length to be extended

EASY PC KIT

Product reference	Product number	Product description	
EASY PC KIT	4008321915559	PC software with USB adapter	EASY I USB
Product reference			
EASY PC KIT	56	31	24

Product characteristics

- Preview function for all static and dynamic settings
- System requirements: Windows PC (Pentium II, 256 MB RAM), USB port

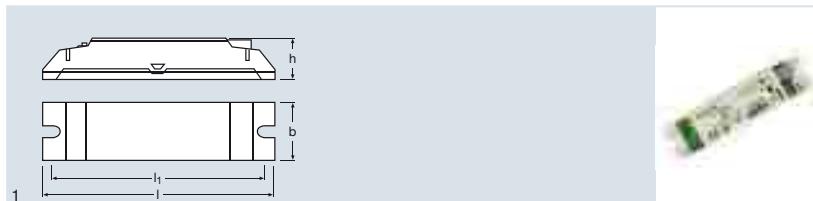

Product benefits

- Simple creation of scenes and sequences
- Loading, storage and duplication of system settings
- Software in 5 languages (D, E, FR, IT, SP)

Technical equipment

- With USB adapter cable and detailed user manual

EASY RC

Product reference	Product number	Product description			
EASY RC	4008321421753	Receiver	EASY	Max. 30	Luminaire installation / Ceiling installation
Product reference					
EASY RC	IP20	118	30	21	18

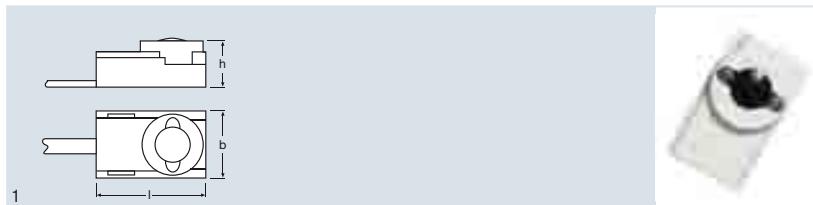

Product characteristics

- 868.3 MHz radio receiver
- Connection via 4-pole screw terminal or modular 4p4c connector

Technical equipment

- Suitable for up to 8 x EASY Hybrid Remote or 8 x EASY Color Drive

EASY IR

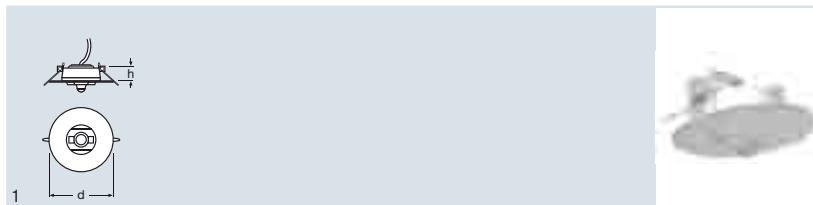

Product reference	Product number	Product description	CONTROL	Luminaire installation	IP

Product characteristics

- Infrared receiver for ceiling or wall mounting for connection to the EASY controllers
- Connection via modular 4p4c connector
- Connecting cable length: 2.1 m (permanently connected)

DALI

Packed with functions but easy to use. The DALI interface standard

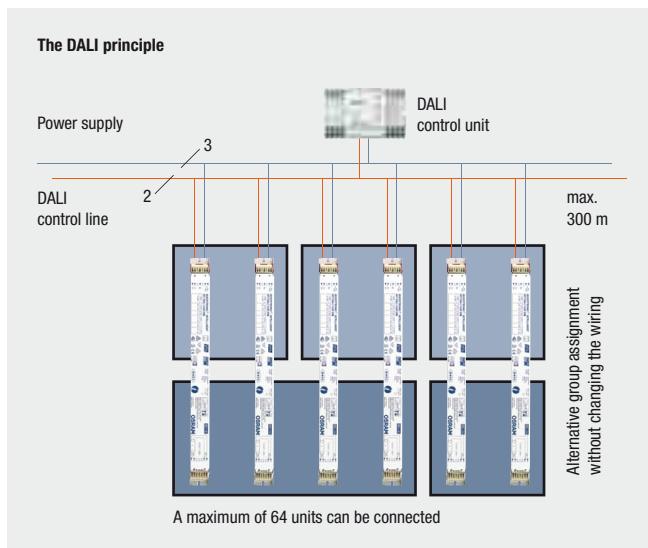

If the lighting control system, sensors, controllers, electronic control gear and light sources are to work together at peak performance they must be able to communicate with one another without restriction and react accordingly. A common interface for all the components within a system is therefore of enormous importance.

What is DALI – and how does it work?

DALI – Digital Addressable Lighting Interface – is a non-proprietary interface standard for digital dimmable electronic control gear, offering greater functionality and greater ease of use. A maximum of 64 DALI ECGs can be controlled with a high degree of flexibility via a 2-wire control line individually or jointly and in up to 16 groups. The lighting is switched and dimmed via the control line. In other words, there is no need for any relays.

Important information such the lamp status is stored in the control gear and is available to the controller. DALI is an interface for all professional lighting solutions. OSRAM offers a wide range of DALI ECGs for fluorescent lamps, compact fluorescent lamps, tungsten-halogen lamps, metal halide lamps and LEDs.

DALI

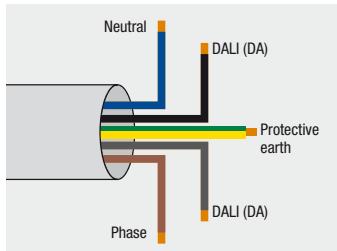

Simplified lighting planning with DALI at a glance

• Simple planning

A single 2-wire control line for up to 64 devices means that the lighting groups do not have to be assigned at the planning stage. Instead, they can be simply set up later with the aid of a controller. Planning of the control line can be completely separate from planning of the power supply.

• Simple installation

The control line is protected against polarity reversal and can be routed together with the power supply for example in a 5-core sheathed cable. The control line simply has to be rated for line voltage (basic insulation). There is no need for special cable.

• Requirements to be met by the transmission line

When choosing a cable, make sure that the voltage drop on the line does not exceed 2 V at 250 mA. As with 1-10 V systems, the power supply and the control line can be run in the same cable. This means for example that a 5-core NYM cable can be used without any problems at all to connect the DALI ECGs. The maximum permitted length of cable between the controller and the connected ECGs is 300 m.

Cross-section of the power cable:

$$A = L \times I \times 0.018$$

A = Cable cross-section in mm², L = Cable length in meters,

I = Maximum supply current in A,

0.018 = Specific resistance of copper

The following is used as a basis for finding the cable cross-section (transmission and supply cable):

Cable length:	Up to 100 m	100 to 150 m	150 to 300 m
Cable cross-section:	0.5 mm ²	0.75 mm ²	1.5 mm ²

Note:

In view of the different technical characteristics of the DALI interface in controllers available on the market, and the different local conditions of the installation we recommend restricting the cable length used in the entire system to a maximum of 300 m.

• Fewer components

No relays are needed for switching the fixtures. Switching and dimming are handled exclusively via the control line.

• Flexible for a later change of use

With DALI, the lighting groups are not hard-wired. The individual fixtures are grouped by simply assigning them to groups with the aid of a controller. These groupings can be changed at any time.

• Synchronized changes from one lighting scene to another

Even if different luminaires are started at different dimmer values or different types of lamp are combined with one another, DALI changes from one lighting scene to another in synchronism. All the light sources reach the new light value at the same time.

• Lamp status on request

As a means of detecting failed lamps, the lamp status can be reported by a DALI device to the controller and then displayed by the controller. This feature is of particular benefit for major projects in which DALI can be very easily integrated into existing bus systems via gateways.

MCU: simple manual dimming solutions

The DALI MCU digital rotary dimmer distinguishes between three different rotary speeds and has tactile detents so brightness can be fine-tuned in individual steps as required. Installed in a flush-mounted box and connected to the ac power supply, a DALI MCU can control 25 luminaires in this way with the integrated DALI supply. Parallel connection enables the number of fixtures per group to be increased to 100 and up to four control points can be provided.

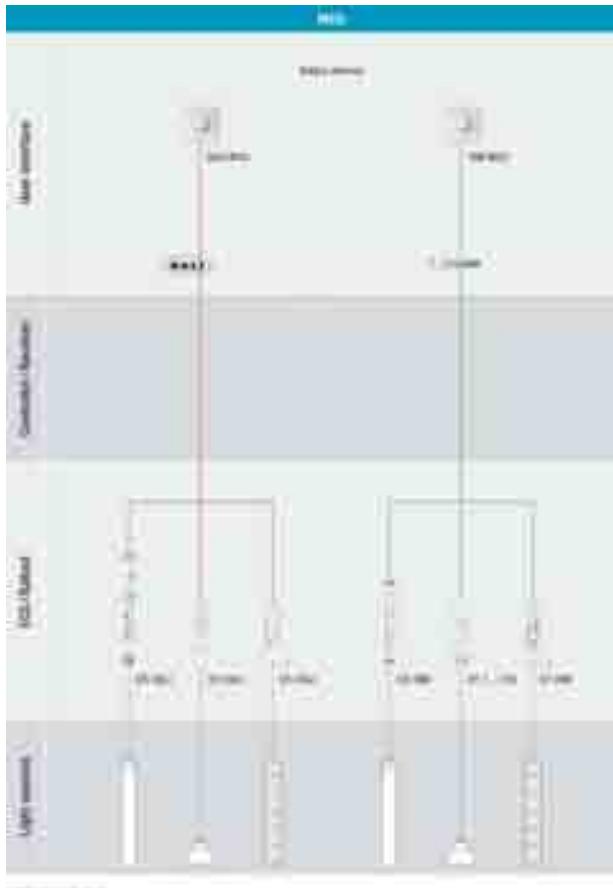

DALI MCUs connected to one another synchronize automatically; in other words, the control point can be changed at any time without the risk of annoying side effects such as sudden changes in brightness.

Thanks to its integrated relay contact the analog DIM MCU rotary dimmer enables up to ten single-lamp 1...10 V ECGs or five 2-lamp 1...10 V ECGs to be controlled directly from one control point. If an external power relay is used up to one hundred 1...10 V ECGs can be controlled.

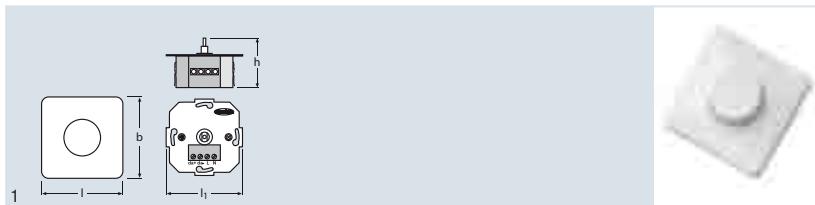

The neutral white cover can be removed from the DALI MCU and from the DIM MCU and replaced with commercially available covers.

Applications

- Single luminaires
- Offices
- Classrooms
- Conference rooms
- Partitionable rooms

DALI MCU

Product reference	Product number	Product description	V	Hz	CONTROL	T _a
DALI MCU	4008321189721	Digital rotary dimmer	230	50-60	DALI	0...+50
Product reference			IP	protection class	COLOR	I [mm]
DALI MCU	Integration in flush-type box	IP20	II	white	80	b [mm]
					50	h [mm]
					15	

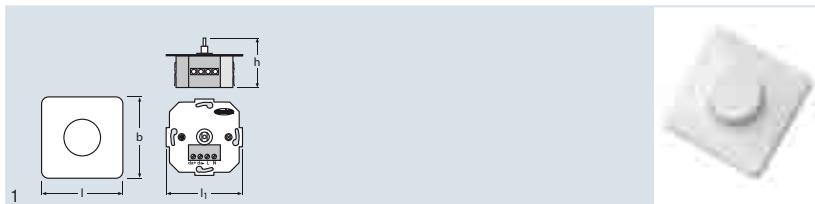

Product characteristics

- Up to 4 DALI MCUs can be connected in parallel to set up multiple control points
- Automatic synchronization between the control points
- Power consumption: max. 2 W
- Length of the DALI control cable: 300 m

Technical equipment

- Supplied with cover and rotary switch in neutral white
- Suitable for up to 25 ECGs
- Flexible expansion via DALI repeaters or further DALI MCUs

DIM MCU

Product reference	Product number	Product description	V	CONTROL	T _a	
DIM MCU P	4050300347424	Analog rotary dimmer	230	1...10 V	0...+50	Integration in flush-type box

DIM MCU P	IP20	II	white	80	80	40
						100

Product characteristics

- Switching contact load: 250 V/6 A (10 x 1-lamp or 5 x 2-lamp dimmable ECGs)

Technical equipment

- Supplied with cover and rotary switch in white
- Control signal suitable for up to 100 ECGs
- Flexible expansion via external load power relay and signal amplifier DIM SA

DALI BASIC: multifunctional lighting control for single rooms

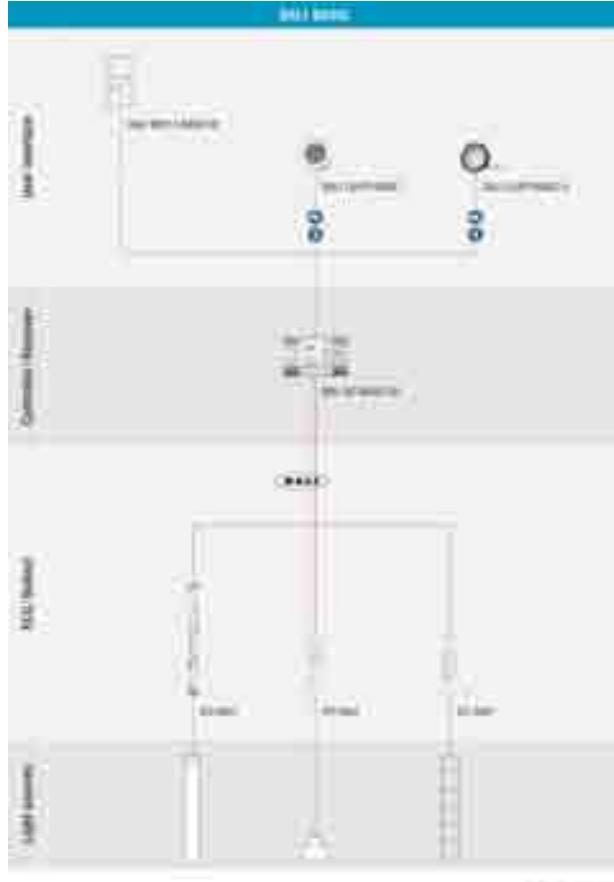

DALI BASIC light management system enables scene-based illumination and energy-saving by daylight harvesting and occupancy management. The DALI RC BASIC SO can control up to 64 DALI ECGs and up to 6 sensors. With DALI to 1...10 V converters it is also possible to integrate 1...10 V ECGs. 4 independent groups can generate up to 4 light scenes which can be stored and recalled. DALI group assignment is variable and can be modified at any time without change of the wiring. Daylight capture with lightsensors regulates the luminaires to an adequate lightlevel. Presence sensors switch off the lights if no one is in the room.

5 standard push buttons are used for configuration and control. With parallel wiring multiple control points can be installed.

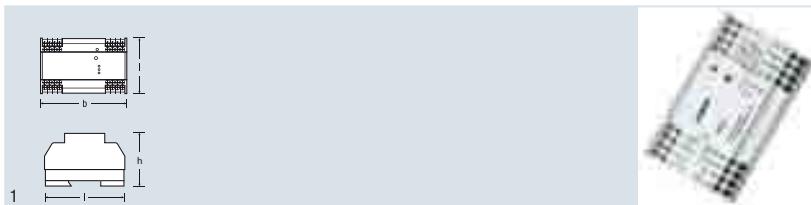

Applications

- Offices
- Conference rooms
- Classrooms
- Sports halls
- Event rooms

System overview

DALI RC BASIC SO

Product reference	Product number	Product description	V	Hz	CONTROL	T _a
DALI RC BASIC SO	4050300654973	Controller	230	50-60	DALI	0...+45

Product characteristics

- Light and presence sensor for luminaire installation and ceiling mounting
- Can also be used purely as light sensor or purely as presence sensor
- Color: Neutral white

Technical equipment

- Installation in T8 louvers with supplied mounting clip for attaching to fluorescent lamps

DALI PROFESSIONAL: flexible light management system for large rooms and multiroom solutions

The DALI PROFESSIONAL system with its 4 interactive DALI lines (256 DALI ECGs) is suitable for complex applications in room and floor control, daylight-dependent regulation, RGB control and dynamic lighting.

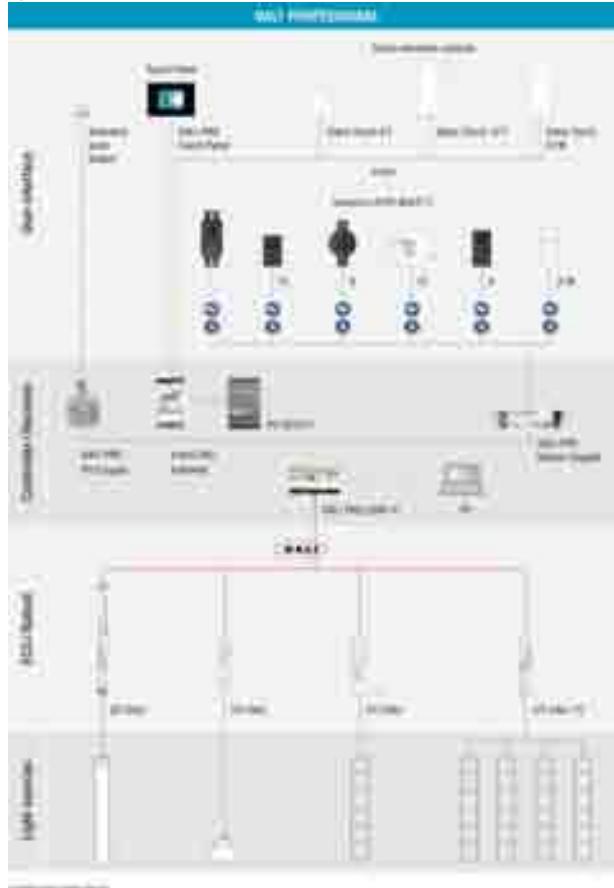

Configuration and setup are easy to achieve with Windows based PC software and USB port. Plug&Play settings are preconfigurated for instant use without any setup.

Standard push buttons are used to connect via the DALI PRO Pushbutton Coupler to the system. Furthermore DALI PRO Sensorcoupler integrates all light- and occupancy sensors from LS/PD MULTI 3 family. In total a maximum of 50 couplers can be attached. Capacitive glass touch panels and a touch screen are available as attractive and functional input devices.

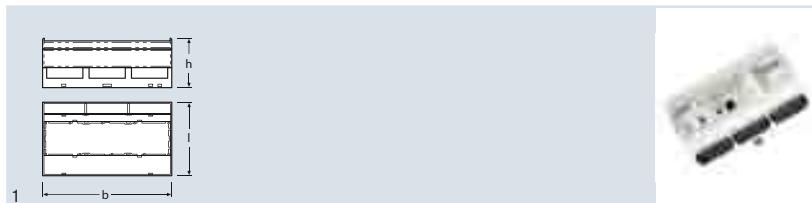

Applications

- Offices
- Restaurants
- Retail outlets
- Storage areas
- Production and assembly facilities

DALI PRO Cont-4	4008321478948	Controller	50-60	DALI	4	0...+40
DALI PRO Cont-4 RTC	4008321710871	Controller	50-60	DALI	4	0...+40
NEW!						
Product reference	IP	protection class	I [mm]	b [mm]	h [mm]	T _a
DALI PRO Cont-4	Snap-in	IP20	I	90	160	62
DALI PRO Cont-4 RTC	Snap-in	IP20	I	90	160	62
						10

Product characteristics

- Controller for 4 DALI lines
- Up to 50 pushbutton/sensor couplers can be integrated
- Integrated DALI supply
- Load contact: 4 x 5 A
- Daylight-dependent and/or presence-dependent or manual control
- Up to 4 x 16 groups can be controlled
- USB PC connection
- RTC version: Integrated real-time clock for configuring any daily schedules

Product benefits

- Plug&Play preconfigured for instant use without any startup procedure
- 4 freely programmable switchover relays

Applications

- Room control, floor control, daylight-dependent control

Technical equipment

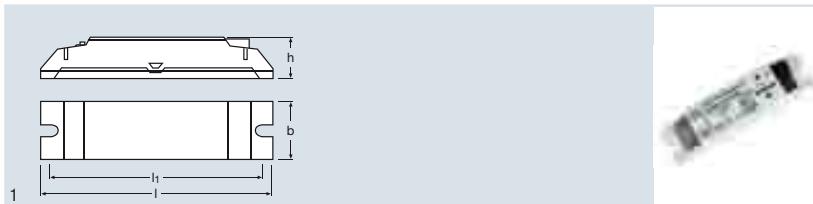

- Suitable for up to 256 ECGs with DALI interfaces
- Graphic configuration software with Windows interface

DALI PRO Sensor Coupler

Product reference	Product number	Product description	CONTROL	No. of outputs	T _a
DALI PRO Sensor Coupler	4008321379269	Sensor coupler	DALI	1	0...+50
Product reference					
DALI PRO Sensor Coupler	Luminaires installation Ceiling installation	IP20	II	118	30
				b [mm]	h [mm]
				21	25

Product benefits

- Power supply via DALI
- Sensor integration in DALI

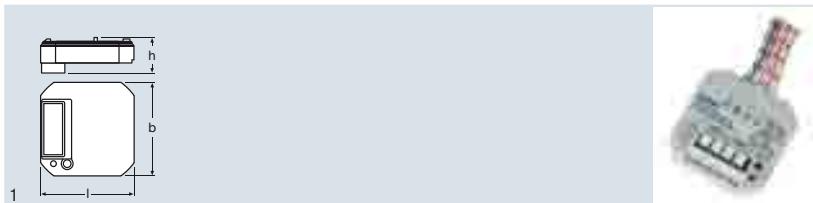

Applications

- Connection of light and presence sensors in DALI systems

Technical equipment

- Suitable for all light and presence sensors from the MULTI 3 range

DALI PRO PB Coupler

Product reference	Product number	Product description	CONTROL	T _a	Integration in flush-type box
DALI PRO PB Coupler	4008321496461	Pushbutton coupler	DALI	0...+50	
Product reference					
DALI PRO PB Coupler	IP20	IP	II	42	42
				b [mm]	h [mm]
				20	20

Product characteristics

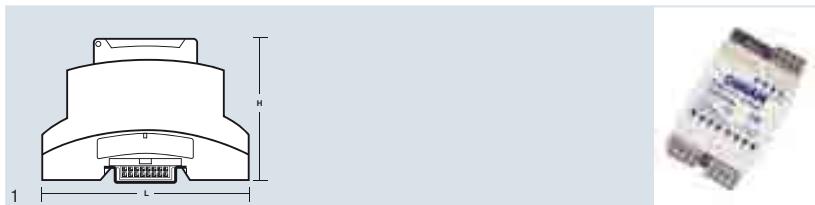

- 4 floating inputs
- For integrating pushbuttons/switches
- For switching, dimming, scene recall

Product benefits

- Power supply via DALI
- Standard pushbuttons/switches can be used

E-BUS DALI Gateway

Product reference	Product number	Product description	V	T _a	Snap-in
e:bus DALI Gateway	4008321957085	DALI gateway	24	0...+50	
Product reference	IP	protection class	I [mm]	b [mm]	h [mm]
e:bus DALI Gateway	IP20	II	90	54	60
					8

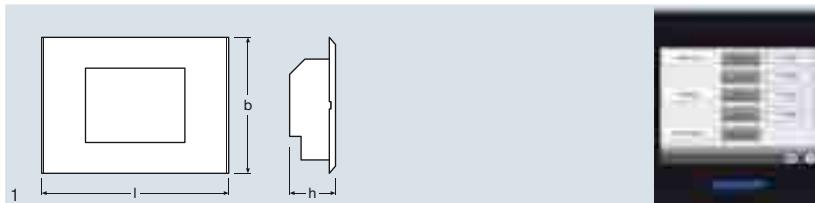

Product characteristics

- Interface between DALI PRO CONT-4 and Touch Panel or Glass Touches
- Control elements supplied via the communication bus

Technical equipment

- 24 V supply needed (e.g. PS 30/24 V)

DALI PRO Touch Panel

Product reference	Product number	Product description	T _a	IP
DALI PRO Touch Panel	4008321957009	Touchpanel	0...+40	IP20
Product reference	protection class	l [mm]	b [mm]	h [mm]
DALI PRO Touch Panel	III	220	160	54
				1

Product characteristics

- High-resolution 5.7" LCD touch screen
- Supply via the e:bus DALI gateway
- Dimming and switching of all connected luminaires
- Timed programming of on/off switching of groups
- Individual objects such as backgrounds, logos, keys or floor plans can be inserted
- Simple and flexible configuration via Windows software (Windows XP and higher)

Technical equipment

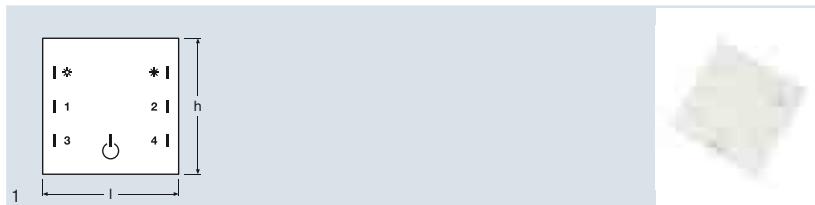

- Flush-type boxes available for installation in cavity or solid walls

Glass Touch 6 TW	white	III	80	11	160
					4

Product characteristics

- 6 pushbutton functions + Touch Wheel
- Glass touch screen
- Supply via the e:bus DALI gateway

Product benefits

- Smooth real glass surface, extremely low profile
- All luminaires in the system can be dimmed or switched

ENCELIUM – the holistic light management system for intelligent buildings

ENCELIUM is a holistic light management system that aims to improve personal lighting comfort and to achieve optimum energy savings with very short pay-back time. Combining the user-friendly 3D control software with the freely addressable switching and dimming functions, ENCELIUM is able to create the right light in the right place with optimum quality while at the same time avoiding unnecessary energy consumption.

ENCELIUM is much more than just a light management system for saving energy.

- **Three control options:** Employees can adjust the light at their workplaces to suit their particular work and their personal preferences, facility managers can control the entire lighting system, and energy supervisors have the option of controlling the lighting system as part of the facility management strategy to achieve maximum energy savings.
- **Improvements in ergonomics, productivity and satisfaction** come from improvements in the quality of light and from the ability of each and every employee to adjust their own workplace light directly from their own PCs.
- **Enhancement of the “green image” of the building and easier achievement of energy certificates (e.g. LEED):** ENCELIUM solutions help in the certification process, depending on the specific application and other factors.
- **Dynamic adjustment of light settings according to changes in building usage:** Changes in the use of a building, internal layout renovation and variations in lighting requirements can be easily managed by the ENCELIUM 3D software, without having to change any cabling or fixture.
- **Use of light management as a basis for overall energy management:** With the ability to shed lighting load dynamically, ENCELIUM can be used to share energy peaks. ENCELIUM constantly monitors the energy consumption, being able to predict and avoid sharp increases of energy demand, without affecting the lighting quality.

ENCELIUM uses sophisticated data processing programs and special algorithm functions to mix six innovative strategies for optimum energy savings:

- **Smart Time Scheduling:** In areas of a building where presence detection is not used there is the option of switching and/or dimming the lights at scheduled times.
- **Daylight Harvesting:** By using daylight sensors the artificial lighting in the building is automatically adjusted according to the amount of available daylight.
- **Task Tuning:** Maximum light level can be defined for particular workplaces or for particular tasks to avoid over lighting and therefore excessive energy consumption.
- **Occupancy Control:** By using presence sensors it is possible to automatically switch the light on and off or dim it depending on whether or not there is anyone in the room.
- **Personal Control:** Personal Control Software enables the light at every workplace to be individually adjusted directly by a PC.
- **Variable Load Shedding:** Automatic reduction of electrical demand at building level by shedding dynamically lighting load to avoid consumption peaks.

For more information on ENCELIUM go to the OSRAM LMS website.
www.osram.com/lms

IQ Light Control: light management for the home

Lighting for the home provides scope for creating a pleasant atmosphere.

With the **IQ Light Control** product family the lighting can be easily upgraded to give greater comfort, convenience and energy savings.

The **IQ Light Control** product family comprises the following:

- Switches
- Dimmers
- Plugs
- Sensors
- Remote control

With products from the **IQ Light Control** family you can create dynamic and individual lighting scenes that will give your home a completely new look.

Benefits of **IQ Light Control**:

- **Simple installation:** All the products can be installed without the need for complex cabling
- **Grouping:** Different fixtures can be controlled together or separately
- **Customizing:** Personal settings can be stored and recalled at the touch of a button
- **Expansion:** The system can be expanded at any time to almost any size by adding further components
- **Flexibility:** Lamps, luminaires and components can be placed anywhere – and be remote controlled
- **Compatibility:** Can be combined with many other products that use "ZigBee LightLink" technology

Configuration is intuitive, and the products are easy to operate – making them ideal for residential applications where users can control the lighting to suit their own personal tastes.

The **ZigBee Allianz** comprises around 400 companies working together on open standards for communication in wireless networks for various areas of application.

ZigBee LightLink focuses on light and lighting and their simple and convenient usage:

- **Simple:** Setup, configuration and control are handled by remote control in just a few steps – with no need for PC software or expert know-how
- **Wide:** All the devices communicate with each other in a single network for optimum links throughout the home. The range is increased with every plug or switch.
- **Secure:** Communication between the products is encoded so only the lighting connected to the particular network is controlled
- **Economical:** Low consumption means long battery life, for example for remote controls

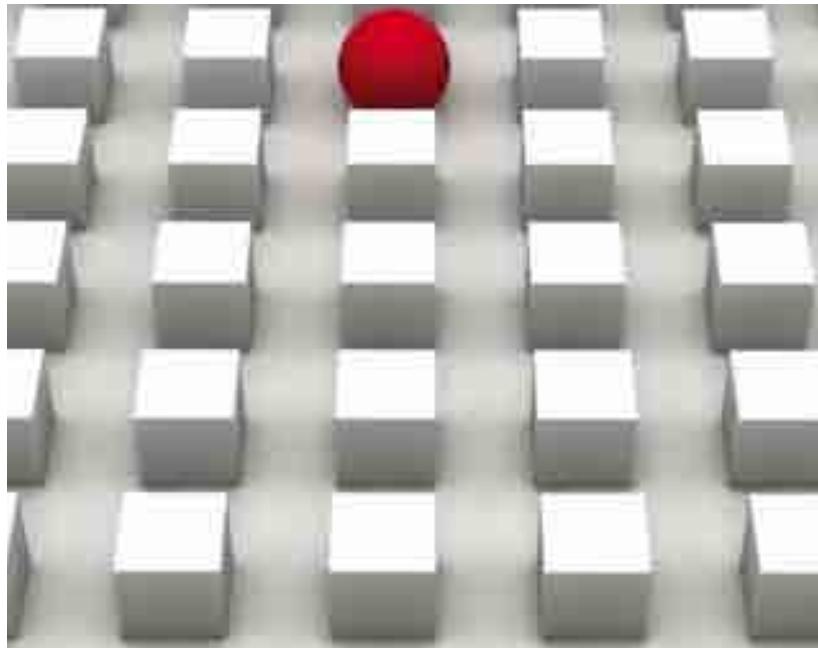

For more information on the IQ Light Control product family go to
<http://www.osram.com/lms>

LMS components: non-system-specific components from OSRAM

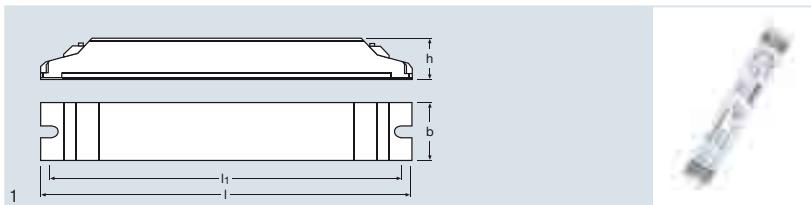

Expand, connect and install light management systems – all from a single source with non-system-specific components from OSRAM.

These accessories, perfectly matched to OSRAM products in terms of quality and compatibility, make installing, connecting and expanding innovative light management systems extremely simple. OSRAM rounds off its offering with non-system-specific components:

- Signal repeaters
- Signal converters
- Signal amplifiers
- Radio-controlled components
- Connectors
- Installation kits

DALI REP LI

Product reference	Product number	Product description	V	Hz	CONTROL	T _a
DALI REP LI	4008321292599	Signal amplifier	100-240	50-60	DALI	0...+50
Product reference			IP	protection class	I [mm]	b [mm]
DALI REP LI	Luminaire installation		IP20	I	189	30
					h [mm]	21
						25

Product characteristics

- Expansion of DALI systems by 64 ECGs per repeater
- Extension of the DALI line by 300 m
- Touch DIM® control of 64 DALI ECGs
- ECGs connected to the repeater operate as a group
- Maximum input power: 4 W

Product benefits

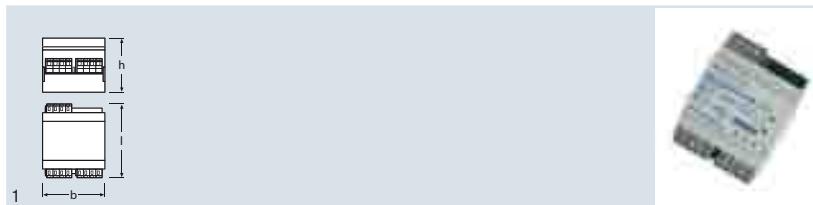

- The repeaters can be addressed via DALI
- The repeaters are cascadable

Technical equipment

- Separate installation possible with LMS CI BOX

DALI REP SO

Product reference	Product number	Product description	V	Hz	CONTROL	T _a
DALI REP SO	4008321301093	Signal amplifier	100-240	50-60	DALI	0...+50
Product reference						
DALI REP SO	Snap-in	IP20	I	96	72	62
						16

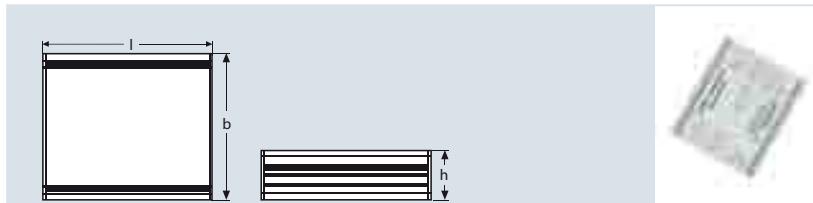

Product characteristics

- Expansion of DALI systems by 64 ECGs per repeater
- Extension of the DALI line by 300 m
- Touch DIM® control of 64 DALI ECGs
- The ECGs connected to the repeater operate as a group
- Standby consumption: max. 1 W

Product benefits

- Disconnection of ECG standby power via integrated load contact
- The repeaters can be addressed via DALI
- The repeaters are cascadable

DMX ISOLATED REP

Product reference	Product number	Product description	V	Hz	CONTROL	T _a
DMX ISOL REP	4008321621832	Isolated DMX signal repeater	48	0	DMX	0...+50
Product reference						
DMX ISOL REP	Luminaire installation	IP20	III	80	72	24
						10

Product characteristics

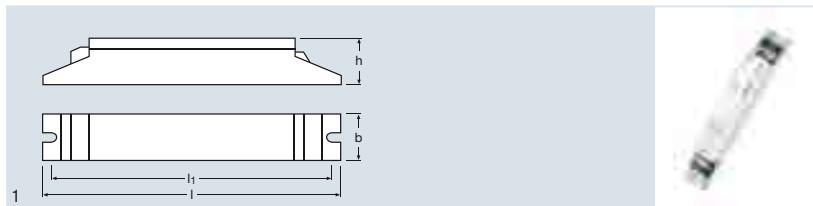

- Increase in the number of DMX devices by 32
- Extension of the signal cable length by 300 m
- Processing of the DMX and RDM signal
- Supply voltage: 9...48 V DC

Product benefits

- Integrated isolated barrier and galvanic separation between in- and output

DIM SA

Product reference	Product number	Product description	V	Hz	CONTROL	T _a
DIM SA	4008321097095	Signal amplifier	220-240	50-60	1...10 V	0...+50

Product reference	IP	protection class	l [mm]	b [mm]	h [mm]	T _a
DIM SA	Luminaire installation	IP20	I	189	30	30

Product characteristics

- Signal amplifier for 1...10 V controllers and sensors
- Load capacity of the output signal: max. 100 mA

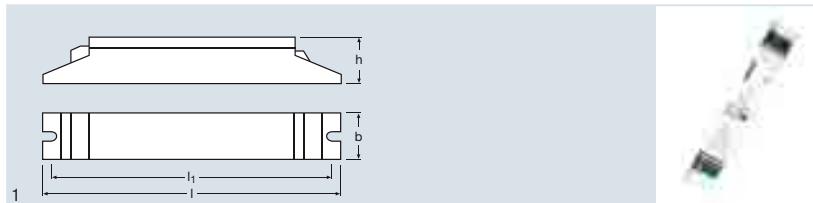

Product benefits

- Supports large luminaire groups and long control lines
- Signal amplifiers are cascadable

Technical equipment

- Suitable for up to 100 ECGs
- Suitable for up to 33 DIM SA signal amplifiers

DALI CON 1...10 LI

Product reference	Product number	Product description	V	Hz	CONTROL	T _a
DALI CON 1-10 LI	4050300638973	Converter from DALI to 1...10V	220-240	50-60	DALI	0...+50

Product reference	IP	protection class	l [mm]	b [mm]	h [mm]	T _a
DALI CON 1-10 LI	Luminaire installation	IP20	I	190	30	27

Product characteristics

- Load capacity of the output signal: max. 100 mA
- 0...10 V max. 5 mA active
- Load capacity of switching contact: 5 A
- Touch DIM® control of 1...10 V ECGs

Product benefits

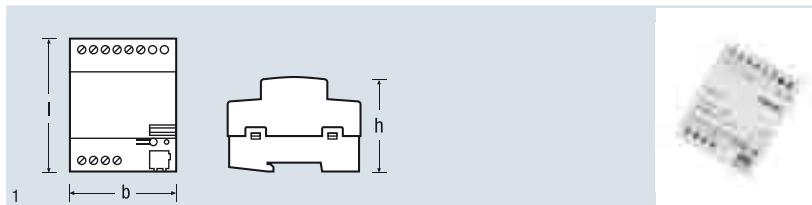

- Can be used purely as a switching actuator
- Switchable characteristic linear/logarithmic

Technical equipment

- Suitable for up to 100 ECGs
- Suitable for up to 33 DIM SA signal amplifiers

DALI CON 1...10 SO

Product reference	Product number	Product description	V	Hz	CONTROL	T _a
DALI CON 1-10 SO	4050300639802	Converter from DALI to 1...10V	220-240	50-60	DALI	0...+45
Product reference						
DALI CON 1-10 SO	Snap-in	IP20	II	90	72	64

Product characteristics

- Load capacity of the output signal: max. 100 mA
- 0...10 V max. 5 mA active
- Load capacity of switching contact: 5 A
- Touch DIM® control of 1...10 V ECGs

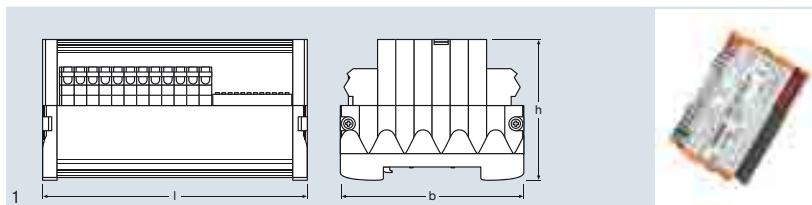

Product benefits

- Can be used purely as a switching actuator
- Switchable characteristic linear/logarithmic

Technical equipment

- Suitable for up to 100 ECGs
- Suitable for up to 33 DIM SA signal amplifiers

DMX CON DALI SO

Product reference	Product number	Product description	V	Hz	Tool
DMX CONV DALI SO	4008321532336	Converter DMX to DALI	100-240	50-60	Snap-in
Product reference					
DMX CONV DALI SO	IP20	IP20	I	107	76

Product characteristics

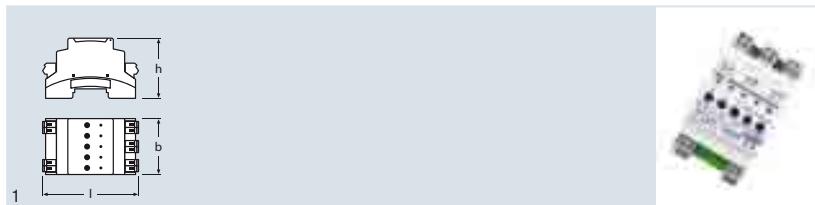

- 6 DALI broadcast outputs
- Manual and automatic DMX addressing modes
- Immediate ignition of FL lamps (only in connection with QTi DALI ECGs)
- Number of DMX channels to be converted (1-6) can be set
- Automatic amplification of the DMX output signal

Technical equipment

- Suitable for up to 96 ECGs

DALI Switch SO

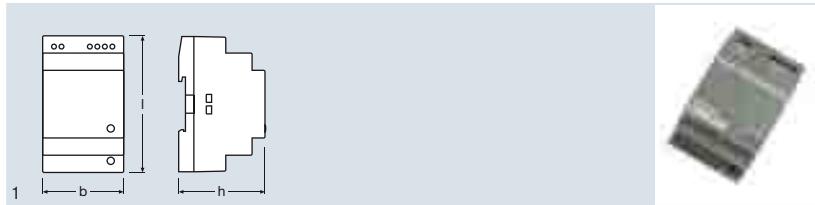

Product reference	Product number	Product description	V	Hz	T _a
DALI SWITCH SO	4008321533364	3-way switching actuator	24	0	0...+45
Product reference			I [mm]	b [mm]	h [mm]
DALI SWITCH SO	Snap-in	IP20	II	96	54

Product characteristics

- DALI-controlled switched output for incandescent lamps, QT, OT, PT, HT control gear
- 3 independent load contacts
- Switch contact load capacity 6 A ohmic load
- Supply voltage 24 V DC
- Floating contacts

Power Supply PS 30

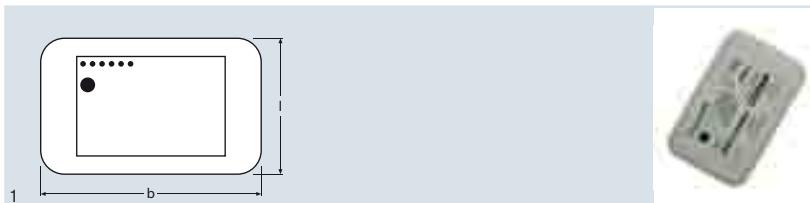

Product reference	Product number	Product description	V	Hz	T _a
PS 30	4008321555311	Power supply	100-240	50-60	-20...+55
Product reference			I [mm]	b [mm]	h [mm]
PS 30	Snap-in	IP20	90	54	58

Product characteristics

- 24 V DC output voltage
- 1.3 A output current

DALI magic

Product reference	Product number	Product description	V	Hz	CONTROL
DALI magic	4008321582768	DALI configuration tool	220-240	50-60	DALI
Product reference			I	b	h [mm]
DALI magic		IP20	79	120	28

Product characteristics

- Standard USB interface
- Testing, analysis and programming of DALI systems via Windows PC (Windows XP and higher)
- PC-independent: central switching and dimming DALI lighting systems

Features of the associated DALI wizard software (included)

- Intuitive configuration of up to 64 DALI ECGs
- Offline/online configuration of DALI installations
- "DALI Spy" functionality for recording the DALI data flow

Features of the 3DIM Tool software

- Programming of OSRAM ECGs with 3DIM functionality
- Visualization of individual AstroDIM and StepDIM operation

Applications

- Analysis and configuration tool for DALI and 3DIM applications

References

- For configuration software see www.osram.com/software

Y-CONNECTOR

Product reference	Product number	Product description	IP	protection class
Y-CONNECTOR	4050300803135	Y connector	IP20	III
Product reference	$\frac{l}{[mm]}$	$\frac{b}{[mm]}$	$\frac{h}{[mm]}$	
Y-CONNECTOR	34	18	16	25

Product characteristics

- Passive distributor
- Connections: 3 modular 4p4c sockets
- Type of mounting: Adhesive pad

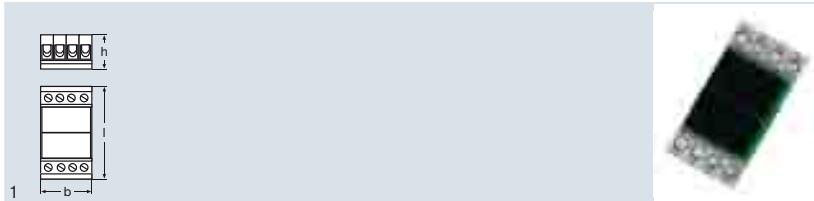

Product benefits

- Enables multiple sensors to be connected in parallel to a MULTileco/MULTI 3 system
- Enables multiple EASY system components to be synchronized and interconnected

Technical equipment

- 2 connecting cables included, modular 4p4c connector on both ends, length 2.1 m
- Suitable for all OSRAM components with modular 4p4c connector system

Y-CONNECTOR SCREW

Product reference	Product number	Product description	IP	protection class
Y-CONNECTOR SCREW	4008321916686	Y connector	IP20	III
Product reference	$\frac{l}{[mm]}$	$\frac{b}{[mm]}$	$\frac{h}{[mm]}$	
Y-CONNECTOR SCREW	40	20	16	25

Product characteristics

- Passive distributor
- Connection via 2x4-pole screw terminal or modular 2x4p4c connector
- Type of mounting: Adhesive pad

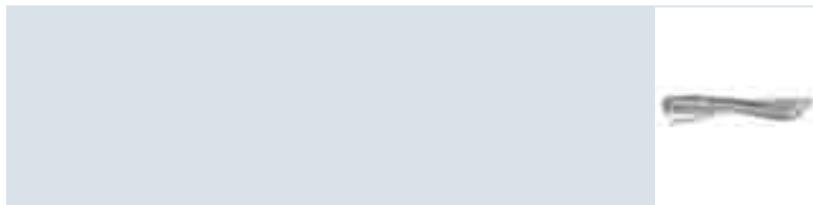

Product benefits

- Enables multiple sensors to be connected in parallel to a MULTileco/MULTI 3 system
- Enables multiple EASY system components to be synchronized and interconnected

Technical equipment

- 2 connecting cables included, modular 4p4c connector on both ends, length 2.1 m
- Suitable for all OSRAM components with modular 4p4c connector system

CONNECTION CABLES

Product reference	Product number	Product description		IP	
CABLE 25CM	4008321660145	4p4c connecting cable	4p4c	IP20	
Product reference	COLOR	$\frac{I}{[mm]}$	$\frac{b}{[mm]}$	$\frac{h}{[mm]}$	
CABLE 50CM	grey	250	5	2	50
CABLE 100CM	grey	500	5	2	50
CABLE 200CM	grey	1000	5	2	50
		2000	5	2	50

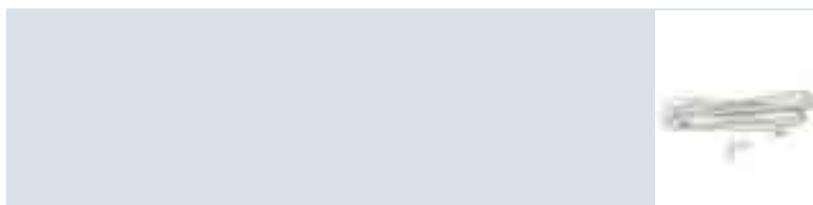

Product characteristics

- Cable for modular 4p4c connection, pack of 50

Applications

- Suitable for all OSRAM components with modular 4p4c connector system

HIGH TEMPERATURE CONNECTION CABLES

Product reference	Product number	Product description		IP	
HIGH TEMP CABLE 200CM + SENSORCLIP	4008321660992	4p4c connecting cable	4p4c	IP20	
Product reference	COLOR	$\frac{I}{[mm]}$	$\frac{b}{[mm]}$	$\frac{h}{[mm]}$	
HIGH TEMP CABLE 200CM + SENSORCLIP	white	2000	5	2	25

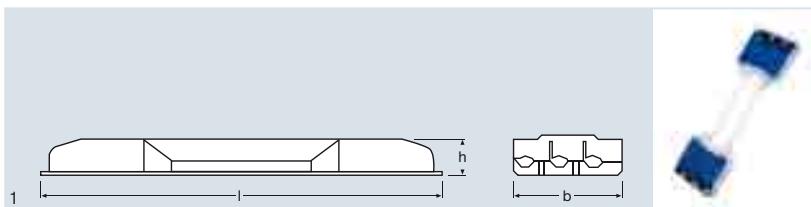

Product characteristics

- High temperature cable (up to 125 °C)
- Cable for modular 4p4c connection, pack of 25

Applications

- Mounts onto T5 or T8 luminaire grid for LS/PD MULTI 3 A and LS/PD MULTI 3 A-w

LMS CI BOX

Product reference	Product number	Product description	
LMS CI BOX	4008321083692	Installation kit	Ceiling installation
Product reference	t [mm]	b [mm]	h [mm]
LMS CI BOX	261	71	27
			40

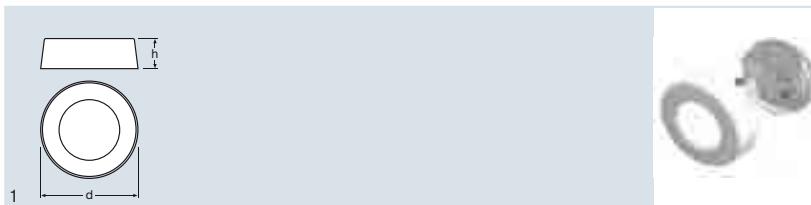

Product characteristics

- Casing with cable clamp for independent mounting

Applications

- Suitable for all OSRAM controllers with dimensions of 189 mm x 30 mm x 21 mm

SENSOR KIT

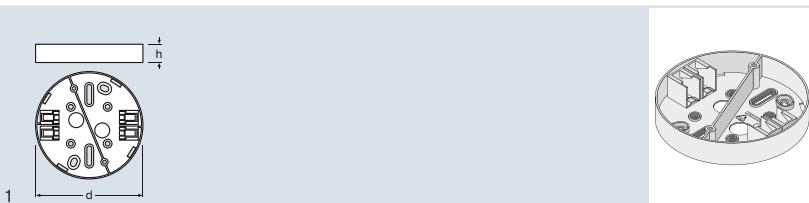

Product reference	Product number	Product description	
SENSOR KIT	4008321916662	Installation kit	Ceiling mounting
Product reference	COLOR	d [mm]	h [mm]
SENSOR KIT	white	80	25
			10

Applications

- Adapter for surface mounting of sensor elements with a diameter of 50 mm

Mounting Adapter

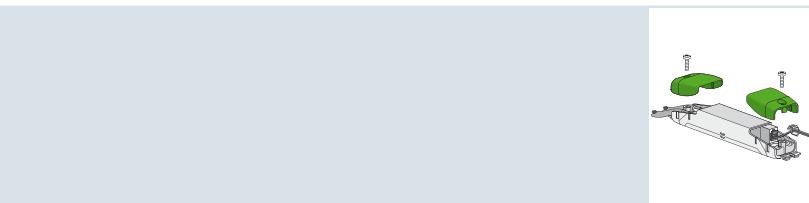

Product reference	Product number	Product description	d [mm]	h [mm]	
MOUNTING ADAPTER	4008321480798	Mounting adapter	116	19	20

Applications

- Adapter for surface mounting of sensor elements with a diameter of 116 mm

ECO CI KIT

Product reference	Product number	Product description		
ECO CI KIT	4008321392091	Installation kit	Ceiling installation	100

Product characteristics

- Cable clamp for separate installation

Applications

- Suitable for all OSRAM controllers with dimensions of 118 mm x 30 mm x 21 mm

OSRAM lamps with the Energy Label

Energy labeling of lamps for household applications.

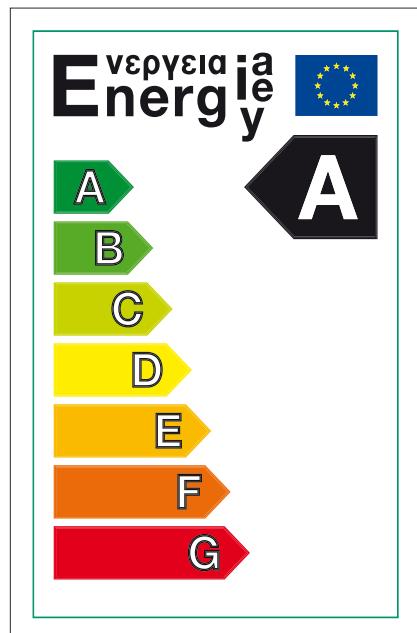

In line with Directive 98/11/EC* and the Energy Consumption Labeling Ordinance**, lamps for household applications must have an energy label.

The Energy Label

This label shows which of the seven classes of energy efficiency the household lamp has been assigned to. A stands for "very efficient" and G for "least efficient".

Here are some sample classifications:

- LED lamps
Always in Class A
- Compact fluorescent and fluorescent lamps:
Classes A and B
- Halogen lamps:
Mostly classes C and D
- Incandescent lamps:
Class E

As specified in the above-mentioned directive, lamps are assigned to the energy efficiency classes according to their measured luminous flux and power draw. The methods used for measuring these values are defined in DIN EN 50285 "Energy efficiency of electric lamps for household use, measuring methods". This standard includes references to the relevant lamp standards. In Germany, the Federal States are responsible for checking for compliance with this Directive. The energy efficiency classes are currently being redefined and are likely to come into force in 2013. The energy efficiency classes will then range from A++ to E.

* Directive 98/11/EC of the Commission dated 27.01.1998 for implementing Directive 92/75/EEC of the Council regarding the energy labeling of household lamps

** First ordinance dated 26.11.1999 for amending the Energy Consumption Labeling Ordinance of 30.10.1997

Energy labeling

LED lamps	11.02
Halogen lamps	11.03
Compact fluorescent lamps	11.05
Fluorescent lamps	11.12
General lighting service lamps	11.20

Lamps affected	Wattage range
You will find the Energy Label on the following lamps:	
General lighting service lamps (incandescent lamps)	≤ 200 W
Other incandescent lamps without reflectors (candle, round, etc.)	≤ 100 W
Compact fluorescent lamps of all types*	All
Energy-saving lamps, i.e. compact fluorescent lamps with integrated control gear (electronic or magnetic)	All
Tubular fluorescent lamps with Ø 16, 26 and 38 mm (T5, T8, T12)	≤ 58 W or ≤ 6500 lm
Circular or rectangular fluorescent lamps	All
Single-ended halogen lamps for line voltage	All
Double-ended halogen floodlight lamps	> 4 W or < 6500 lm
Lamps not affected	Wattage range
The following lamps are exempt from the energy labeling requirements:	
All lamps with very high luminous flux	> 6500 lm
Low-voltage lamps	All
Reflector lamps of all kinds	All
Lamps that are not used for generating light in the wavelength range from 380 nm to 780 nm (IR, UV, colored, black-light and similar lamps)	All
Lamps for special applications	All
High-intensity discharge lamps and low-pressure sodium lamps	All

* Lamps with 2G10 and 2G11 bases and U-shaped fluorescent lamps are used primarily in commercial applications.
To ensure uniform handling, these lamps should also have an energy label.

Information on the fixture packaging

In cases in which lamps are included with the fixture, either with or without its own packaging, there is no requirement for the fixture to be labeled.

Glossary of the most important lighting terms

As with any technical or scientific discipline, lighting technology has its own special terms and concepts for defining the characteristics of lamps and fixtures and for standardizing the units of measurement.

The most important terms are described here.

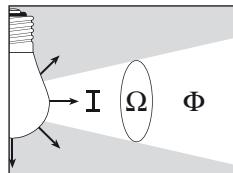

Luminous flux Φ

Unit of measurement: lumen [lm]

Luminous flux Φ is all the radiated power emitted by a light source evaluated with the spectral sensitivity of the eye and the photometric radiation equivalent k_m .

Light and radiation

Light is taken to mean the electromagnetic radiation that the human eye perceives as brightness, in other words that part of the spectrum that can be seen. This is the radiation between 380 and 780 nm, a tiny fraction of the known spectrum of electromagnetic radiation.

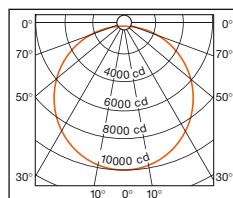

Luminous I intensity is a measure of the luminous flux Φ emitted in solid angle Ω .

Luminous intensity I

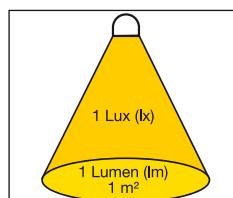

Unit of measurement: candela [cd]

Generally speaking, a light source emits its luminous flux Φ in different directions and at different intensities.

Luminous intensity is the luminous flux radiated in a particular direction (solid angle Ω).

Polar diagram

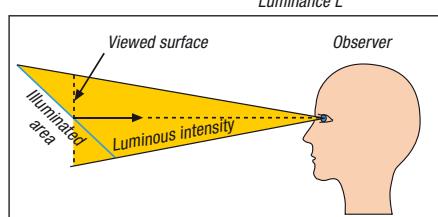

Illuminance E

Luminance L

Unit of measurement: candela per square meter [cd/m²]

The luminance L of a light source or an illuminated area is a measure of the impression of brightness.

Luminance L

The most important photometric formulae:

$$\text{Luminous intensity } I \quad [\text{cd}]$$

$$\text{Illuminance } E \quad [\text{lx}]$$

$$\text{Luminous flux } \Phi \quad [\text{lm}]$$

$$\text{Solid angle } \Omega \quad [\text{sr}]$$

$$\frac{\text{Luminous flux falling on area } \Phi}{\text{Illuminated area } A} \quad [\text{lm/m}^2]$$

$$\text{Luminance } L \quad [\text{cd/m}^2]$$

$$\text{Luminous efficacy } \eta \quad [\text{lm/W}]$$

$$\text{Luminous intensity } I \quad [\text{cd}]$$

$$\frac{\text{Viewed luminous area } A}{\text{Viewed surface area } \Omega} \quad [\text{m}^2]$$

$$\frac{\text{Generated luminous flux } \Phi}{\text{Electrical power consumed } P} \quad [\text{lm/W}]$$

Luminous efficacy η

Unit of measurement: lumen per watt [lm/W]

Luminous efficacy η indicates the efficiency with which the electrical power consumed is converted into light.

Color temperature

Unit of measurement: Kelvin [K]

The color temperature of a light source is defined in comparison with a "black body radiator" and plotted on what is known as the "Planckian curve". The higher the temperature of this "black body radiator" the greater the blue component in the spectrum and the smaller the red component. An incandescent lamp with a warm white light, for example, has a color temperature of 2700 K, whereas a daylight fluorescent lamp has a color temperature of 6000 K.

Light color

The light color of a lamp can be neatly defined in terms of color temperature. There are three main categories here:

Warm White <3300 K

Cool White 3300 – 5300 K

Daylight > 5300 K

Despite having the same light color, lamps may have very different color rendering properties owing to the spectral composition of their light.

Color rendering

As a rule, artificial light should enable the human eye to perceive colors correctly, as it would in natural daylight. Obviously, this depends to some extent on the location and purpose for which light is required.

The criterion here is the color rendering property of a light source. This is expressed as a "general color rendering index" (R_a).

The color rendering index is a measure of the correspondence between the color of an object (its "self-luminous color") and its appearance under a reference light source. To determine the R_a values, eight test colours defined in accordance with DIN 6169 are illuminated with the reference light source and the light source under test. The smaller the discrepancy, the better the color rendering property of the lamp being tested.

A light source with an R_a value of 100 displays all colors exactly as they appear under the reference light source. The lower the R_a value, the worse the colors are rendered.

Luminaire efficiency

Luminaire efficiency (also known as light output ratio) is an important criterion in gauging the energy efficiency of a luminaire. This is the ratio between the luminous flux emitted by the luminaire and the luminous flux of the lamp (or lamps) installed in the luminaire.

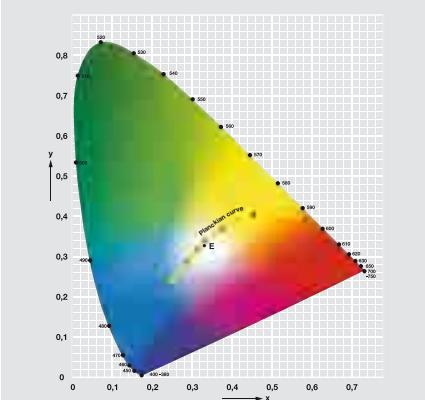

Average life

The average life of a lamp is an average of the lives of individual lamps operated under standard conditions (50% failure = average rated life).

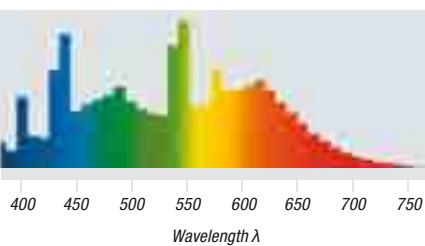

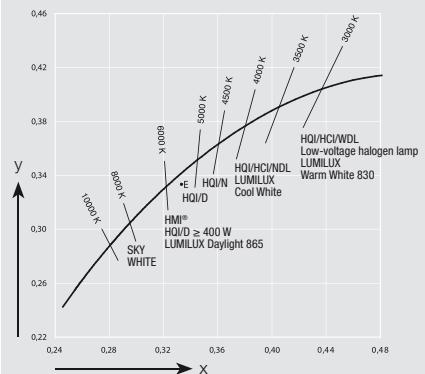

Service life

Service life is a simple practical measure of the economical life of a lamp. It is the number of hours of operation after which the system luminous flux (i.e. the product of the relative luminous flux and the relative proportion of lamps still in operation) is around 80% of the initial value.

Chromaticity diagram to DIN 5033

Extract from the chromaticity diagram showing the Planckian curve

Spectrum of a BIOLUX® fluorescent lamp.

The radiation is very evenly distributed over the entire visible range.

Disposing of your lamps and luminaires

EU directive 2002/96/EC WEEE relates, among other things, to luminaires (with the exception of luminaires in households), fluorescent lamps, compact fluorescent lamps, discharge lamps including high-pressure sodium lamps, metal halide lamps and low-pressure sodium lamps¹⁾. Since the start of 2010 LED lamps that can be operated in standardized holders are also affected by the directive, e.g. LED retrofit lamps or LED tubes. Starters, control gear and light emitting diodes are classed as luminaire components and as such are part of the luminaire disposal process.

All OSRAM products that need to be disposed of under the WEEE directive are labeled with the symbol shown here.

Incandescent lamps and tungsten-halogen lamps do not contain any substances that are harmful to the environment and can be thrown away with household waste.

All manufacturers must register with their relevant national authority. Products from non-registered manufacturers may no longer be marketed.

In Germany, OSRAM is registered as a manufacturer in the "Elektro-Altgeräte-Register" [Old Electrical Equipment Register] (EAR) as number **DE 71568000**.

In addition, there are individual regulations governing the disposal of lamps and luminaires in the other member states of the EU and also in Norway and Switzerland. For more information please contact the local OSRAM company.

The primary objectives of the WEEE Directive are to reduce the load on the environment, safeguard valuable resources and protect the environment and public health.

All consumers (commercial and domestic) are obliged to return old lamps for separate disposal. Collection points have been set up for this. Consumers in Germany do not have to sort the old lamps by manufacturer or by product age. Lamps from private households and businesses (in volumes of normal household proportions) can be disposed of at local recycling centers. Large quantities of lamps can be disposed of via the Lightcycle scheme.

On behalf of lamp manufacturers, Lightcycle organizes the logistics processes for disposing of the lamps cost-effectively and with minimal impact on the environment, both directly and at local recycling centers. Lightcycle bundles the volume to be transported and coordinates the collection logistics. You drop off your old lamps and Lightcycle does the rest.

Disposal of luminaires from commercial applications is also handled by Lightcycle. OSRAM is a contract partner of Lightcycle. Since 2010 luminaires can be disposed of directly throughout Germany at any one of 100 Lightcycle luminaire collection points. In addition to dropping off luminaires at collection points, luminaires can also be collected from wholesalers, installers, building sites or customers. There are basically no volume restrictions on collection jobs. For large quantities Lightcycle can set up an individual permanent collection point. You drop off your old luminaires and Lightcycle does the rest.

RoHS Directive: 2002/95/EC Greatly reduced mercury content

This EU directive has defined the use of certain hazardous substances since July 1, 2006. The mercury content in some discharge lamps has been restricted. As a company committed to the protection of the environment, OSRAM is doing more than just meeting statutory requirements. Our objective is to reduce hazardous substances such as mercury to the absolute minimum needed and to promote the development, for example, of efficient mercury-free lighting systems. Because it promotes the use of new environmentally friendly technologies and materials we comply with the RoHS Directive (**R**estriction of **H**azardous **S**ubstances) for the benefit of the environment and health.

1) Since 23.03.2006 there is an obligation in Germany to take products back

General notes

Standard packs

General

All OSRAM articles are EAN coded in their various packaging formats. The EAN numbers listed in this catalog normally relate to the smallest packaging unit unless otherwise indicated.

Technical data is in accordance with DIN (German Industrial Standards) and IEC (International Electrotechnical Commission).

In future editions of this Lighting Program, ILCOS (International Lamp Coding System) codes will gradually be incorporated in addition to existing OSRAM references. This will enable lamp types to be specified without having to use a particular manufacturer's reference.

Unless otherwise indicated, all lamps are designed for a mains voltage of 230 V.

For CE labeling see notes on page 12.32

Sales and shipments are based on the OSRAM Conditions of Supply and Payment valid on the contract date.

Technical data and dimensions are subject to the customary small tolerances.

Subject to technical modification and availability of supplies. The information in this catalog supersedes information in previous catalogs.

® = Registered trademark

Standard packs

There is a surcharge on order quantities different from the standard pack quantities listed in this catalog because standard packs have to be broken open.

There are considerable advantages in ordering original cartons/standard packs:

- Prompt delivery
- No surcharges
- Simple cost-saving handling on receipt
- No time-consuming checks when the goods arrive
- Exact contents description on each stacked carton
- No danger of mistaking one type of lamp for another
- Reduced risk of losses in transit
- Reduced risk of breakage

Types not listed

Available on request. Surcharge for different bases and voltages.

CE labeling for fixtures, lamps and accessories

Products that fall under the scope of the European directives on low voltage (LVD), electromagnetic compatibility (EMC) and the eco-design of energy related products (ErP and its applicable implementation measures) must carry the CE label in order to be sold in the EU. The CE label indicates compliance with the principal requirements of these directives. Of course, all OSRAM products meet the requirements of the relevant European directives and therefore carry the CE label.

Notes on CE labeling:

1. CE labeling as a requirement for marketing products in Europe

The CE label is applied to the product itself or to its type plate (minimum height of the label: 5 mm). If this is not possible in certain circumstances the label may be applied to the packaging, if any, and also to the accompanying paperwork. The CE label is a requirement for sales within the EU and must therefore be applied before a product can be marketed. By applying the CE label to their products, manufacturers and importers are confirming that their products comply with the "basic requirements" of special European directives and ordinances and that they meet the stated objectives of the directives (electromagnetic compatibility, for example). As a rule, these "basic requirements" are met if the products were manufactured in compliance with the relevant ordinances and harmonized European standards.

2. The CE label is an administrative mark

The CE label is an administrative mark addressed to the national inspection agencies. The CE label indicates to these agencies that at the time of its marketing the labeled product complies with the European directives that apply to the product and require a CE label.

3. Neither retailers nor consumers have the right to inspect the conformity certificates of the manufacturers

The right to request and inspect conformity certificates is reserved exclusively for those market inspection agencies responsible for checking that electrical and electronic products comply with statutory requirements. In Germany these are the Bundesnetzagentur (Federal Network Agency, responsible in connection with the EMC directive), the Gewerbeaufsichtsämter (Trade Supervision Offices, responsible in connection with the low-voltage directive), the relevant authorities and the Bundesanstalt für Materialforschung und -Prüfung (Federal Agency for Material Research and Testing) as the commissioned agency (in connection with the ErP directive).

4. The CE label is not a seal of quality or an approval mark

CE labeling relates solely to compliance with the statutory "basic requirements" contained in certain directives and ordinances. It is therefore not an indicator of the quality of the product.

The product features required in the ordinances for implementing the ErP directive are verified by the manufacturers by means of type testing and confirmed with the CE label. As an administrative label required by law, the CE label should not be confused with the approval marks (such as ENEC and VDE marks) issued by independent inspectorates. These inspectorates do not even check whether or not a product carries the CE label legitimately.

Symbols on our packaging

OSRAM has always focused not only on high product quality but also on the health and safety of the consumers of its products. The European regulations on product safety create the same conditions in all EU member states and standardize the safety requirements relating to products.

The regulations promise greater safety and transparency for the consumer. To meet our obligations arising from these regulations, we provide information about our products on the products themselves, on the packaging and on the leaflets enclosed with the products. Because there are so many different languages in the EU we use pictograms.

OSRAM uses the following symbols:

	Open packaging, read instructions		Restriction on burning position Additional text avoids misinterpretations
	Read the enclosed leaflet before use		Do not throw away with household waste
	Keep away from children		Use indoors only
	Hold by the casing, not the lamp		Disconnect the power supply before relamping
	Do not touch the lamp with bare fingers		Disconnect electronic control gear from the power supply before maintenance work
	Do not touch the glass bulb; hold the casing when inserting		Switch off headlights before replacing lamp
	Do not use the lamp if the glass bulb is scratched or damaged		Can be operated in unshielded luminaires
	Must not be used if outer bulb is defective		Operate only in shielded luminaires

	Lamp cannot be dimmed	
	Caution: hot	Must be installed and maintained only by qualified electricians
	Wear suitable protective gloves when fitting or removing	High levels of UV radiation
	Wear suitable goggles when fitting or removing	Germicidal lamp
	Protect against splashes	Radiation hazard
	Dichroic reflector lamp ("Cool Beam") – use only in fixtures designed for these lamps	Operate only with control gear
	Cap reflector lamp – use only in special installations	Ignition procedure for lamps with built-in igniter
	Restriction on burning position: p = horizontal, h = hanging, s = standing, 15 = ±15°	Ignition procedure for lamps with external igniter
		Dangerous voltage

Symbols in the tables

Symbols used in all chapters

	Power in W
	Voltage in V
	Current in A
	Operating frequency in Hz
	Color temperature in K
	Luminous flux in lm at 35 °C
	Luminous flux in lm
	Luminous intensity in cd
	Power factor/wavelength
	Diameter d in mm
	Diameter d ₁ in mm
	Length l in mm
	Length l ₁ max. in mm
	Width b in mm
	Height h in mm
	Light center length (LCL) in mm
	Spacing a in mm

	Focal length a in mm
	Beam angle in °
	Base
	Average period of use/life
	Burning position
	Light color
	Color
	Color rendering index
	Protection class
	Dimmable
	Control
	Number of control outputs
	Ambient temperature range in °C
	Type of protection
	Rated current in mA
	Standard pack in pcs.
	Fig. no.

LED systems

	Length of smallest unit in mm
	No. of LEDs per module
	Cable length in mm
	Cable cross-section/AWG
	Binnings
	Threshold unit for the quality of color differences
	System luminous efficacy
	Luminous flux of chain
	Luminous flux of module
	Output voltage/output power
	Wattage of chain
	Luminous efficacy
	Average luminance
	Module wattage in W
	System wattage in W

Halogen lamps

	Fuse, quick-acting, in A
--	--------------------------

Compact fluorescent lamps

 I_{max.} [mm]	Length I _{max.} in mm
 I_{max.} IEC [mm]	Length I _{max.} to IEC in mm
 I_{l1 max.} IEC [mm]	Length I _{l1} max. to IEC in mm
 I_{l2 max.} [mm]	Length I _{l2} max. in mm
	Rated number of switching cycles
 lm 25°C	Luminous flux in lm at 25 °C

Fluorescent lamps

 TUBE d [mm]	Tube diameter d in mm
 d_{1 max.} [mm]	Max. diameter d ₁ in mm
 d_{2 max.} [mm]	Max. diameter d ₂ in mm
 d_{3 max.} [mm]	Max. diameter d ₃ in mm
 l₂ [mm]	Length l ₂ in mm
 l₃ [mm]	Length l ₃ in mm
 d [mm] IEC	Diameter to IEC in mm

Discharge lamps

 d max. [mm]	Max. diameter d in mm
 lm = I_b	Aperture luminous flux b in lm

Display and signal lamps

 V	Test voltage in V
 L_f	Aperture window f in mm

General lighting service lamps

Overall length in mm

Electronic control gear

 b₁ [mm]	Hole spacing b ₁ in mm
 T_c	Maximum operating temperature at the t _c point in °C
 No. of OUTPUTS	Number of outputs
 No. of CONTROL INPUTS	Number of control inputs
 V min.-max.	DC voltage in V
 kHz ECG	Operating frequency in kHz
 W	Dimming range
 +	For lamp / LED module
 max.	Maximum cable length – system in m

V_{IN} Input voltage in V

V_{OUT} Output voltage in V

kV
START Ignition voltage in kV

 **g** Weight in g

Light management systems

Detection zone

Working range of light sensor in Lx

Maximum installation height in m

Type of installation

Transmitter range in m

Number of DMX channels
